SUBJECT: Information of Unidentified Flying Object.

TO: Commanding General,  
Air Materiel Command,  
Wright Patterson Air Force Base, Ohio.  
ATTENTION: MCIAIC-3.

1. In accordance with letter, Headquarters, USAF, subject: "Reporting of Information on 'Flying Discs'," dated 6 February 1948 and Flight Service Regulation 200-4, the following information of unidentified flying object is forwarded as received by March Flight Service Center from Air Route Traffic Control, Los Angeles.

a. 1st Lt. ~~John [REDACTED]~~, pilot of Air Force 7348, T-11 on a round robin flight from Fresno Air Terminal, California to Los Angeles and return, reported that he was circled by a jet propelled blimp while over Sandberg Pass, about 40 miles south of Bakersfield, California at 2030 P, 28 February 1949. The speed of the object was estimated at 500 MPH, flying at an altitude of nine thousand feet. The object then disappeared on a heading of 180°.

b. Weather reported for Sandberg Pass at 2030 P was twenty thousand feet thin scattered clouds, visibility 10 miles, temperature 38, dew point 34, wind south 7, altimeter 3007. Remarks to the sequence weather were: Visibility west 1 mile, fog ceiling and visibility variable due to scattered stratus drifting over station. Conditions radically changing.

c. No other information of object's size, shape, speed, or color, is available.

RALPH A. BEEVE,  
1st Colonel, USAF,  
Commanding.

SUBJECT: Investigation of Unidentified Flying Object

TO: Commanding General  
Air Materiel Command  
Wright-Patterson Air Force Base  
Dayton, Ohio

1. In compliance with 1st Indorsement to basic letter, File DMZ 360.112, Subject: Information of Unidentified Flying Object, dated 1 March 1949, the following report of investigation is submitted:

a. 1st Lt [REDACTED], [REDACTED], Air Force Reserve Pilot, stationed with 703d Air Reserve Unit, Fresno State Teachers College, Fresno, California, was interrogated and submitted a written statement concerning his observation of an unfamiliar flying object. This observation was made in the vicinity of Sandberg Pass, forty (40) miles South of Bakersfield, California, at approximately 2030 PST, 28 February 1949. No other persons were found who had witnessed the flight of this object. Guide to investigation of unidentified aerial objects, which was furnished this office by Air Materiel Command, was used during the interrogation.

b. Lt [REDACTED] a student of Industrial Arts at Fresno State Teachers College, Fresno, California, appeared to be an earnest young man, rather quiet and reserved, with no particular aptitude for self-expression. He is regarded as sober and respectable and enjoys a good reputation among his associates, in the school. In the opinion of the Investigating Officer, Lt [REDACTED] would have neither the inclination nor the ability to construct this report in a wild flight of fancy.

c. Lt [REDACTED] was first interviewed on 22 March 1949. He reported that at the time of the observation he had been seated in the left pilots seat of a P-11 aircraft, flying the return leg of a round robin cross country proficiency flight from Fresno Air Terminal to Los Angeles and return. The object which he observed was roughly

Subject: Investigation of Unidentified Flying Object

sausage shaped in that both the forward and trailing ends resembled a B-29 nose. The object was on a heading approximately North to South and approached [redacted] aircraft from 12 o'clock, at which time he made his first observation. The object disappeared to the rear of the T-11 and then apparently it made a 360° turn around it as [redacted] made his second observation approximately fifteen (15) seconds later when the object appeared to his right and made a 180° turn in front of him, again disappearing to the rear. The total length of time for both of these observations was approximately twenty (20) seconds. The weather at the time was reported to be high thin scattered clouds at 20,000 feet, vsby 10 miles. Temperature was 36, dew point 34, with a wind from the South at about eight (8) miles per hour. Vsby to the West was one (1) mile, with fog ceiling due to scattered stratus. Weather conditions were rapidly changing at the time. The object appeared at about 20° above the observers horizon. Its size in comparison to the hand held at an arms length from the face was about that of the index and third finger. The object had no definite color and no luminosity. There were no projections observed. There appeared to be no effect on clouds in the vicinity and [redacted] asserts that his attention was drawn to the object by the glow of a propulsion jet from the objects tail. Interrogation of experienced jet pilots reveal that at night no jet glow is visible unless observed from exactly behind the aircraft, looking right up the tail pipe. Smiths co-pilot was in the back of the T-11 at the time of the observation and saw nothing of the object. Smith attempted to contact another pilot flying a similar mission who was approximately ten (10) minutes behind him to ask him to watch for the object. Smith was answered by an unidentified voice over the radio whom he believed to be the pilot he was calling. Upon landing however, he discovered that although the other pilot had received his message he had not been able to contact [redacted] because of the interference created by the unidentified person answering [redacted] call. The other pilot likewise observed nothing of the object.

d. It will be noted that the original report of this incident was sent to Air Materiel Command from March Flight Service Center. Investigation revealed that March Flight Service Center was informed of the occurrence by a report from Los Angeles Control Center. This Control Center probably received its information from one (1) or more of four (4) Radio Range Stations in the vicinity. These are the Bakersfield Radio, Lancaster Radio, Newhall Radio or Los Angeles Radio. It is believed that it was the operator on duty at one of these Range Stations that answered [redacted] call, although he did not identify himself and no information of a more definite nature could be obtained.

UNCLASSIFIED

OI

2 May 1949

Subject: Investigation of Unidentified Flying Object

e. The following installations, both commercial and military in this area, were interrogated as to the possibility of any jet aircraft flights originating from their stations at the approximate time of the observation.

- (1) Muroc Air Force Base, California
- (2) Point Mugu USNAMTC, Point Mugu, California
- (3) El Toro MCAS, Santa Ana, California
- (4) Inyokern USNAMTC, Inyokern, California
- (5) Hamilton Air Force Base, California
- (6) 62nd Fighter Wing, Metropolitan Airport, Van Nuys, California
- (7) 196th Fighter Sq, San Bernardino AFB, California
- (8) U.S. Naval Air Station, North Island, San Diego, California
- (9) Lockheed Aircraft Corp, Burbank, California
- (10) North American Aviation Inc, Inglewood, California
- (11) Base Operations, this station
- (12) 1st Fighter Group, this station
- (13) 67th Tac Reconnaissance Wing, this station

All of this correspondence was answered and regarding the origin of any jet flights that could possibly have been in the area of the observation at the time the observation was made, was negative.

f. No radar sightings of the object were reported.

STATEMENT

I am a Reserve pilot, 703rd AROC Unit, at Fresno, California. On the night of February 28, 1949, I was pilot of a T11 aircraft No. 7346 on a round-robin flight from Fresno Air Terminal, California, to Los Angeles and return. I departed Fresno 1845 hours with one crew member. At approximately 2030 PST while in the vicinity of Sandberg Pass, 40 miles south of Bakersfield, while flying on a northerly heading at an altitude of approximately 9,000 feet, I observed what appeared to be a jet-propelled aircraft of an unfamiliar type. Weather over Sandberg Pass was thin scattered clouds, visibility 10 miles, temperature 36, cloud covering at approximately 20,000 feet, dew point 34, wind south 7, altimeter 3007. The visibility west was 1 mile with fog ceiling and visibility variable due to scattered stratus drifting in the area. The object with the general shape of a blimp approached head-on about 1500 feet above me, made a complete 360° circle, and left on a heading of 180° to my course. The object left a steady glow at the rear which I believed to be a jet exhaust. At the time the co-pilot was in the rear of the aircraft and at no time observed the object. I was unable to determine its distance from me due to darkness and climatic conditions. The object appeared about as big as two fingers at arms' length and it took about 40 seconds for object to make a 360° turn about my aircraft. During this maneuver I observed the object to be approximately 20° above my line of flight. The windshield of my aircraft was clear at the time the observation was made.

When the object completed the turn and left, I immediately attempted to contact the pilot of another aircraft also on a round-robin about 10 minutes behind me. I was answered by someone whom I believed to be this pilot but I later learned that, although he had received my transmission, he had been unable to reply due to the interference of the unknown individual who was answering me. I was never able to identify the individual with whom I communicated. The other pilot that I was attempting to contact did not observe the object and to my knowledge I am the only person who made the actual observation.

SUBJECT: Investigation of Unidentified Flying Object

TO: Commanding General  
Air Materiel Command  
Wright-Patterson Air Force Base  
Dayton, Ohio

1. In compliance with 1st Indorsement to basic letter, File  
ENZ 360.112, Subject: Information of Unidentified Flying Object,  
dated 1 March 1949, the following report of investigation is sub-  
mitted:

a. 1st [redacted] Air Force Reserve Pilot,  
stationed with 703d Air Reserve Unit, Fresno State Teachers College,  
Fresno, California, was interrogated and submitted a written statement  
concerning his observation of an unfamiliar flying object. This ob-  
servation was made in the vicinity of Sandberg Pass, forty (40) miles  
South of Bakersfield, California, at approximately 2030 PST, 28 Feb-  
ruary 1949. No other persons were found who had witnessed the flight  
of this object. Guide to investigation of unidentified aerial ob-  
jects, which was furnished this office by Air Materiel Command, was  
used during the interrogation.

b. Lt [redacted] a student of Industrial Arts at Fresno State  
Teachers College, Fresno, California, appeared to be an earnest young  
man, rather quiet and reserved, with no particular aptitude for self-  
expression. He is regarded as sober and respectable and enjoys a  
good reputation among his associates, in the school. In the opinion  
of the Investigating Officer, Lt [redacted] would have neither the inclina-  
tion nor the ability to construct this report in a wild flight of  
fancy.

c. Lt [redacted] was first interviewed on 22 March 1949. He re-  
ported that at the time of the observation he had been seated in the  
left pilots seat of a P-11 aircraft, flying the return leg of a round  
robin cross country proficiency flight from Fresno Air Terminal to  
Los Angeles and return. The object which he observed was roughly

Subject: Investigation of Unidentified Flying Object

sausage shaped in that both the forward and trailing ends resembled a B-29 nose. The object was on a heading approximately North to South and approached [REDACTED] aircraft from 12 o'clock, at which time he made his first observation. The object disappeared to the rear of the T-11 and then apparently it made a 360° turn around it as [REDACTED] made his second observation approximately fifteen (15) seconds later when the object appeared to his right and made a 180° turn in front of him, again disappearing to the rear. The total length of time for both of these observations was approximately twenty (20) seconds. The weather at the time was reported to be high thin scattered clouds at 20,000 feet, vwy 10 miles. Temperature was 36, dew point 34, with a wind from the South at about eight (8) miles per hour. Vwy to the West was one (1) mile, with fog ceiling due to scattered stratus. Weather conditions were rapidly changing at the time. The object appeared at about 20° above the observers horizon. Its size in comparison to the hand held at an arms length from the face was about that of the index and third finger. The object had no definite color and no luminosity. There were no projections observed. There appeared to be no effect on clouds in the vicinity and [REDACTED] asserts that his attention was drawn to the object by the glow of a propulsion jet from the objects tail. Interrogation of experienced jet pilots reveal that at night no jet glow is visible unless observed from exactly behind the aircraft, looking right up the tail pipe. [REDACTED] co-pilot was in the back of the T-11 at the time of the observation and saw nothing of the object. [REDACTED] attempted to contact another pilot flying a similar mission who was approximately ten (10) minutes behind him to ask him to watch for the object. [REDACTED] was answered by an unidentified voice over the radio whom he believed to be the pilot he was calling. Upon landing however, he discovered that although the other pilot had received his message he had not been able to contact [REDACTED] because of the interference created by the unidentified person answering [REDACTED] call. The other pilot likewise observed nothing of the object.

d. It will be noted that the original report of this incident was sent to Air Materiel Command from March Flight Service Center. Investigation revealed that March Flight Service Center was informed of the occurrence by a report from Los Angeles Control Center. This Control Center probably received its information from one (1) or more of four (4) Radio Range Stations in the vicinity. These are the Bakersfield Radio, Lancaster Radio, Newhall Radio or Los Angeles Radio. It is believed that it was the operator on duty at one of these Range Stations that answered Smiths call, although he did not identify himself and no information of a more definite nature could be obtained.

e. The following installations, both commercial and military in this area, were interrogated as to the possibility of any jet aircraft flights originating from their stations at the approximate time of the observation.

- (1) Muroc Air Force Base, California
- (2) Point Mugu USNAMTC, Point Mugu, California
- (3) El Toro MCAS, Santa Ana, California
- (4) Inyokern USNAMTC, Inyokern, California
- (5) Hamilton Air Force Base, California
- (6) 62nd Fighter Wing, Metropolitan Airport, Van Nuys, California
- (7) 196th Fighter Sq, San Bernardino AFB, California
- (8) U.S. Naval Air Station, North Island, San Diego, California
- (9) Lockheed Aircraft Corp, Burbank, California
- (10) North American Aviation Inc, Inglewood, California
- (11) Base Operations, this station
- (12) 1st Fighter Group, this station
- (13) 67th Tac Reconnaissance Wing, this station

All of this correspondence was answered and regarding the origin of any jet flights that could possibly have been in the area of the observation at the time the observation was made, was negative.

f. No radar sightings of the object were reported.

STATEMENT

UNCLASSIFIED

I am a Reserve pilot, 703rd AROC Unit, at Fresno, California. On the night of February 28, 1949, I was pilot of a T11 aircraft No. 7346 on a round-robin flight from Fresno Air Terminal, California, to Los Angeles and return. I departed Fresno 1845 hours with one crew member. At approximately 2030 PST while in the vicinity of Sandberg Pass, 40 miles south of Bakersfield, while flying on a northerly heading at an altitude of approximately 9,000 feet, I observed what appeared to be a jet-propelled aircraft of an unfamiliar type. Weather over Sandberg Pass was thin scattered clouds, visibility 10 miles, temperature 36, cloud covering at approximately 20,000 feet, dew point 34, wind south 7, altimeter 3007. The visibility west was 1 mile with fog ceiling and visibility variable due to scattered stratocumulus drifting in the area. The object with the general shape of a blimp approached head-on about 1500 feet above me, made a complete 360° circle, and left on a heading of 180° to my course. The object left a steady glow at the rear which I believed to be a jet exhaust. At the time the co-pilot was in the rear of the aircraft and at no time observed the object. I was unable to determine its distance from me due to darkness and climatic conditions. The object appeared about as big as two fingers at arms' length and it took about 40 seconds for object to make a 360° turn about my aircraft. During this maneuver I observed the object to be approximately 20° above my line of flight. The windshield of my aircraft was clear at the time the observation was made.

When the object completed the turn and left, I immediately attempted to contact the pilot of another aircraft also on a round-robin about 10 minutes behind me. I was answered by someone whom I believed to be this pilot but I later learned that, although he had received my transmission, he had been unable to reply due to the interference of the unknown individual who was answering me. I was never able to identify the individual with whom I communicated. The other pilot that I was attempting to contact did not observe the object and to my knowledge I am the only person who made the actual observation.
