

2. Are U.F.O. files open to the public?

UFO files at the Aerospace Technical Intelligence Center are not open to the general public, but are open to bonafide news media representatives when they so request.

Our files consist of over 7,200 cases. It is not possible to forward any files to your group for your use. The files are open to any bonafide news media representative desiring to see them, as several have done.

There is no truth to the charges and allegations that the Air Force is withholding the truth from the American public. Our files are and have been open to bonafide news media representatives who, in fact, have visited the files and had complete, unrestricted access to them.
