MARCH AIR FORCE BASE - 23 September 1951

I. DISCUSSION OF INCIDENT

The first report of this incident, which appeared in Status Report No. 1, proved to be incomplete and misleading. Further investigation has corrected the discrepancies and the following account of the incident is considered to be accurate.

At approximately 0700 PDST, two F-86 aircraft were scrambled from George Air Force Base, California, on a routine mission. The flight was vectored to 113° 40'W - 33° 50'N by GCI. (See inclosed overlay.) The flight orbited the position and took up a heading toward Long Beach Radio. At approximately 0715 PDST, the flight reported to GCI that they observed an unidentified object high at 12 o'clock. The flight was 30 seconds out of Long Beach Radio at this time. The object appeared to be in a left orbit at about 50,000 ft. The object could not be picked up by the ground radar, however, visual contact was maintained. The object continued a left orbit and passed over the two aircraft. Attempts were made by the F-86's to identify the object but they were unsuccessful due to the altitude of the object and a fuel shortage. At approximately 0810 or 0815 the flight was released by the ground controller and they returned to George Air Force Base. The object appeared to be an aircraft with 45° swept wings and bright silver in color. When last seen the object was in a left orbit, or circling to the left. The pilot's opinion was that it was a swept wing type aircraft.

At approximately 0800 PDST four additional F-86 aircraft were scrambled from George AFB to relieve the two above mentioned F-86's. The four aircraft split into two, two-ship elements, denoted as Flight 2-A and 2-B on the inclosed overlay. Flight 2-A was vectored to a position at 117° 30' and 30° 30'N. They arrived at this position at approximately 0810 and sighted the object high at 12 o'clock at what appeared to be over March AFB. A steady climb was made to 43,000 ft. and the object was found to be near March AFB. The object appeared to be in a controlled orbit to the right and left at 50,000 to 55,000 ft. The two aircraft stayed in the area for 10-15 minutes before breaking off the intercept due to a fuel shortage and landed at 0845 PDST. The object appeared to be a swept wing aircraft.

The second element of the group, noted as Flight 2-B on the overlay, observed the object soon after take-off. The object appeared to be going south. The flight made a series of climbing turns under the object as they climbed to 43,500 ft. The object was in a wide right turn. At approximately 0915 PDST the aircraft broke off the attempted intercept and returned to their base. This flight reported that the object appeared to be round and silver.

No more intercepts were attempted. At no time was the object observed on the radar screen nor was it reported to be observed visually from the ground. The F-86's, however, were continually tracked by radar.

UNCLASSIFIED

CONFIDENTIAL

**UNCLASSIFIED**

The F-36's were unable to climb to the estimated altitude of the object due to the fact that they were carrying external fuel tanks and, electing not to jettison them.

## II. STATUS OF INVESTIGATION

At 0700 PST a radiosonde balloon was released from the Long Beach Municipal Airport. This balloon was lost at 0747 PST, eight miles from the airport on a bearing of 95° true, due to a malfunction of the tracking equipment. (See point A on overlay.) At this time the balloon would have been at approximately 40,000 ft. The winds above 40,000 ft. are unknown but it is logical to assume that at this altitude they will be relatively constant in direction. Assuming a relative constant direction of 270° and an average velocity of 30 knots above 40,000 ft. (the wind at 40,000 ft. was 280° at 1 knots) the possible flight path of the balloon can be plotted on the overlay.

The original sighting by Flight 1 could very possibly have been the balloon as their heading was toward Long Beach Airport. The altitude of the F-36's at the time of the sighting is unknown but was probably below 40,000 ft. At 0751, the time of the original sighting, the balloon would be at 50,000 to 55,000 ft. and approximately ten miles directly ahead of the two aircraft. The apparent orbiting of the balloon cannot be explained. The balloon would make a gradual turn due to wind shifts but these are so gradual that it is doubtful if the movement would be apparent from an aircraft as fast as an F-36.

Referring to the ground track of Flight 2-A, if a 30 knot wind at 270° is assumed, at 0810, the approximate time the F-36's sighted the object from a 355° TC, the balloon would be at B on the overlay. The balloon would probably be at an altitude of 60,000 ft. and nearly straight ahead of the aircraft. Due to the size of the balloon, the distance could have been misjudged and the balloon could have appeared to be near three. Once again the orbiting of the object cannot be explained.

The attempted intercept by Flight 2-B cannot be explained. If the ground track given by the leader of Flight 2-B is correct it is very doubtful that the flight was observing a balloon. The time that they sighted the object is not known but if it is assumed that they flew beneath the object for 30 minutes, it is highly doubtful that a wind shift of nearly 360° could occur above 60,000 ft. to give the illusion of a turn.

The possibility of this object being an experimental aircraft from some southern California aircraft plant, naval airfield, or from Edwards Air Force Base was checked with negative results. No other balloons were released in the vicinity.

## III. CONCLUSIONS

With the information available, it cannot be concluded that the object was definitely the radiosonde balloon released from Long Beach Municipal Airport. However, since the balloon was near the flight path of two of the F-36 elements, and assuming that the orbiting of the object was an illusion due to the relative motion between the balloon and the aircraft, it can be concluded that the unidentified object was very possibly a radiosonde balloon.

**UNCLASSIFIED**

~~CONFIDENTIAL~~  
UNCLASSIFIED

The third attempted intercept, the one in which the object was followed in a wide turn, cannot be explained.

It is not believed that further interrogation would produce any additional significant details due to the fact that some of the personnel involved have been transferred overseas and due to the time since the incident.

MARCH AFB - 23 September 1951

On 23 September 1951 at 0810 PST, an unidentified object was sighted over Long Beach, California. Four F-86 aircraft were scrambled and the object was sighted by them over Murco, California. On attaining an altitude of 43,000 ft. the F-86's reported the object to be orbiting March AFB at an estimated altitude of between 50,000 ft. and 55,000 ft. The object appeared to be a swept wing, fighter type aircraft.

Weather

Unavailable at this time.

Status of Investigation

Radiosonde balloons were released from San Diego, Long Beach and Santa Maria, California at approximately 0700 PST. All of these weather stations were checked by OSI personnel and although the balloons were released all weather station personnel stated that it would be very doubtful if their balloons would have traveled the course that the object traveled.

All of the major aircraft factories and installations conducting experimental flight tests were contacted. No experimental aircraft airborne at the time of the sighting.

Additional information has been requested as to additional details of the incident such as times and locations during the attempted interception by the F-86's and other possible balloon launchings.

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

0710 PST

At 1610Z, 23 September 1951, an object was sighted and reported over Long Beach, California, at 50,000 feet. Four (4) F-86 were dispatched to investigate and sighted object over Muroc, California. Attaining an altitude of 43,000 feet, F-86 sighted object to be in a constant orbit in the vicinity of March Air Force Base, California, at an altitude between 50,000 feet and 55,000 feet. Object appeared to be a swept-wing, fighter-type aircraft.

Santa Maria, San Diego and Long Beach are regularly scheduled to release weather balloons which can easily rise to 50,000 feet, may have a kite attached that can give off reflection, and can expand greatly if they are 350 gram balloons.

# AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency): CG 27th Air Division (Def), Norton AFB, California	REPORT NO. 1	PAGE 2 OF 2 PAGES
---	-----------------	-------------------

The inclosed report was received by Captain J. R. STEELE, Chief Controller, ADCC, from Major LEO MELZER, Operations Officer, 750th AC&W Squadron. The report was read back and verified by Major MELZER.

Major MELZER checked Edwards AFB Flight Dispatcher and Control Tower Operator concerning aircraft from Edwards AFB in flight. No jet or conventional aircraft had taken off from Edwards AFB. The Operations Officer confirmed that no experimental aircraft to his knowledge were scheduled for flight. Edwards AFB Flight Dispatcher checked Nellis AFB, Inyokern, and George AFB Operations and reported that no flight had been airborne at the time that would approximate descriptions given.

Major MANUSSIER, CO of the 750th AC&W Squadron, asked General BOYD, OG of Edwards AFB, whether he knew of any flight to which General BOYD replied in the negative. General BOYD suggested that North American Company at Los Angeles International Airport be checked. Major MELZER checked Bell Aircraft, N.A.C.A., Douglas, North American and Northrup, but only an MP at Northrup answered any of these calls and reported that there had been no activity all morning. Bell has been experimenting with X-1 and X-5; N.A.C.A. with the XF-92; Douglas with the D 558; and Northrup with the X-5.

Edwards AFB Weather Station reported that Santa Maria, San Diego and Long Beach are regularly scheduled to release weather balloons which can easily rise to 50,000 feet and can expand "like a house" if they are 350 gram balloons. Balloons released by Santa Maria usually drift over Long Beach and Riverside, the flight that was reported as sighted. A kite may be attached to the balloon as a "sounding set" and may give off reflection.

Major MELZER also spoke to Captain HARVEY, one of the pilots who sighted the object (see inclosed statement), who stated the object appeared to be orbiting when he sighted it and not going "too fast." This was in the March AFB area.

23 September 1951

On 23 September 1951 at approximately 0810 ST a bogie was sighted about 50,000 feet over Long Beach. I, Captain James H Harvey and my flight of four were dispatched by Kill Deer to investigate this bogie. When we sighted this bogie he appeared to be over Muroc. When we reached an altitude of 43,000 feet this object was in the vicinity of March Air Force Base.

From 43,000 feet this bogie appeared to be between 50,000 and 55,000 feet and also appeared to be a swept-wing, fighter-type aircraft. He was also noted to be in a constant orbit.

CHARACTER <b>SPECIAL INQUIRY</b>			
REFERENCE <b>TWX to Hqs OSI, dated 26 October 1951</b>			
SYNOPSIS  <p>The Commanding General, 27th Air Division, Norton AFB, San Bernardino, California, requested an investigation concerning the sighting of an unidentified object over Long Beach, California, on 23 September 1951. The object was sighted at 0810 hours at 50,000 feet. Four F-86's were dispatched to investigate and sighted object over Muroc, California. Attaining an altitude of 43,000 feet, the F-86's reported object to be in constant orbit in the vicinity of March AFB, California, at an altitude between 50,000 and 55,000 feet. Object appeared to be a swept wing fighter type aircraft. A check with aircraft manufacturers in the Southern California area revealed that none had scheduled test flights of experimental aircraft on the date object was seen. Weather balloons are released by three weather stations in Southern California, which rise to a height in excess of 50,000 feet. It was found that all three of these stations released a balloon on the morning of 23 September 1951. The operators of these stations said that there was a possibility that the object sighted was one of the balloons which had been released just prior to the time this object was reportedly seen.</p>

DETAILS:

1. The investigation of this matter was predicated upon a letter from the Commanding General, Headquarters, 27th Air Division, Norton AFB, San Bernardino, California, dated 22 October 1951, requesting this District Office to make an investigation concerning the sighting of an unidentified object over Long Beach, California, on 23 September 1951.

2. At the time this matter was referred to this office, the 27th Air Division furnished an Intelligence Report which sets forth the following information.

"At 1610Z, 23 September 1951, an object was sighted and reported over Long Beach, California, at 50,000 feet. Four (4) F-86 were dispatched to investigate and sighted object over Murco, California. Attaining an altitude of 43,000 feet, F-86 sighted object to be in a constant orbit in the vicinity of March Air Force Base, California, at an altitude between 50,000 feet and 55,000 feet. Object appeared to be a swept-wing, fighter-type aircraft.

"Santa Maria, San Diego and Long Beach are regularly scheduled to release weather balloons which can easily rise to 50,000 feet, may have a kite attached that can give off reflection, and can expand greatly if they are 350 gram balloons.

"The inclosed report was received by Captain J. R. STEELE, Chief Controller, ADCC, from Major LEO MELZER, Operations Officer, 750th AC&W Squadron. The report was read back and verified by Major MELZER.

"Major MELZER checked Edwards AFB Flight Dispatcher and Control Tower Operator concerning aircraft from Edwards AFB in flight. No jet or conventional aircraft had taken off from Edwards AFB. The Operations Officer confirmed that no experimental aircraft to his knowledge were scheduled for flight. Edwards AFB Flight Dispatcher checked Nellis AFB, Inyokern, and George AFB Operations and reported that no flight had been airborne at the time that would approximate descriptions given.

"Major MANUSSIER, CO of the 750th AC&W Squadron, asked General BOYD, CG of Edwards AFB, whether he knew of any flight to which General BOYD replied in the negative. General BOYD suggested that North American Company at Los Angeles International Airport be checked. Major MELZER checked Bell Aircraft, N.A.C.A., Douglas, North American and Northrup, but only an MP at Northrup answered any of these calls and reported that there had been no activity all morning. Bell has been experimenting with X-1 and X-5; N.A.C.A. with the XF-92; Douglas with the D 558; and Northrup with the X-3.

UNCLASSIFIED

5-15-161529

UNCLASSIFIED

"Edwards AFB Weather Station reported that Santa Maria, San Diego and Long Beach are regularly scheduled to release weather balloons which can easily rise to 50,000 feet and can expand "like a house" if they are 350 gram balloons. Balloons released by Santa Maria usually drift over Long Beach and Riverside, the flight that was reported as sighted. A kite may be attached to the balloon as a "sounding set" and may give off reflection.

"Major MELZER also spoke to Captain HARVEY, one of the pilots who sighted the object (see inclosed statement), who stated the object appeared to be orbiting when he sighted it and not going "too fast." This was in the March AFB area."

"S T A T E M E N T

23 September 1951

"On 23 September 1951 at approximately 0810 ST a bogie was sighted about 50,000 feet over Long Beach. I, Captain James H. Harvey and my flight of four were dispatched by Kill Deer to investigate this bogie. When we sighted this bogie he appeared to be over Muroc. When we reached an altitude of 43,000 feet this object was in the vicinity of March Air Force Base.

"From 43,000 feet this bogie appeared to be between 50,000 and 55,000 feet and also appeared to be a swept-wing, fighter-type aircraft. He was also noted to be in a constant orbit.

"s/t

JAMES H. HARVEY  
Captain USAF

"CERTIFIED TRUE COPY:

/s/ Ethel F. Hoffman  
ETHEL F. HOFFMAN  
Major, USAF "

3. The Air Defense Command suggested the possibility that this object was an experimental aircraft which was being test flown for one of the aircraft manufacturing concerns located in this area.

4. From the information set forth above, it will be noted that this object was first sighted over Long Beach. The F-86's, after being dispatched to investigate, sighted the object over Muroc, California, which is some 100 miles due North of Long Beach. Captain HARVEY, the flight leader, said that when the F-86's attained an altitude of 43,000 feet, the object was sighted in the vicinity of March AFB. The March AFB is some

- 3 -

UNCLASSIFIED

515-161529

18D 24-129

UNCLASSIFIED

125 miles South and East of Muroc. Therefore, after being first sighted, the object appeared to travel due North for some 100 miles and then Southeast for approximately 125 miles.

5. Special Agent ARTHUR J. MAIKOSKI made inquiry at the following aircraft companies in an effort to determine if they were test flying any experimental aircraft on 23 September 1951.

Northrop Aircraft Company  
Hawthorne, California

North American Aviation, Inc.  
Inglewood, California

Douglas Aircraft Company, Inc.  
El Segundo, California

Lockheed Aircraft Company  
Burbank, California

Hughes Aircraft Company  
Culver City, California

It was found that none of these companies was test flying experimental aircraft on the date this object was seen. The above companies are under contract to build aircraft for both the U. S. Air Forces and U. S. Navy.

6. Special Agent THOMAS J. McARDLE made inquiry at the Consolidated Vultee Aircraft Corporation, San Diego, California, and they advised that, although they were presently working on experimental aircraft, they did not have a flight scheduled for 23 September 1951.

7. Colonel C. E. JACKSON, Air Force Engineering Field Office, 5504 Hollywood Boulevard, Los Angeles, advised that he knew of no experimental aircraft which was being test flown on the date this object was seen. He stated that practically all USAF experimental aircraft are test flown at Edwards AFB, Muroc, California. In this respect, it will be noted that the 27th Air Division made inquiry at Edwards AFB and they reported that no experimental aircraft was scheduled for flight on 23 September 1951.

8. Special Agent MEDFORD M. LEAKE interviewed Major KENNETH T. BROOKS, Detachment Commander, Weather Division, Long Beach AFB, Long Beach, California. He claimed that a weather balloon is released by his station approximately every six hours. He said that his records show that one was released between the hours of 0645 and 0745 on the morning of 23 September 1951 and that due to mechanical difficulties, contact with the balloon was lost at 42,900 feet. The rate of ascent of this balloon was 1000 feet per minute and was traveling in a general North Easterly and

UNCLASSIFIED

515-161529

UNCLASSIFIED

later Westerly direction.

9. Lt. OLIVER A. WAGGONER, Forecaster at the Long Beach Weather Station, advised that, in his opinion, the balloon could not have been more than eight miles from point of release at Long Beach at the time his office lost contact with it.

10. Major BROOKS said that this balloon at 43,000 feet would be about 20 feet in diameter and the size and shape would be determined by the wind currents and the wind speed. Twenty feet below the balloon on a cord is attached a red paper parachute which is connected to a radio transmitter encased in a small white glossy cardboard box approximately 1' x 8".

11. Special Agent HENRY O. CHAPPELL interviewed Mr. P. R. NELSON, General Services Meteorologist, Hancock Field, Santa Maria, California, and he advised that his station released two weather balloons on 23 September 1951. One was released at 0300Z hours (1900 hours Pacific Standard Time, 22 September 1951), and one was released at 1505Z hours (0705 Pacific Standard Time, 23 September 1951). The one which was released on 22 September 1951 attained an altitude of 78,000 feet and was contacted for 63 minutes by radio. The one which was released on 23 September 1951 remained in the air 74 minutes and attained an altitude of 100,000 feet. He said that the course of the balloons would depend upon the wind velocity and that the average winds from Santa Maria are traveling in a Southeast-erly direction. He stated that it was doubtful that one of the balloons which was released at Santa Maria, which is some 175 miles North and West of Long Beach, could have traveled from Santa Maria South to Long Beach then North to Santa Maria, and then South and East to March AFB. A description of the balloon at an altitude of some 50,000 feet was the same as that furnished by Major BROOKS.

12. Special Agent THOMAS McARDLE was advised by Lt. Commander D. C. WEST, Weather Station Officer, Naval Air Station, San Diego, California, that his station released a balloon at approximately 0700 hours PST on 23 September 1951. He claimed that the balloon attained an altitude of some 60,000 feet before it burst. San Diego is approximately 150 miles South of Long Beach.

13. All of the above weather officers stated that there was a possibility that the object sighted was one of the balloons which had been released, however each stated that it was doubtful because of the course which the sighted object reportedly traveled.

14. This matter was coordinated with the Federal Bureau of Investigation, Los Angeles, The Office of Naval Intelligence in Los Angeles, and San Diego, and the Counter Intelligence Corps, Fort MacArthur, California. None of these agencies had received any information relative to this matter.

SUBJECT: [REDACTED] High Flying Unidentified Object

28 NOV 1951

TO: Commanding General  
27th Air Division (Def)  
Attention: Director of Intelligence  
Norton Air Force Base  
San Bernardino, California

1. Reference is made to AF Form 112, #1, dated 5 Oct 1951, subject: "High Flying Unidentified Object", in which the incident of an unidentified object sighted over March Air Force Base on 23 Sept 1951 is reported.

2. The possibility of this object being a weather balloon released from San Diego, Long Beach, or Santa Maria or that it was an experimental aircraft has been investigated. It is highly doubtful if the object was a balloon, and it was not an experimental aircraft. Consequently, further investigation of the incident is warranted.

3. It is requested that the following information be obtained as soon as possible and forwarded to Chief, Air Technical Intelligence Center, Attn: ATIAA-2c, Wright-Patterson Air Force Base, Dayton, Ohio.

a. From what location was the original sighting of the object made? The report states that it was sighted over Long Beach. How was it located, visually or by radar?

b. From what base did the F-86's take off? What was the time of take-off?

c. The report states that the object was first sighted by the F-86's over Murco. What was the time and location of the F-86's at the time of this sighting? How did they determine the object was over Murco?

d. The report states that when the F-86's reached an altitude of 43,000 ft. the object was over March Air Force Base. Did the F-86's have the object in sight during its run from Murco to March Air Force

Base or did they lose it and sight it again over March Air Force Base? What was the time when the object was sighted over March AFB?

3. Were any types of balloons launched from either Norton AFB or March AFB several hours prior to the time of the sighting of the object over March AFB?

4. In addition to the above specific points, it is requested that the F-86 pilots be reinterrogated and a detailed statement of their attempted interception be submitted. It would be very helpful to include with these a Sectional Chart with the flight path of the F-86's and times of significant occurrences marked.

5. It is realized that due to the time that has elapsed since the incident it may be difficult to get data but it is requested that every effort be made to obtain information that is as accurate as possible.

6. The Air Technical Intelligence Center wishes to express its appreciation for the cooperation received by your Command and the Office of Special Investigations in regard to this incident.

Appendix IV

MARCH AIR FORCE BASE - 23 September 1951

I. DISCUSSION OF INCIDENT

The first report of this incident, which appeared in Status Report No. 1, proved to be incomplete and misleading. Further investigation has corrected the discrepancies and the following account of the incident is considered to be accurate.

At approximately 0700 PDST, two F-86 aircraft were scrambled from George Air Force Base, California, on a routine mission. The flight was vectored to 116° 40'W - 33° 50'N by GCI. (See inclosed overlay.) The flight orbited the position and took up a heading toward Long Beach Radio. At approximately 0755 PDST the flight reported to GCI that they observed an unidentified object high at 12 o'clock. The flight was 30 seconds out of Long Beach Radio at this time. The object appeared to be in a left orbit at about 50,000 ft. The object could not be picked up by the ground radar, however, visual contact was maintained. The object continued a left orbit and passed over the two aircraft. Attempts were made by the F-86's to identify the object but they were unsuccessful due to the altitude of the object and a fuel shortage. At approximately 0810 or 0815 the flight was released by the ground controller and they returned to George Air Force Base. The object appeared to be an aircraft with 45° swept wings and bright silver in color. When last seen the object was in a left orbit, or circling to the left. The pilot's opinion was that it was a swept wing type aircraft.

At approximately 0800 PDST four additional F-86 aircraft were scrambled from George AFB to relieve the two above mentioned F-86's. The four aircraft split into two, two-ship elements, denoted as Flight 2-A and 2-B on the inclosed overlay. Flight 2-A was vectored to a position at 117° 30'W and 30° 20'N. They arrived at this position at approximately 0810 and sighted the object high at 12 o'clock at what appeared to be over March AFB. A steady climb was made to 43,000 ft. and the object was found to be near March AFB. The object appeared to be in a controlled orbit to the right and left at 50,000 to 55,000 ft. The two aircraft stayed in the area for 10-15 minutes before breaking off the intercept due to a fuel shortage and landed at 0845 PDST. The object appeared to be a swept wing aircraft.

The second element of the group, noted as Flight 2-B on the overlay, observed the object soon after take-off. The object appeared to be going south. The flight made a series of climbing turns under the object as they climbed to 42,500 ft. The object was in a wide right turn. At approximately 0905 PDST the aircraft broke off the attempted intercept and returned to their base. This flight reported that the object appeared to be round and silver.

No more intercepts were attempted. At no time was the object observed on the radar screen nor was it reported to be observed visually from the ground. The F-86's, however, were continually tracked by radar.

TO: Commanding General  
Air Technical Intelligence Center  
Wright-Patterson Air Force Base  
Dayton, Ohio

1. Reference is made to your letter AFCIN-ATIAA-2c dated 28 November 1951. In compliance with your request, the following information is submitted in answer to the questions contained in paragraph (3) of your letter.

a. Original sighting of object was made visually at 0715 PST from position over Santa Monica Bay as indicated on attached map overlay.

b. Element making original sighting took off from George Air Force Base at 0700 PST.

c. Reports that object was directly over Muroc and March Air Force Base were apparently in error, resulting from the difficulty of making a land fix at high altitude. (Based on later interrogation of pilots by DI of First Fighter-Interceptor Wing, when reports indicated both sightings at the same time.)

d. Paragraph 1 c above applies.

e. Norton Air Force Base and March Air Force Base were queried as to the launching of any type balloon, or any other object that might have had the appearance of the object in question, from those bases. Norton Air Force Base replied in the negative; March Air Force Base has not replied to date, and their reply will be forwarded to your headquarters immediately upon receipt. However, the orbit of the object, as compared with the prevailing winds indicated, seems to preclude the possibility of the object being a free balloon.

2. Attached are statements of reinterrogation of those pilots still available for questioning, and Sectional Chart indicating significant occurrences, as submitted by the 94th Fighter-Interceptor Wing. (A correction of Captain Reichman's statement was later made verbally to the DI of the Wing: The nature of the scramble was an Air Defense mission, not to intercept an unidentified object as originally stated.)

3. Also attached is a statement by the Commanding Officer of the 669th AC&W Squadron, which indicates that the object was never picked up by radar.

4. It is believed that this data presents as accurate a report as can be obtained. However, if further investigation is desired, this headquarters will make every effort to obtain additional information.

San Pedro, California

1. This headquarters has received a request for further investigation of the unidentified object sighted on 23 September 1951, and reported upon by 2nd Lt. Lorimer W. Hay-Chapman of your command.

2. It is requested that the following information be forwarded as soon as possible:

- a. Original sighting: how received, time and position.
- b. Time and position of later sightings, indicating whether visual or by radar.
- c. Detailed report of action taken, including scramble order.
- d. If feasible, a Sectional Chart showing flight paths and times of significant occurrences.

3. A detailed report of the interceptor action is also being requested through the 1st Fighter-Interceptor Wing. By correlating the two reports, it is hoped a complete history of the incident may be obtained.

669th AIRCRAFT CONTROL AND WARNING SQUADRON, Fort MacArthur, California

TO: Commanding General, 27th Air Division (DEF), Norton Air Force Base,  
San Bernardino, California

1. In reference to Par. 2a basic letter the following is submitted.

a. Original sightings: received by VHF from Swanee Brown leader at 0755 PDST. The object was over San Pedro, California.

b. Time and position of later sightings: Swanee Brown leader last saw the object near March Air Force Base, California. All sightings were visual, the object was not picked up by radar.

c. Swanee Brown flight was on an Air Defense mission when the object was sighted. Swanee Brown was unable to intercept the object because of its high altitude and speed. The ADCC Controller was notified of the incident and our attempt to intercept the craft.

d. It is not possible for this Headquarters to show the flight path of the object. It was under surveillance by the pilot for approximately fifteen (15) minutes. The flight path was erratic but in an easterly direction.

STATEMENT

UNCLASSIFIED

11 December 1951

- [REDACTED]
- [REDACTED]
1. Captain Harold E. Guthrie States: On the 23rd of September I was piloting an F-86B A/C in a flight of four. I took off from George Air Force Base at 0800, 23 September, 1951 for a scramble interception of an unidentified Bogie over the Los Angeles area. At approximately 0810 I sighted an unidentified object over San Antonio PEAK California, (117degrees 40' W-34 degrees, 20'N). It appeared to be at 40,000 feet altitude, moving South. This object appeared to be travelling at a slow speed. It was oval shaped with a silverish color, like aluminum. It had a level flight but orbitting right. The flight attempted to intercept; however, at 43,900 feet altitude we broke off because of low fuel. Object sighted was still above us.
2. Q. What action did you take with ACMF when you observed fuel low and had to break interception?
- A. Kill Deer was contacted and informed of our low fuel level. Our flight was released for Pancake.
- Q. Did Kill Deer acknowledge your message?
- A. Yes.
- Q. Did you hear any further alerts being directed by Kill Deer?
- A. No.
- Q. What time was this?
- A. Approximately 0925.
- Q. Did you see any other military A/C in the vicinity?
- A. None.
- Q. Were you in Radio Communication with any other military A/C in the vicinity?
- A. No.
- Q. Who else, in your particular flight, observed this object?
- A. Captain Harvey, Major Buchanan (transferred to Korea), and Captain Coberly (also now in Korea).
- Q. What was the nature of your discussion airborne, when the object was sighted?
- A. We discussed its altitude, speed, and direction of flight.

A. GUTHRIE

[REDACTED]

UNCLASSIFIED

UNCLASSIFIED

ON A. Cont'd. Kildare asked us to indentify, and we found that impossible to do.

Q. Why couldn't you?

A. Object was too high and we were suffering from a fuel shortage.

Q. Direction. Had this object maintained a Southerly direction during your attempt to intercept it?

A. It had maintained "Orbit to Right."

Q. Your position at 0925 was where and what altitude?

A. In the vicinity of SAN ANTONIO PEAK, Alt: 43,500ft.

Q. Do you know if there were any other Interceptors air borne on or about the L.A. area, when you were on Intercept Scramble?

A. Yes. Two others from George A.F.B.

Q. Separate flights?

A. Yes, a separate flight.

Q. Do you know if they were aware of the proximity of this object?

A. No. However, they had sighted it at Long Beach and they had sighted it before us.

Q. Can you give ~~me~~ the sequences of Vectors if any given you by ACM or any other such agencies?

A. There were no Vectors given by Kildare because object was not reflected in the radar scope.

Q. Do you know if your flight was observed Kildare scope?

A. I don't know. But I presume they did.

Q. Have you ever requested a Fix from them?

A. Yes, and they have given us a position Fix.

Q. What do you think your object sighted could have been, bearing and its behaviour?

A. It is my opinion it was a free weather balloon, influenced by upper air currents.

UNCLASSIFIED

UNCLASSIFIED

11 December 1951

1. On 23 September 1951 at approximately 0810 ST a bogie was sighted about 50,000 feet over Long Beach. I, Captain James H. Harvey and my flight of four were dispatched by Kill Deer to investigate this bogie. When we sighted this bogie he appeared to be over Muroc. When we reached an altitude of 43,000 feet this object was in the vicinity of March Air Force Base.

From 43,000 feet this bogie appeared to be between 50,000 and 55,000 feet and also appeared to be a swept-wing, fighter-type aircraft. He was also noted to be in a constant orbit.

2. Q. When you were vectored by the Long Beach area, were you able to fix your position?

A. Yes, at approximately 117° 30 W- 33° 20 N.

Q. Did you see this object?

A. Yes.

Q. What position was it, in relation to you?

A. 12 o'clock and very high.

Q. What was your heading at that time?

A. 340° Compass heading. (355° true heading - 15° drift)

Q. Did you alert the rest of your flight?

A. Yes, I did.

Q. By what method?

A. Radio.

Q. Were you on the same comm. channel as Kill Deer?

A. Yes.

"A" (HARVEY)

UNCLASSIFIED

Q. Did your flight Roger your information?

A. Yes they did.

Q. Were you sure Kill Deer read you also?

A. Right, because Kill Deer knew of object.

Q. Did you question Kill Deer if they could read object on the scope?

A. I did not, but Captain Reichman did.

Q. Were you over Maroc at any time?

A. Negative.

Q. Did you attempt to intercept object?

A. Yes I did with my three companions.

Q. What happened. Were you able to intercept?

A. No—because we had external tanks, and 43,000 feet was the highest we could get. Plus fuel shortages. If we had dropped our tanks, I believe we could have attained higher altitude.

Q. Did you ask permission to drop tanks?

A. No.

Q. Did Control instruct you to do so?

A. No.

Q. Did you lose sight of object at any time?

A. No.

Q. How long did you remain in area with object?

A. I don't know exactly, but at least 10 to 15 minutes. Not being able to climb higher, we broke off the intercept, because of the fuel shortage, and returned to Base.

Q. Did Kill Deer release you, or what comm did you have with Control?

A. Yes, when informed of our position.

Q. Did Kill Deer inform you a new interception was in progress?

A. No.

## UNCLASSIFIED

The F-86's were unable to climb to the estimated altitude of the object due to the fact that they were carrying external fuel tanks and elected not to jettison them.

### II. STATUS OF INVESTIGATION

At 0700 PDST a radiosonde balloon was released from the Long Beach Municipal Airport. This balloon was lost at 0743 PDST, eight miles from the airport on a bearing of  $95^{\circ}$  true, due to a malfunction of the tracking equipment. (See Point A on overlay.) At this time the balloon would have been at approximately 40,000 ft. The winds above 40,000 ft. are unknown but it is logical to assume that at this altitude they will be relatively constant in direction. Assuming a relative constant direction of  $270^{\circ}$  and an average velocity of 30 knots above 40,000 ft. (the wind at 40,000 ft. was  $280^{\circ}$  at 1 knots) the possible flight path of the balloon can be plotted on the overlay.

The original sighting by Flight 1 could very possibly have been the balloon as their heading was toward Long Beach Airport. The altitude of the F-86's at the time of the sighting is unknown but was probably below 40,000 ft. At 0751, the time of the original sighting, the balloon would be at 50,000 to 55,000 ft. and approximately ten miles directly ahead of the two aircraft. The apparent orbiting of the balloon cannot be explained. The balloon would make a gradual turn due to wind shifts but these are so gradual that it is doubtful if the movement would be apparent from an aircraft as fast as an F-86.

Referring to the ground track of Flight 2-A, if a 30 knot wind at  $270^{\circ}$  is assumed, at 0810, the approximate time the F-86's sighted the object from a  $355^{\circ}$  TC, the balloon would be at B on the overlay. The balloon would probably be at an altitude of 60,000 ft. and nearly straight ahead of the aircraft. Due to the size of the balloon, the distance could have been misjudged and the balloon could have appeared to be near Durco. Once again the orbiting of the object cannot be explained.

The attempted intercept by Flight 2-B cannot be explained. If the ground track given by the leader of Flight 2-B is correct it is very doubtful that the flight was observing a balloon. The time that they sighted the object is not known but if it is assumed that they flew beneath the object for 30 minutes, it is highly doubtful that a wind shift of nearly  $360^{\circ}$  could occur above 60,000 ft. to give the illusion of a turn.

The possibility of this object being an experimental aircraft from some southern California aircraft plant, naval airfield, or from Edwards Air Force Base was checked with negative results. No other balloons were released in the vicinity.

### III. CONCLUSIONS

With the information available, it cannot be concluded that the object was definitely the radiosonde balloon released from Long Beach Municipal Airport. However, since the balloon was near the flight path of two of the F-86 elements, and assuming that the orbiting of the object was an illusion due to the relative motion between the balloon and the aircraft, it can be concluded that the unidentified object was very possibly a radiosonde balloon.

~~CONFIDENTIAL~~

Q. Were you at any time over or near March Base?

A. Yes, within 10 miles, altitude 43,000ft.

Q. Did you see this object then?

A. Yes, it appeared, from angle we were at, to be directly over March AF. Base.

Q. Any noticeable maneuvers?

A. No, just an orbit—varied between left and right.

Q. Would you say it was a controlled orbit?

A. Yes, it appeared so; the turn was held in, i.e., controlled.

Q. Did you hear March Tower talk at any time?

A. No. I was on a different frequency.

Q. Can you describe the object?

A. It appeared to be a swept back wing, bright silver color. In size prospect, it would fit within the radii of a gun sight. ?

Q. What altitude do you estimate object was at?

A. 50-55,000 feet.

Q. Your altitude at this time was 43,000 feet.

A. Yes, it was.

Q. That would indicate approximately 12,000 feet difference between you and the object?

A. Yes.

Q. What was the weather and visibility?

A. Clear and unlimited.

Q. In your own opinion Captain, what do you deduce it (the object) could have been?

A. It could have been a free balloon.

Q. Did you discuss this object with your co-pilots.

A. Yes. We were not quite definite, but it was an unidentified object.

~~CONFIDENTIAL~~

Statement Cont'd (Harvey)

UNCLASSIFIED

Q. What time did you land?

A. At about 0845.

STATEMENT

11 December 1951

*Spilled  
Pencil*

1. Captain Omer J. Reichman states: On the morning of 23 September, 1951, I was one of an element of two that Scrambled at approximately 0700 hours. [The nature of this scramble was to intercept unidentified object.] We were Vektored over Long Beach Bay, arriving there at 0715 at approximately 30,000 feet. I was <sup>in a</sup> port orbit over position (118° 40 W--33° 50 N). I took up a Vector to Long Beach range at approximately 80° heading. At a period 30 seconds from Long Beach Range, I saw this object at 12 o/c high above me. It appeared to be in a left orbit of an undetermined speed, at above 50,000 feet altitude. It continued on a left orbit and passed directly over me, port to starboard. It appeared to have swept back wing of 45° and a very bright silver coloring---like sun reflecting on water. The prosepction of the object seemed very far away.

2. Did the pilot of your element also see this object?

A. Yes. (Name: Jack G. Ricot, <sup>Lt</sup> Captain.) Now TDY MAXWELL Fld.

Q. Did you attract his attention to the object?

A. Yes, I did.

Q. Did you satisfy yourself he saw and recognized object pointed out?

A. Yes, I did.

Q. How did you accomplish this?

A. Over the radio, V.H.F.

Q. Is that on the same channel as Kill Deer?

A. Yes. I called this information into them. They Rogered but they did not have object on the radar scope.

UNCLASSIFIED

"A" (REICHMAN)

[REDACTED]

Q. Could they, or was Kill Deer tracking you?

A. Yes. [REDACTED]

Q. You are quite certain Kill Deer Rogered you, but it could not Roger object?

A. Right. At the time I called in my position.

Q. What was your position at the time?

A. 30 seconds from Long Beach, heading 80 degrees. Probably in a

Q. Did you notice any maneuvers from this object?

A. No. It continued in a left orbit.

Q. Were you in vicinity of Murco at any time?

A. I passed within 20 miles going out and returning. I did not see object there.

Q. Did you try to intercept it?

A. No. The shortage of fuel and altitude of this object prevented me from doing so.

Q. Are you positive Kill Deer was aware of object, and also of your fuel shortage?

A. Yes, they were, because they had vectored the next flight into the vicinity and released us.

Q. In your own opinion, what do you think the object could have been?

A. I am of the opinion it was an A/C of some sort, being in a state of burn.

Q. Have you discussed this object with others who also saw it, and if so, how?

A. Yes, because of curiosity and attempting to resolve it. I also reported it on landing. Capt. Harvey made a written report.

Q. Did you lose sight of the object.

A. No. I left because of fuel shortage, and object was still in a port orbit, altitude approx. 50,000 ft.

[REDACTED]

[REDACTED]

Statement Cont'd. (Reichman)

UNCLASSIFIED

Q. What time approximately did you break off?

A. About 0810 to 0815.-- Heading directly to Base at a 33° heading.

ATIAA-11-42. This Center has been informed that your station launched a weather balloon between 0645 and 0745 PST on 23 Sept 1951, and that it was lost at 42,900 feet. It is requested that some exact details be forwarded by mail as soon as possible for use in high priority classified project. Information needed is:

- a. Exact time of launch.
- b. Ground track of balloon until it was lost.
- c. Time and location when balloon was lost.
- d. Winds aloft.
- e. Rate of ascent.
- f. Type of balloon.

In reply refer to Project Grudge.

This dist in receipt of req from CG 27 Air Div Norton AFB San Bernardino Calif requesting investigation concerning the sighting of an object over Long Beach Calif on 23 Sept 51. Req made by letter received this office 25 Oct 51. At 0610 hours 23 Sept 51 an object was sighted over Long Beach at 50,000 ft. A P-36's were dispatched and sighted object over Murco Calif. Attaining an altitude of 43,000 ft, P36's sighted object to be in constant orbit in vicinity of March AFB Calif at an altitude between 50-55,000 ft. Object appeared to be swept wing fighter type aircraft. Air Defense Command has requested we check possibility of experimental acft originating from airplane manufacturers this area. They also suggested possibility of this object being a weather balloon which are released by 3 weather stations this area periodically. This district handling this inquiry on priority basis and we are contacting acft manufacturing concerns in Southern Calif to determine if object could have been experimental acft. Also checking possibility that object could have been weather balloon. This office would appreciate receiving advice your Hqs as to any policy which may have been established on the handling of matters such as this, other than the established policy concerning the handling of unconventional acft type cases.

2. The following information regarding the sightings referenced in Mr. Sodeman's letter is provided to assist you in preparing an answer to him. The order of the information corresponds to that contained in the attachment.
3. The Laredo AFB, Texas, sighting which occurred on 4 December 1952 was evaluated as an aircraft sighting.
4. At 1446 on 22 July 1952 the weather observer of the local airport at Uvalde, Texas, sighted an object which he described as being large and round, but displaying no aerodynamic features. The object was reported to be silver in color and estimated as 50 feet in diameter and to be at an altitude of 20,000 feet. The observer estimated the objects speed as in excess of 1000 mph. The object traveled from east at approximately 40° elevation to the southwest. The movement was described as gyrating and the object was in sight for 45 seconds. The object seemed to be climbing and disappeared behind a large cumulus cloud. The observer was not aware of any sound. This case is classed as unidentified in the PAF files. However, it should be noted that an object at 20,000 feet which moves an angle of approximately 90° in 45 seconds would have a speed of approximately 530 knots. If the object were at 3000 feet or closer to the cloud base, it would have a speed of only 80 knots. The available information is not sufficient to allow any firm solutions to this case, but it is highly probable that the identification of a conventional object was the cause for this sighting.
5. On 22 September 1951 two sightings of PAF's were reported from California. An aircraft was observed at 11:00 AM. The object was successful and the object identified as a weather balloon.
6. On 3 August 1952 at 1615 PWT two objects were observed with binoculars from Hamilton AFB, California. The objects were observed from 10:15 to 11:15 minutes and were described as circular or globular in shape and silver in color. They were estimated to be 60-100 feet in diameter and possessing speeds of 400-450 mph. The objects were estimated to be at 12,000 and 16,000 feet. The object at 16,000 feet was reported to have dived at the lower object and reemerged much the same as a fighter during a dog fight. During

20 April 1952

Dear Sirs,

I would like to know without any complications in your work, if I could have the following information on these Flying Saucer sightings cases: The Laredo Air Force Base, Tex., December, 1951; also the Uvalde, Tex. case on July 22, 1951; and the cases on the sightings at March Air Force Base, Calif., on Aug. 21, 1951 and the Hamilton Air Force Base, Calif., Aug. 3, 1951; and the cases on rather case at Patrick Air Force Base, Fla., on July 18, 1951; In the north the cases at Goose Bay Air Force Base, Labrador on Dec. 15, 1951; at Aircraft and Warnings Station in Michigan on July 29, 1951; and at or rather in the area of Northern Michigan on Nov. 21, 1951; and the foreign sightings at Japan, on Dec. 29, 1951; and on Apr. 19, 1952; in the arctic on Sept. 26, 1951; the Tule Lake sighting on Feb. 11, 1951; the Korean area sighting on Feb. 7, 1951; and the sighting on Feb. 11, 1951. I would like to know if you have been convinced by any history teacher that they are really very much.

P.S. Mrs. I would also like to know if I could have the initials that one must sign after he has seen an "Unidentified Flying Object's". Thank you.

20 April 1953

Dear Sirs,

I would like to know without any complications in your work, if I could have the following information on these Flying Saucer sightings cases: (The Laredo Air Force Base, Tex., December, 1952) also the Uvalde, Tex. case on July 22, 1952. And the cases on the sightings at March Air Force Base, Calif., on Feb. 23, 1951 and the Hamilton Air Force Base, Calif., Aug. 3, 1952. In the south the cases or rather case at Patrick Air Force Base, Fla., on July 18, 1952. In the north the cases at Goose Bay Air Force Base, Labrador on Dec. 15, 1952 at Aircraft and Warnings Station in Michigan on July 29, 1952, and at or rather in the area of Northern Michigan on Nov. 24, 1951, and the foreign sightings at Japan on Dec. 29, 1952 and on Apr. 19, 1952. In the north on Sept. 26, 1952 at Truk Island sighting on Feb. 11, 1953. In the Korean area sighting on Feb. 7, 1953 and another sighting on Feb. 11, 1953. I am like to know if you have been convinced by my history teacher that they are real flying saucers.

P.S. Also I would also like to know if I could have the details. Since one must sign after he has seen an "Unidentified Flying Object's". Thank you.
