23. In the following sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you last saw it.

24. Draw a picture that will show the motion that the object made. Place an "A" at the beginning of its path and a "B" at the end of its path.

a very definite
vibration
or excessive
vibration
could be
plainly seen

Its definite shape
was obscured by its quiver -
but its shape while quivering was as above

25. Draw a picture that will show the shape of the object. Label and include in your sketch any details of the object that you saw and place an arrow beside the drawing to show the direction the object was moving.

No details - no fuselage; propellers
or protrusions of any kind - but
a hum that sounded like a large
electric motor that was switched on - but would
not go - maybe slightly louder than that

Use additional sheets of the same size paper, if necessary.

We have an observer station here.

"listen for planes - then report them
to Helena, Mont.

We heard this hum on a quiet Sun-
day morning.

We looked east & west to see
what type of plane was approaching
but it never came into view.

Then we looked North & South
and it was only a mile South of
our position that we observed this
thing. I was very careful to observe
it as truthfully as I could.

I was impressed mostly by its low &
seemingly powerful, smooth hum.

I mentioned to my wife "Listen to that
hum - that things got power" Its
