ROCKET EXPLOSION
REPORT 'FALSE'

EL PASO, Tex., Oct. 16 (AP). -- Ten. Enrique Diaz Gonzales, who commands the Juarez military garrison just across the border from El Paso, today blamed a "false report" for the Mexican War Department's announcement that an American rocket landed south of here last Sunday.

His statement was made as search was resumed for a mysterious object which blazed through the sky, crashed and apparently exploded in the mountains near the village of Caseta, Mexico, across the Rio Grande from Fabens, Tex.

The War Department in Mexico City asserted two days ago that investigation indicated the object was a V-2 rocket launched from a U. S. Army experimental station in Texas.

EL PASO, Tex., Oct. 12. (AP)—An unidentified flaming object soared over the Texas-Mexico border today, apparently smashing into the Samalayuca mountains of Mexico with a loud explosion and billows of smoke.

The approximate impact area was estimated to be less than 10 miles from the point where a V-2 rocket, off its track, crashed south of Juarez May 29.

The public relations officer at the White Sands proving grounds, where the V-2 rockets have been launched, said none of the missiles had been fired since Oct. 9.

Maj. Gen. John L. Homer, Fort Bliss commander and military official, at air fields and other installations in the southwest, said that no guided missiles had been fired today and no rocket planes were missing from the fields in the area.

At least four persons saw the fiery object darting through the skies "with the speed of a falling star" at approximately 9:30 a. m.
