MEMORANDUM

SUBJECT: Balloon-shaped Object Reported at Stockton Naval Supply Annex,
Stockton, California, 1 January 1951.

A reliable government agency has furnished information to the effect that on 1 January 1951, a red and green balloon-shaped object reportedly descended upon the Stockton Naval Supply Depot, Stockton, California. This object exploded upon hitting the ground, but a part of it remained to burn fiercely until extinguished by Naval security guards. The residue was recovered and has been transmitted to the FBI laboratory for examination.

No information concerning the origin of this object is available other than the recovery of a bamboo ring from the debris, which would suggest the possibility of tropical or oriental construction. Additional information will be forwarded upon receipt. (B-2)

Balloon-shaped Object Reported at Stockton Naval
Supply Annex, Stockton, California, 1 January 1951
SABOTAGE

TO: Commanding General
Air Materiel Command
Wright-Patterson Air Force Base
Dayton, Ohio
ATTN: MCEP

1. The following information is forwarded as a matter of interest
to your Headquarters:

A reliable government agency has furnished information to the effect that on 1 January 1951, a red and green balloon-shaped object reportedly descended upon the Stockton Naval Supply Depot, Stockton, California. This object exploded upon hitting the ground, but a part of it remained to burn fiercely until extinguished by Naval security guards. The residue was recovered and has been transmitted to the FBI laboratory for examination.

No information concerning the origin of this object is available other than the recovery of a bamboo ring from the debris, which would suggest the possibility of tropical or oriental construction. Additional information will be forwarded upon receipt. (B-2)

2. Attention is invited to the fact that information contained herein has been derived from sources other than USAF. In accordance with Paragraph 8b, AFR 205-1, dissemination of the information contained herein must not be made outside of USAF channels.

DECLASSIFIED AFTER 12 YEARS.

SUBJECT: Unidentified Flying Objects (Project 10073) 26 FEB 1951

TO: Director of Intelligence
ATTN: Evaluation Division
Technical Capabilities Branch
Headquarters USAF
Washington 25, D. C.

1. Your attention is invited to the inclosed copy of letter dated 12 February 1951, received from 5D-OSI, this command, pertaining to the subject. This matter has been investigated based upon the information presented. It was found that typical high altitude balloons often incorporate an explosive cap for the purpose of disconnecting the mechanical equipment used with the balloons at a predetermined altitude. Malfunctioning of the electrical circuit may explain the explosion explained in the inclosed letter.

2. The personnel connected with high altitude and weather research at this command have no knowledge of any bamboo rings on the various types of balloons now in use.

3. It is requested that action be taken to obtain additional details on this incident and this command be advised accordingly.

21 MAR 1951

Counter Intelligence Division, Directorate of Special Investigations, The Inspector General

Lt Col Barnard/lm/53623
AFCSI-6

1. Reference is made to R&R dated 8 February 1951 in the above captioned matter.
2. The FBI has advised that a laboratory examination of the evidence submitted reflects that the "balloon-shaped" object was probably a home-made "hot air" balloon. No fingerprints of value for comparison purposes were found on the bamboo ring and nothing of particular significance was noted with respect to the wires and other materials of construction which would suggest a possible source for these materials.
3. The Air Materiel Command has been informed of this matter.

ATTN: MCSP

1. Reference is made to letter, this office, dated 12 February 1951, file 5D 28-0, subject as above.

2. The following additional information is furnished as a matter of interest to your headquarters:

"1. On 1 January 1951 a red and green balloon-shaped object reportedly descended upon the Stockton Naval Supply Depot, Stockton, California. This object 'exploded' upon hitting the ground and almost disintegrated, but a part of it remained to burn fiercely until extinguished by NSD guards. The residue and other evidence of the 'balloon' was forwarded to the FBI laboratory.

"2. The Federal Bureau of Investigation has advised that examination of the evidence submitted reflects that the object was probably a home-made 'hot air' balloon. No fingerprints of value for comparison purposes were found on the bamboo ring, which was among the debris recovered, and nothing of particular significance was noted with respect to the wires and other materials of construction which would suggest a possible source for these materials."

3. Attention is invited to the fact that information contained herein has been derived from sources other than USAF. In accordance with paragraph 8b, AFR 205-1, dissemination of the information contained herein must not be made outside of USAF channels.
