DETAILS:

1. This investigation is predicated upon AFCSI Letter No. 85, dated 12 August 1949, and OSI Headquarters File No. 24-185.

AT ALBUQUERQUE, NEW MEXICO

2. Mr. [REDACTED], University of New Mexico Student, 124 $\frac{1}{2}$ N. Arno, Albuquerque, New Mexico, was interviewed on 1 March 1950. The following information is transmitted as a result of this interview.

Time and date of sighting: 2115 hours, 25 February 1950
Point of observation: 600 N. Vassar, Albuquerque, N. M., residence of Dr. [REDACTED]. Sitting in living-room looking West. [REDACTED] did not see object.
Number of objects: One
What attracted attention to object: Brightness of same.
Color: Bright greenish white. Left a reddish glow behind it. Forward end of it also seemed a little red.
Size: About three times the size of a shooting star.
Shape: Tear drop shape with short tail.
Apparent construction: Unknown - appeared to be burning.
Distance of object from observer: Unknown - could have been 5 miles and it could have been 85 or more.
Angle of elevation from horizon: Approximately 20°
Direction from observer: West-southwest
Direction of flight of object: Toward South- 5° off vertical (almost straight down)
Tactics or maneuvers: None fell almost straight down
Evidence of trail or exhaust: Small trail of sky rocket effect
Effect on clouds: Cloudless sky.
Luminosity of object: Greenish-white like a parachute flare
Apparent means of support and/or propulsion: None
Projections and/or indentations: None noticed
Speed: Slightly slower than falling star.
Sound: None
Odor: None
Time in sight: One and a half seconds at most.
Manner of disappearance: Appeared to burn out.
Notes relative to observer: Observer is a student in Journalism and has been interested in writing articles in University newspaper concerning "flying saucers" and other strange air phenomena. That is why he became so interested at sighting of object.

3. All logical leads have been exhausted and this case is being closed.
