Dear Sirs:

You have communicated with
a Mrs. [REDACTED] here in Florence
(S.C.) concerning the report of
sighting a moving light in
the sky the night of July 7;
since she was not the right
party and had no idea whom
your communications were intended
for, she returned the bloods which

(you sent to be filled with)
yesterday she found out that
it was I who had reported
the light in the sky, so I
am writing immediately. Although
I seem to be the only person
in this city who reported it,
the editor of our Florence
Moving News, Mr. [REDACTED]
called several hours after my
report to tell me that observers
in Washington D.C., and [REDACTED],
[REDACTED] had seen the same
moving light. For the sake of
accuracy and clarification, I

1. One very bright object flying fast on the horizon heading West. Looked like a star making large sweeping circles throughout 360° of horizon. Object appeared red in color glowing brighter than the stars.

2. Object was observed visually from the surface in Florence, South Carolina, by [REDACTED], South Carolina, to [REDACTED] No information is available as to observers qualifications in this field.

3. No physical evidence of sighting is known. No interception or identification action was attempted. Air traffic in the area was Air Force Jet 466, local flight out of Shaw Air Force Base, South Carolina. This aircraft reported to Florence radio at 2120E that he had been flying tight circles at 23,000 feet in the vicinity of Florence, South Carolina. Pilot did not sight any flying object while in the vicinity.

4. Weather in the area at the time of sighting was reported:

2030E - Thin overcast at 25,000 feet, visibility 12 miles.

2130E - Thin overcast at 25,000 feet, visibility 12 miles. Winds aloft at 10,000 feet reported 260°, 15 knots.

5. Sighting was reported to Olmsted Flight Service Center by Washington Air Route Traffic Control Center 2120E 10 July 1952.

Comments of Preparing Officer:

1. The observer was not contacted by this organization.
2. It is not known whether sighting was reported to the Intelligence Officer at Shaw Air Force Base, South Carolina.

(RADAR OBSERVATION DATA SHEET

I. QUESTIONS REGARDING DETECTING RADAR EQUIPMENT

1. What type radar equipment is involved?

SCB 581

2. Has there been any recent maintenance difficulties? If so, describe.

No

3. What type modulator (i.e., spark gap, hard tube, etc.) is used in the radar equipment?

HARD TUBE

4. Was the AFC (automatic frequency control) circuit of the receiver operating properly?

YES

5. Has interference from another radar set been observed recently, and are personnel familiar with the effects caused by an interfering signal?

No INTERFERENCE

6. What type indicators, "A scope", "B scope", etc., were used to follow the target?

J SCOPES

7. What was the radar scan rate?

8. What was the approximate frequency of the transmitter?

3,000 H.C.

II. GENERAL QUESTIONS

1. What were the general weather conditions at the time unidentified target was observed?

WARM CLEAR

2. What weather data from nearby U.S. weather stations is available on temperature vs altitude, humidity vs altitude, and wind velocity vs altitude? None

3. Was the target observed by any other nearby radar equipments? If so, give details.

No

4. Are the operator and the supervisor familiar with the effects of anomalous (duct-effect) propagation as they pertain to this type radar?

YES

5. Has anomalous propagation been observed to extend the range of ground clutter by this radar at this site, and did this condition exist during or near the time that unknown target was observed? No
6. What effects of rain storms and lightning have been observed on this radar? NONE
7. Were any checks made to determine if unknown target could have been one of our own aircraft? YES
8. Was any interception attempted? If so, give details. No

III. SPECIFIC TARGET QUESTIONS

1. What technical personnel observed the unknown target? Have they been questioned thoroughly? What was their opinion? [REDACTED]
2. Was a permanent record "track" made of the target positions as they appeared on the indicators? If so, attach to this report. No
3. At what range, azimuth, altitude, and time was the target observed?
Range 10,000 - 15,000 Yds - Azimuth Various Approx 9:30 PM
Elev 29,000 Yds - Elevation 4 miles - N.E. - Approx 9:30 AM
4. How did the target appear in size and shape as compared with conventional aircraft targets? LARGER THAN NORMAL TARGETS
5. Was the target of consistent size, or did it change rapidly? Changed rapidly
6. Was the speed of the target constant or variable? Explain. TARGET REMAINED STATIONARY
7. Did the target appear "fuzzy" or clear and sharp as compared with a known aircraft target? CLEAR AND SHARP
8. What other (aircraft) targets were observed in the same general area, altitude, and time as that of the unknown target? None on same set
