APIC NO. \_\_\_\_\_

DATE OF INFO 17 Feb 1949

APIC NO. \_\_\_\_\_

LOCATION Albuquerque, N. M.

APIC NO. \_\_\_\_\_

SOURCE Engineering; Prof. & Others

DATE OF REPORT \_\_\_\_\_

DATE IN TO APIC \_\_\_\_\_

TIME OF OBSERVING 1.00

COLOR brilliant white

SHAPE Elliptical

SIZE ---

SIZE Larger than Meteor

ALTITUDE ---

COURSE West to east then North finally South

LENGTH OF TIME OBSERVED 6 Minutes

NO. OF REPORTS 1

TYPE OF OBSERVATION Ground

MANEUVERS Came straight from West, then a slight climbing, turn to North and finally a sharp climbing turn to south.

SKETCHES \_\_\_\_\_

APIC Form 309  
(Rev. 5-2)

Aircraft

UNCLASSIFIED

File 24-48

Subj: Unknown Aerial Phenomena

Time: 1757 17 Feb 49

Location: West of Albuquerque

Altitude: 6° above horizon

Color: red yellow

Time under observation: 6 to 9 minutes

Shape: elliptical

Size: Length - diameter of moon  
Width: 1/3 diameter of full moon

Direction: West to East climbing 3°

Tactics: Made definite turn to south

Observers: Civil Engineering Professor, Univ of N.M.  
Military Guards Sandia Base including Officer of Guard

Local sensitive installation concerned. Scientific personnel and equipment unavailable this office. Dr La Paz only consultant engaged full time academically Univ New Mexico. Request assistance and/or advice. Please reply.

UNIDENTIFIED AERIAL OBJECTS

UNCLASSIFIED

Incident no. \_\_\_\_\_

1. Date of Observation 17 Feb 1949 Date of Interview 16 March 1949
2. Exact time of observation (local) Approximately 1800 hours
3. Place of Observation: 35 deg 07 min N  
(Map Coordinates) 107 deg 47 min W  
Approximation within 2 min
4. Position of observer (air, car, bldg, location of - give details):  
At Chief's Rancho, Highway 66; outdoors.
5. What attracted attention to object: Light
6. Number of objects and sketch of formation or grouping: One
7. Apparent size (compare to known object, i.e., sun, moon, thumb or fist at arms length): Larger than a meteor.
8. Color of object: White Light
9. Shape (give graphic description - compare with known object):  
Oval
10. Altitude (Angle of elevation above horizon - 0° at horizon, 90° overhead): N/S
11. Direction from observer (Angle clockwise from north):  
Southwest; approximately 225 degrees.
12. Distance from observer (Distance to town, bldg, etc., over which object appeared to be): N/S
13. Direction of flight of object (s): Vertical climb, then leveled off to a gradual ascent to the south.
14. Time in sight: N/S
15. Speed (time to cover given angular distance): N/S
16. Sound and odor: None

[REDACTED]

17. Trail (color, length, width, persistence, etc.)  
**Faint trail of smoke, same color as body of object, lasted "Several seconds"**
18. Luminosity (visible by reflection, incandescent, other - degree of brilliance):  
**Self-luminous**
19. Projections (fins, wings, rods, antennae, canopies, etc.):  
**None**
20. Maneuvers (turns, climbs, dives, etc. - sketch of flight path):  
**Vertical climb, then leveled off to gradual climb to south.**
21. Manner of disappearance: **Just went out suddenly.**
22. Effect on clouds: **No clouds in area.**
23. Additional information concerning object: **None**
24. Weather conditions and light at time of sighting:  
**Clear, slight trace of light remaining in western sky.**

Name and address of observer: **[REDACTED] Co, Grants, New Mexico**

Occupation and hobbies: **Truck driver. Former police officer and guard [REDACTED].**

Comments of Interrogator relative to intelligence and character of observer  
(Check neighbors, police dept., FBI records, employer, etc.):

**Said to be sober, fairly intelligent person by [REDACTED] Chief of Police, [REDACTED] New Mexico.**

Did observer wear glasses, especially polaroid glasses at time of sighting, or was object viewed through canopy, window, or other transparent material?

**No**

Incident: 273

Name and address of observer: Lt. [REDACTED] [REDACTED], AESS, Los Alamos, N.M.

Occupation and hobbies: Atomic Energy Security Service  
Los Alamos, N.M.

Comments of Interrogator relative to intelligence and character of  
observer(s):

NARRATIVE SUMMARY:

27 Feb 49  
1905 hours

I was returning from station 101 to station 100.  
While on the straight strip of road adjacent to the airstrip I happened to  
glance toward the north at which time I observed a greenish colored light  
moving across the northern sky toward the east. It was traveling on a  
course parallel to the surface of the earth. It was visible for approximately  
two seconds. It did not appear to travel beyond my range of vision, but  
suddenly disappeared as I was watching it. It did not leave a trail ~~of~~ in  
the sky nor did it appear to have a tail like a meteor.

Due to the very short time that it was visible I am unable to estimate  
the rate of speed or altitude of the object.

UNIDENTIFIED AERIAL OBJECTS

UNCLASSIFIED

Incident No. \_\_\_\_\_

1. Date of Observation 17 Feb 1949 Date of Interview 17 March 1949
2. Exact time of observation (local) \_\_\_\_\_
3. Place of Observation: 35 deg 5 Min N  
(Map Coordinates) 106 deg 35 Min W
4. Position of observer (air, car, bldg, location of - give details):  
Outside in heights section of Albuquerque, New Mexico
5. What attracted attention to object: Light
6. Number of objects and sketch of formation or grouping:  
One
7. Apparent size (compare to known object, i.e., sun, moon, thumb or fist at arms length): Too large for plane -- about as long near end of observation as one lunar diameter.
8. Color of object: Brilliant white, shifting to peach color as it climbed.
9. Shape (give graphic description - compare with known object):  
Appeared round at first; then shifted to an ellipse, gradually lengthening until length was ten times width.
10. Altitude (Angle of elevation above horizon - 0° at horizon, 90° overhead): N/S due to variation as object approached and rapid climb at end.
11. Direction from observer (Angle clockwise from north):  
N/S (taken by LaAs)
12. Distance from observer (Distance to town, bldg, etc., over which object appeared to be): Not ascertainable
13. Direction of flight of object (s): West to East; then North a little; then a sharp climb to South.
14. Time in sight: At least six (6) minutes.
15. Speed (time to cover given angular distance):  
N/S
16. Sound and odor:  
None

**UNCLASSIFIED**

Incident No. \_\_\_\_\_

17. Trail (color, length, width, persistence, etc.)  
**No actual trail, but object became elongated.**
18. Luminosity (visible by reflection, incandescent, other - degree of brilliance):  
**Self-luminous**
19. Projections (fins, wings, rods, antennae, canopies, etc.):  
**None**
20. Maneuvers (turns, climbs, dives, etc. - sketch of flight path):  
**Came straight in from west; then a slight climbing turn to North; then a sharp climbing turn to South.**
21. Manner of disappearance: **Kept going out of sight, or else diminished in brilliance until invisible.**
22. Effect on clouds: **No clouds in sky.**
23. Additional information concerning object: **Appeared spherical at first; then became elongated. As the object turned, it bent around the corners, similar in appearance at the turns to a piece of bent pipe.**
24. Weather conditions and light at time of sighting: **Cloudless sky; light not quite all gone from western sky.**

Name and address of observer: **Marvin May, University of New Mexico.**

Occupation and hobbies: **Professor of Civil Engineering. Studies and works in field of meteoritics.**

Comments of Interrogator relative to intelligence and character of observer (Check neighbors, police dept., FBI records, employer, etc.):

**Very intelligent man; past experience in meteoritics makes his observation even more valuable.**

Did observer wear glasses, especially polaroid glasses at time of sighting, or was object viewed through canopy, window, or other transparent material?

**No**
