BRIEF SUMMARY OF SIGHTING	11. COMMENTS	
Object was brilliant white, moving at terrific speed, and showed two red blinking lights while hovering. All movements were vertical at varying angles.	Known a/c in the area, and it was identified. Maneuvers eliminate possibility of Astro disturbances. See report of experiment performed by a USAF pilot at Guantanamo Bay, Cuba, 24 Sept 1952	

complicated and important  
problem of the "flying-  
saucer" evidence.

Sincerely,

A.E. Moore

Dear Sir:

Reference is made to your letter of 24 December 1952 to Capt E. J. Ruppelt. Unfortunately, this letter was misrouted causing some delay. The piece of material you forwarded has been analyzed and, quoting from the laboratory report, "both texturally and mineralogically the specimen bears a strong resemblance to very basic slag from an open-hearth furnace."

The specimen will be returned to you under separate cover within the next week.

Your action in forwarding this sample is appreciated.

Yours very truly,

RUBERT C. DAUGLASS  
Major, USAF  
Air Adj. Gen.

February 4, 1953

Mr. Miles E. Goll  
P. O. Box 9575  
Wright-Patterson Air Force Base  
Ohio

Attention Capt. E. J. Ruppelt

Dear Mr. Goll:

This letter concerns our examination of a sample handed to me about a month ago by Capt. McGovern. This sample appeared to be ceramic in character, and was reported to have been picked up at a location not indicated. It was requested that a determination be made as to whether it was a synthetic material or whether it was of meteoric origin. Two polished surfaces were examined in reflected polarized light and two thin sections were studied in transmitted polarized light.

Neither the texture nor the mineralogical composition of the specimen is comparable with the texture and mineralogical composition of known stony meteorites. On the other hand, this cursory examination indicates that both texturally and mineralogically the specimen bears a strong resemblance to very basic slag from an open-hearth furnace. The five principal phases in the specimen have been tentatively identified as tricalcium silicate, dicalcium silicate, calcium ferrite, ferrous oxide, and metallic iron.

It is considered that these data fulfill the requirements of the request.

Sincerely,

*Howard C. Cross*

*51 (3med)*

FLYING SAUCER OBJECT SIGHTED BY GROUND OBSERVER IN PORT LYAUTHEY AREA ON 7 AUGUST AND BY VR-24 PILOTS DURING ROUTINE NIGHT TRAINING FLIGHT ON 8 AUGUST 1952. OBJECT WAS BRILLIANT WHITE, MOVING AT TERRIFIC SPEED, AND SHOWED TWO RED BLINKING LIGHTS WHILE HOVERING. OBJECT CAPABLE OF VIOLENT MANEUVERS AND ACCCELERATION. NO CONCLUSION AS TO IDENTITY OR SIGNIFICANCE.

## Enclosures:

(1) Statement by LT C.B. GREEN, USN, Air Transport Squadron Twenty Four (VR-24) of 6 August 1952.

(2) Statement by LT D.M. DOBOS, USN (VR-24) of 7 August 1952.

(3) Sketch of Port Lyautey area by LT D.M. DOBOS.

(4) Sketch by LT D.M. DOBOS of "Flying Saucer Object".

(5) Diagram of RSD cockpit.

(6) Statement by LT W.R. POSTER, USN (VR-24) of 7 August 1952.

(7) Surface weather observations and upper air data of 6-8 August 1952.

1. Enclosures (1) through (7) are statements and drawings submitted to Intelligence Officer, U.S. Naval Air Facility, Port Lyautey, French Morocco, regarding sightings of a brilliant white serial object on the evenings of 6 and 7 August 1952 in the vicinity of Port Lyautey. The observation of this brilliantly glowing serial object was made by airborne pilots of Air Transport Squadron Twenty Four (VR-24), based at Port Lyautey, and was confirmed by observation from the airfield control tower and the ground.

2. In addition to enclosure (1) LT GREEN stated that the object sighted appeared to be "about the size of his small fingernail" and positively much larger than a star or planet.

3. LT. DOBOS amplified enclosures (2), (3) and (4) verbally by stating that he had majored in chemistry in college and that the color of the object was whiter than any white he had ever seen or thought possible. In addition he stated that the blinking

9. COMMENTS: _____					

lights were a very intense red. LT DOBBS further stated that from the position of his aircraft he could see that the object passed between Port Lyautey and Rabat (21.6 miles apart).

4. The log book of NAF tower had this aircraft off the ground at 1951 local, 7 August. A later entry stated that the object in question was observed by two tower operators to pass to the SW, turn sharply, and proceed to the SE.

5. On the night of 8 August, cameramen were stationed at NAF tower and aircraft in the area were instructed to keep a lookout for unusual objects. Results of these measures were negative.

6. Weather observations of Fleet Weather Central, Port Lyautey, both surface and upper air, for 6-8 August are forwarded (with original only) as enclosure (7). These observations show that weather for the period was generally excellent with high or unlimited ceilings and good visibility.

7. Referring to enclosures (2), (3) and (5), rough computation shows that the speed of the object must have been more than 4000 miles per hour.

I.O. Comment: The officers who sighted this "flying saucer object" are experienced in aerial observation. While bordering on the incredible, this report is submitted as the first direct observation made locally of what is generally termed to be "flying saucers". Similar reports have been noted in the recent past in local French newspapers. While the possibilities of the object being another aircraft or a "shooting star" have been ruled out, no firm conclusion has been reached as to the identification or significance of the object sighted.

-----  
STATEMENT OF LT C. B. GREEN

On the night of August 6, 1952 while standing in the squadron area of VR-24 about 2300, I saw a brilliant round white light going on a course of about 230 degrees. It left a white, smoke-like trail which lasted until after the object itself was gone. I have seen F-86's and F-94's in races and can safely say it was going far faster than any of these.

ATC 93489-A

~~SECURITY INFORMATION~~  
I.O. NAF Port Lyautey, F.M. ser 1-R-52 of 15 August 1952 (Enclosure 2)

-----  
STATEMENT OF LT D. M. DOBOS

On a routine night training flight in R5D 50865 on 7 August 1952, the following incident was observed. I was in the pilot's seat. LT Foster was in the co-pilot seat and LT Orr was standing in the aisle between us two.

After a normal takeoff from runway 030, and a climb to 5,000 feet on a heading of 270 degrees, we decided to reverse course and go to Sidi Slimane Air Force Base. On a heading of 110 degrees, LT Foster and I observed a brilliant white light traversing the right front windshield and continuing to our rear. It seemed to be at our altitude which at that time was 4500 feet. From first sighting until the object was to our rear, the time was approximately two seconds. I turned, keeping the object in sight until I was on a heading of 270 degrees. The object was flying in the same direction. As I started to climb toward it, the object climbed upward at a terrific rate of speed, first a shallow angle, then a very steep angle, continuing away from us until it was only a faint bright light. Altitude of the object at that time I estimate to be 15,000 feet. It was at the top of high scattered cirrus clouds.

During this time, LT Foster contacted Port Lyautey tower, giving our position and the object's position. At first the tower did not see the object, but when we said it was on a course of 270 degrees and definitely gave our position as slightly south of the field, he also sighted the object and kept track of it as we did. We talked to the tower stating size, brightness, speed and altitude.

After the object had almost disappeared on a heading of 270 degrees, it turned sharply across our path. I again turned toward the object, continuing my climb toward it. At this time I noticed a very bright disc center—brighter than white phosphorus—with two definite blinking red lights. The red blinking lights appeared to be on wingtips, but I could see no wings—only the bright glow of alternately blinking lights. At this time, the object seemed to hover and descend downward as I continued to climb toward it. It then started up and away from us.

I was for following the object, but LT Foster suggested that we turn away from it and continue to Sidi Slimane because it would have been impossible to catch up, due to the terrific rate of speed and acceleration characteristics.

The glow was so bright that I do not believe it could have been made by one of our jets flying at night. The tower informed us that there was another aircraft in the vicinity; however we located this other aircraft north of the field. I definitely recognized the plane, seeing its blinking red and green lights, and comparatively slow movement.

We then continued on to Sidi Slimane where we practiced GCA approaches. We returned to base at about 2325.

ATC  
93489-Q

[REDACTED]

I.O. NAF Port Lysutey, F.M. ser 1-R-52 of 15 August 1952 (Enclosure 6)

STATEMENT OF LT W. FOSTER - 7 AUGUST

At 2020 I observed a brilliant white light passing from port to starboard. I was on a heading of 110 degrees. I remarked to the other pilot who had seen the same thing. The object was travelling at an unusual speed. We turned to the heading it was traveling. Our speed was increased to approximately 130 knots. The light grew dim very rapidly. We turned to our original heading, and in making the turn we were circled by this object. At this time I noticed that two red lights were blinking very rapidly. The object then departed on a bearing of approximately 230 degrees and went out of sight very rapidly.

ALVIN EDWARD MOORE  
COMMANDER  
UNITED STATES NAVAL RESERVE

"Pinemoor", Lotte One,  
Vienna, Virginia

24 December 1952.

Captain Edward J. Ruppelt, USAF,  
Air Technical Intelligence Center,  
Wright-Patterson Air Force Base,  
Dayton, Ohio.

My dear Captain Ruppelt:

On 13 August 1952 I  
forwarded you (and the Air  
Force) my eight-page memo-  
randum dated 8 August  
1952 about "The discovery  
and preliminary investigation  
of a stone-like object, which  
apparently fell from the air  
(Over)

near Washington, D.C. I'd  
enclosed a brief report to  
me, by a U.S. Forester. On  
that site I also mailed you  
under separate cover and  
by insured mail, the  
subject stone-like object.

I have received no acknowledgement  
of receipt of any  
of these things from you or  
the Air Force.

In my paragraph 24,  
I suggested among other  
things, "That the object not be  
greatly mutilated during  
the tests, that it be held on  
file in your charge for a few  
months, so possible compari-  
son with other such".

3

ALVIN EDWARD MOORE  
COMMANDER  
UNITED STATES NAVAL RESERVE

objects that might be discovered, and then returned to me, so that I may return it to the man from whom I received it".

I would appreciate it, Captain Ruppelt, if you would check your files about this matter, and kindly return the object to me.

With best wishes at this holiday season - both for you personally and for your work on the very
