Incident: 252

(Capt Eckerman Sannes, USAF and Wife Dorothy

Name and address of observer: (3200th Climatic Test Sqd. Elgin AFB, Fla

Occupation and hobbies:

Comments of Interrogator relative to intelligence and character of observer(s):

Observer is mature, serious, disturbed by incident and apparently reviewed all aspects of observations before reporting.

NARRATIVE SUM. ARM:

Flying object appeared to be 1 horizontal row of lighted windows. Both observations were made with object approximately 8 to 11 miles distant over the Gulf of Mexico. During both observations sparks and flames were observed (brighter colored than V-1 exhaust). Color was a pale red becoming exceptionally bright at split-second intervals. Light in windows more brilliant than the sparks or flames. During the second sighting the sparks appeared more pronounced and were apparently pulsating at approximately 1/4 second intervals. Sparks appeared to be in an irregular pattern after turning to final course of approximately 270° but were mainly in an inverted "Y" with sides at a 30° angle. Object was observed thru 7 x 50 binoculars. Mass of object was not discernible. Bouncing appeared to start after turn to final 270° course. Object climbed erratically in "bounces of approximately 2,000 feet" with occasional rapid losses of altitude of approximately 4,000 feet": resulting in an overall climb till lost to view at an altitude of the order of 40,000 feet.

1st Report lists time as 2220 , 2nd Report stated 2320

UNIDENTIFIED AERIAL OBJECTS

Incident No. _____

1. Date of Observation 1/27/49 Date of Interview 9 FEB 49
2. Exact time of observation (local) 11:20 P.M. EST.
3. Place of Observation :
(Map Coordinates)
4. Position of observer (air, car, bldg, location of - give details):
Dined from moving car, then outside of car.
5. What attracted attention to object: *No navigation lights, very bright lighting - high speed.*
6. Number of objects and sketch of formation or grouping: *one object*
7. Apparent size (compare to known object, i. e., sun, moon, thumb or fist at arms length): *Longer than any plane I have seen flying in the air.*
8. Color of object: *Bright Lights*
9. Shape (give graphic description - compare with known object): *Double row of lights. As it diminished in size due to its travel away from me like a ball of fire with sparks flying from it.*
10. Altitude (Angle of elevation above horizon - 0° at horizon, 90° overhead):
About 10°
11. Direction from observer (Angle clockwise from North): *Northwest*
12. Distance from observer (Distance to town, bldg, etc., over which object appeared to be): *~~Montauk~~ about 8 miles*
13. Direction of flight of object (s): *North when first observed then turned in a southerly direction, then turned west and passed from view.*
14. Time in sight: *Between 2 5-3 minutes*
15. Speed (time to cover given angular distance): *Much faster than a transport plane which I have seen flying at night.*
16. Sound and odor: *None*

Incident No. _____

17. Trail (color, length, width, persistance, etc.) Like sparks from a burning log but appearing in a rhythmic pattern.
18. Luminosity (visible by reflection, incandescence, other - degree of brilliance): Similar to a row of lighted windows but brighter.
19. Projections (fins, wings, rods, antennae, canopies, etc.): None.
20. Maneuvers (turns, climbs, dives, etc - sketch of flight path): Gradual decent on its northwest course then gradual climb in its southwest & westward course with numerous abrupt rises and falls which resembled a bouncing ball.
21. Manner of disappearance: Lost from sight.
22. Effect on clouds: No clouds visible
23. Additional information concerning object: Very brilliant and when object was losing & gaining altitude very rapidly, straight up and down like a bouncing ball. It resembled a ball of fire. It must be realized that the object (see attached) clear and quite dark.
24. Weather conditions and light at time of sighting: Name and address of observer: (Mrs.) [REDACTED]
Miramar Homes - Fort Walton, Florida
Occupation and hobbies: Housewife and homemaker.

Comments of Interrogator relative to intelligence and character of observer (Check neighbors, police dept., FBI records, employer, etc.):

UNCLASSIFIED

Did observer wear glasses, especially polaroid glasses at time of sighting, or was object viewed through canopy, window, or other transparent material?

First observed object through windshields of car then from outside of [REDACTED] and using binoculars at intervals

(23. Continued) was traveling away from me and
was therefore viewed at an increasing distance

Office of Director of Intelligence

SUBJECT: Information of "Flying Discs"

TO : Commanding General
Air Materiel Command
Wright-Patterson Air Force Base
Dayton, Ohio
ATTN: MCI

1. In compliance with USAF letters, "Reporting of information on "Flying Discs", dated 6 and 26 February 1948, classification "Restricted", the following report, received by this office 9 February 1948, is submitted:

a. Between Cortez and Bradenton, Florida, while driving west on Cortez Road, approximately $1\frac{1}{2}$ miles west of the Highway 41 intersection; at exactly 2220 hours EST.

b. Weather: CAVU.

c. (1) Captain [REDACTED] [REDACTED] presently assigned to 3200th Proof Test Group, Aircraft Branch, (Acting Chief, A/C Br., Climatic Hangar), Air Proving Ground, Eglin AF Base; Capt [REDACTED] has been a USAF officer since 1943 with assignments in aircraft engineering, test flight, and technical intelligence. He was assigned to Air Material Command, Intelligence Department, Air Documents Division, from December 1945 to September 1948.

(2) [REDACTED], his wife; home-maker.

d. Photographs not available.

e. Sketch attached as Incl No. 1.

f. (1) Two separate observations, one (1) each.

(2) Refer to sketch, Incl No. 1.

(3) "About length of two (2) Pullman cars".

(4) Color indistinguishable, "lighted windows".

(5) Speed - "Approximately 400 to 500 mph".

(6) Observation 1: Exactly 2220 hrs EST, heading 0 degrees.
Observation 2: Approximately 2227 hrs EST, heading

UNCLASSIFIED

[REDACTED]

[REDACTED]

UNCLASSIFIED

180 degrees, turning gradually to heading of 270 degrees with observation lost due to height as exactly 2230 hrs EST.

- (7) Observation 1: From approximately 3,000 ft a gradual descent until screened by tree tops.
Observation 2: Climbing erratically in "bounces of approximately 2,000 feet" with occasional rapid losses of altitude of approximately "4,000 feet"; resulting in overall climb until lost to view at an altitude of the order of 40,000 feet.
(8) As described above.
(9) Nil sound heard.
(10) Nil exhaust trail was observed.

E. General Remarks:

Flying object appeared to be one (1) horizontal row of lighted windows. Both observations made with object approximately 6 to 11 miles distant over the Gulf of Mexico receding in distance with second observation. During both observations, "sparks" and "flames" were observed (brighter colored than V-1 exhaust; pale red becoming exceptionally bright as split-second intervals). Light in windows more brilliant than the sparks or flames. On first observation, observer stopped car and discussed with wife. After object was lost to view, resumed driving with object reappearing on new course after about 2 miles of normal driving. On second sighting again dismounted, sparks more pronounced and apparently pulsating at approximately $\frac{1}{2}$ second intervals. Sparks appeared to be in an irregular pattern after turning to final course of approximately 270 degrees but mainly in an inverted "V" with sides at a 30 degree angle. Observer observed through 7 x 50 binoculars. Mass of object not discernible. Bouncing appeared to start after turn to final 270 degree course. While at Standard Oil station in Bradenton the following morning before noon, observer heard a customer discussing "flying discs" but unable to state whether or not this was reference to his sighting of the previous night.

2. Observer is mature, serious, disturbed by incident and apparently reviewed all aspects of observations before reporting.

Incident No. _____

1. Date of Observation 27 Jan 49 Date of Interview 5 Feb 49
2. Exact time of observation (local) 2320 hours
3. Place of Observation :
(Map Coordinates)
4. Position of observer (air, car, bldg, location of - give details:
From slow moving automobile, then from the ground
5. What attracted attention to object: Unusual size and brilliance
6. Number of objects and sketch of formation or grouping: One (1)
7. Apparent size (compare to known object, i. e., sun, moon, thumb or fist at arms length): Approximately the length of two pullman cars
8. Color of object: unusual brilliant light
9. Shape (give graphic description - compare with known object): a faint outline against the sky resembled the shape of a cucumber. Due to the darkness, this cannot be construed as to a positive statement.
10. Altitude (Angle of elevation above horizon - 0° at horizon, 90° overhead):
~~approximately~~ About 8 thousand feet when first observed.
11. Direction from observer (Angle clockwise from North): West to north west
12. Distance from observer (Distance to town, bldg, etc., over which object appeared to be): About 8 to 10 miles
13. Direction of flight of object (s): Approached from south, going north, then reappeared coming in a southerly direction, then came to a westernly direction until lost to sight (with variations in altitudes).
14. Time in sight:
25 minutes
15. Speed (time to cover given angular distance): approximately 400 miles per hour, with vertical ascent and descent at irregular intervals.
16. Sound and odor:
None **UNCLASSIFIED**

DECLASSIFIED AT 30 YEARS

UNCLASSIFIED

17. Trail (color, length, width, persistance, etc.) pulsating similiar in color to the sparks from a buring log.
18. Luminosity (visible by reflection, incandescence, other - degree of brilliance):
Brilliant, resembling row of lighted windows
19. Projections (fins, wings, rods, antennae, canopies, etc.):
None
20. Maneuvers (turns, climbs, dives, etc - sketch of flight path):
See sketch, attached
21. Manner of disappearance: lost from view, due to distance
22. Effect on clouds: No clouds
23. Additional information concerning object: A bit unusual from anything I heretofore observed.
24. Weather conditions and light at time of sighting: Clear

Name and address of observer: [REDACTED] s, Capt, USAF, 3200 Climatic Test Squadron, Eglin Air Force Base, Florida
Occupation and hobbies:

Officer, USAF. Hobbies: Farming

Comments of Interrogator relative to intelligence and character of observer (Check neighbors, police dept., FBI records, employer, etc.):

See par 1 c, original report.

Did observer wear glasses, especially polaroid glasses at time of sighting, or was object viewed through canopy, window, or other transparent material?

First observed object thru windshield of car, then thru binoculars from ground.
