AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency) Intelligence Office 140th Ftr Bde Wg	REPORT NO. TAC IR-22-52	PAGE 2 OF 2 PAGES
--	----------------------------	-------------------------

1. Captain J. W. Titus, Adjutant, Medical Group, 140th Fighter Bomber Wing, Clovis Air Force Base, Clovis, New Mexico, reported seeing two (2) oval shaped objects approximately 3 - 4 miles high and traveling east across the horizon at approximately the speed of 400 - 600 miles per hour. The objects were traveling a definite formation approximately 1 - 1 1/2 miles apart on a level course leaving no vapor trails and having no sound. Upon reaching the edge of the horizon, the objects appeared to turn 80° and head in a northerly direction. Captain Titus viewed these objects while attending a movie at a drive-in theater. He watched them approximately four (4) minutes until they disappeared. He reported they were of a reddish-orange neon glow and they "seemed to float through the air as a ball travels through water when pulled with a string". The weather was calm with very little wind and the evening was clear. No aircraft reported in the general area at the time of sighting. Approximate time of sighting was between 2130 hours and 2200 hours.

2. Enclosed article was clipped from Clovis News Journal on 22 July 1952 and refers to sighting in same drive-in theater mentioned in paragraph 1.
