AIR INTELLIGENCE INFORMATION REPORT

SUBJECT: Flying Saucer  
AREA REPORTED ON: FINLAND  
DATE OF REPORT: 21 September 1951  
PREPARED BY (Officer): Lt Col Howard T. VAN DE CAR, Air Attaché  
REFERENCES (Control number, directive, previous report, etc., as applicable):  
-----

FROM (Agency): Office of Air Attaché, Helsinki, Finland

DATE OF INFORMATION: 20 September 1951

EVALUATION: B-3

SOURCE: Mr. [REDACTED]

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 117-Part II)

1. Mr. [REDACTED] Ex-Finnish Minister to [REDACTED], graduate engineer, and business man presently residing in Kuopio, Finland, gave the following information to the undersigned during a business lunch:

2. He stated that he had observed a flying saucer near Mikkeli, Finland, at 2005 hours on [REDACTED] (At this season daylight lasts until about 2300, at which time only a twilight type darkness occurs.) Mr. [REDACTED] stated that the craft was flying at an estimated altitude of 3,000 meters, or about 10,000 feet, from the northwest toward the southeast, or in the direction of Leningrad. The craft was described as being a perfect disk approximately 25 meters in diameter, of aluminum color, with no visible windows. Source estimated that it was flying at a speed of 800 miles per hour in straight and level flight. He was unable to see any cockpit canopy but assumed that this was because he could see only the underneath side.

3. Mr. [REDACTED] said that this observation was made while he was driving on the road north of Mikkeli with his wife and that she first pointed out the craft. He then stopped the automobile, got out, and watched the craft disappear into the clouds. At that time there were broken clouds and the craft was flying through a large opening in the overcast. Source stated that he could hear absolutely no noise from the aircraft and that in his estimation the engine was neither a conventional reciprocating engine nor a jet engine. He further stated that he had personally determined that type of propulsion was used but declined to say what his conclusions were. According to Mr. Saastamoinen, he had not previously mentioned this sighting to anyone.

COMMENTS of Preparing Officer:

4. Since this man is a graduate engineer (field unknown) and gave no indication of being anything but a crackpot, it is felt that his report warrants some consideration. The cloudy sky condition, combined with the noiseless propulsion, are suggested as possible reasons for the fact that this flight has been unreported to this date.

0 incis.
