SUBJECT: Transmittal of Air Intelligence Information Report

TO: Chief, Air Technical Intelligence Center
ATTENTION: ATIMA-2c
Wright-Patterson Air Force Base, Ohio

In compliance with Air Force Letter 200-5, Unidentified Flying Objects Reporting, dated 29 April 1952, the following Air Intelligence Information Report is submitted for your information.

FOR THE COMMANDING OFFICER:

1 Incl:
Air Intel Info Rpt

WILLIAM F. HARRIS
Lt. Col., USAF
Deputy for Personnel

0010385

STATEMENT

On Sunday the 31 August 1952, about the hour of 8:00 P.M., my family and I were driving from Cloudcroft to Alamogordo to attend the movie.

Just after passing through the tunnel on highway 53, which is about eight miles east of Alamogordo, my older boy said "look up there at those two bright stars". On looking up to where he was pointing, which was in the Northwest sky there were two very bright lights, which appeared to be stars of about the same brightness as the Morning Star. One appeared to be about six inches directly above the other, and was perfectly motionless.

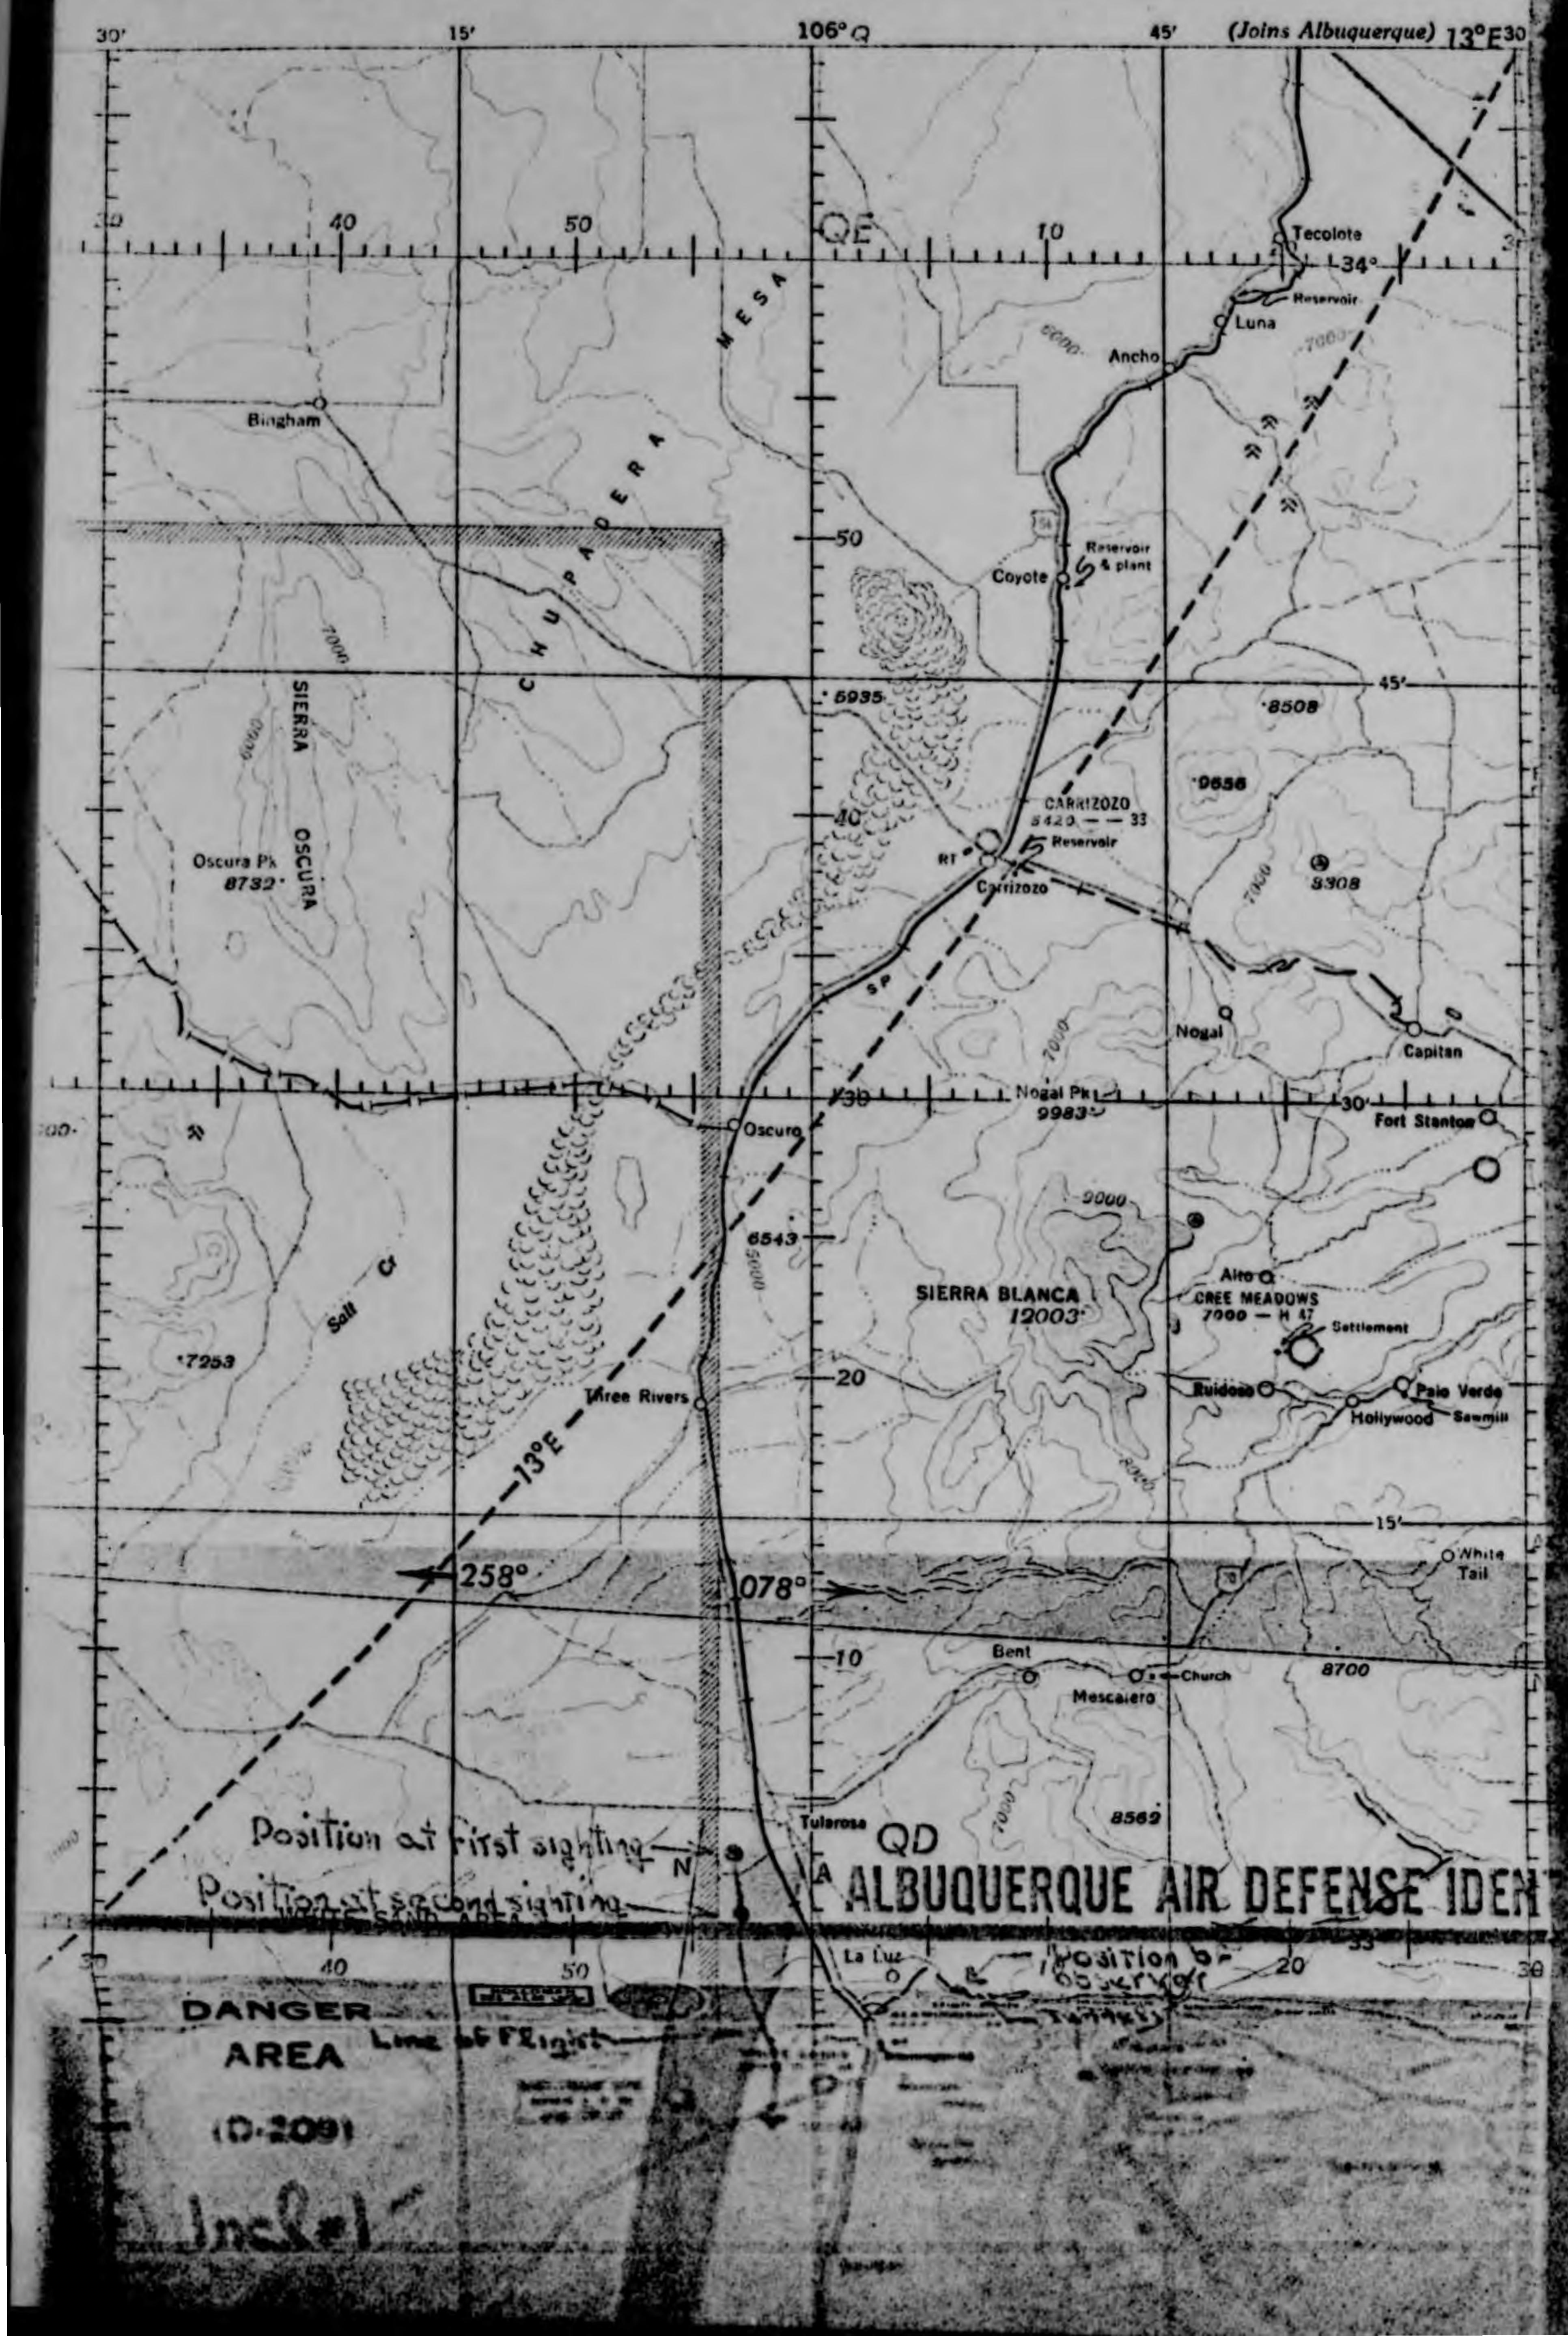

We then passed through a cut in the mountain, which obstructed them from our view. When we had passed through this cut and looked again to see them, they had disappeared.

In just a second my wife said "look there". One of the lights had descended quite a distance and was still descending. It continued to descend until it was about on eye level with us, at which time it leveled off over the valley traveling in a southerly direction. It continued on in this direction until it disappeared from our view behind a mountain. It seemed to be traveling at a much greater rate of speed than what a Jet type aircraft can travel.

We did not see what happen to the other light that was there when first discovered.

AIR INTELLIGENCE INFORMATION REPORT

SUBJECT

FLYCRYPT

AREA REPORTED ON Holloman Air Force Base, New Mexico	FROM (Agency) Intelligence Section 6540th Missile Test Sq., Holloman AFB, N. Mex.	
DATE OF REPORT 2 September, 1952	DATE OF INFORMATION 31 August, 1952	EVALUATION
PREPARED BY (Officer) 1/Sgt Paul E. Morris	SOURCE Observation reported by Mr. and Mrs.	

REFERENCES (Control number, directive, previous report, etc., as applicable)

None

SUMMARY: (Enter concise summary of report. Give significance in final one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112—Part II.)

1. Shape of both objects appeared to be similar to a large star. At first sighting there appeared to be two stars very close together. Color appeared to be same as a bright star. There were no trails or exhaust nor were there any visible signs of propulsion. When first sighted the objects were stationary at a 45 degree angle of elevation. At this point the observer went through a cut in the road and lost sight of both objects. When observation was again possible only one object was observed. This object was moving slightly downward and continued so until a point just north of Holloman, AFB had been reached at which point it leveled off and flew in a southerly direction at an altitude of about 6000 feet until it disappeared behind the mountains. Speed of object appeared to be faster than a jet could fly.) ?

2. The two objects were observed at approximately 2000 feet for a period of approximately three minutes.

3. Observation was visual and without the benefit of any optical or electronic equipment.

4. Position of observer was at 32 degrees 58'N and 105 degrees 54'W approximately one and one half ($\frac{1}{2}$) miles west of the highway tunnel. Position of objects when first sighted was at 33 degrees 03' 30"N and 106 degrees 03' W approximately two and three quarter (2 3/4) miles southwest of Tularosa, New Mexico (33 degrees 04' N and 106 degrees 01' W). At second sighting of single object sighting was at 33 degrees 01' N and 106 degrees 03' W and traveling in a southerly direction at approximately the same altitude as the observer, which according to the map, inclosure number one, is six thousand (6000) feet. Distance of object from observer was unknown.

5. Mr. [REDACTED], chief clerk at aircraft maintenance, has been working at Holloman AFB for one year and seven months.

6.

Weather at 1930 met 31 August, 1952
