**STATEMENT OF
MRS. FRANK CODI**

24 September 1952

About 10:00 P.M. on September 23, 1952, while I was in the bedroom, I noticed five (5) bluish grey lights moving slowly across the sky. My first impression was that it was a helicopter because of the way it was flying. I soon realized it wasn't and went outside to see what it was. I watched the lights slowly pass overhead and disappear behind the trees. As the lights passed overhead I heard a soft whoosh sound. The sound was not the sound of a jet airplane. I watched the lights for approximately three (3) minutes. The objects appeared out of the South and disappeared in the Northeast. They moved in a straight line, but I could not say what the exact height was. I had the impression that there was a grey background to the lights. The lights were arranged in an indefinite pattern and appeared as in the following diagram.

A few minutes later a small airplane flew over. The lights in relation to the small airplane were lower, flew slower, and did not bear any resemblance to the lights of the small airplane. The size of the group of lights was slightly bigger than the small airplane.

Chickasaw, Alabama

AIR INTELLIGENCE INFORMATION REPORT

FROM (Agency)	REPORT NO.	PAGE	OF	PAGES
Intelligence Officer Brookley Air Force Base, Alabama				

Details: At approximately 1000 hrs, the Base Operations Officer at Brookley Air Force Base, Alabama, received a telephone call from a Mrs. [REDACTED] Chickasaw, Alabama. Mrs. [REDACTED] reported seeing a group of five (5) lights, bluish-grey in color at about 2200 hours, 23 September 1952. Base Operations notified the Air Provost Marshal who in turn notified the Intelligence and Briefing Officer, 1703rd Air Transport Group, MATS.

In company with the Intelligence Officer, 1703rd Transport Group, the Asst. Intelligence Officer, MOAMA, conducted an investigation.

A statement was obtained from Mrs. [REDACTED] (Inclosure #1). All airports in the vicinity were checked for the possibility that the lights were airplanes. The only aircraft in the vicinity were a C-54 which departed from Brookley Air Force Base at 2122 hrs., a C-46 which departed from Brookley Air Force Base at 2324, and a C-74 which departed from Brookley Air Force Base at 2203 hours. The small light airplane which Mrs. [REDACTED] has not been identified. The reliability and experience of the observer made it highly improbable that the lights were aircraft. The C-74 would have been at 3,000 to 4,000 feet, and therefore, could not have been the objects which the observer saw. The observer had a definite impression that there was a greyish background to the lights, although no details could be seen. The sound was similar to a small airplane gliding, but definitely not the sound of jet aircraft. The weather and winds aloft (Inclosure #2) which were approximately opposite to the direction of flight of the objects, eliminates the possibility that the objects were weather balloons.

The lighted objects were sighted at latitude $30^{\circ} 46' N$, longitude $88^{\circ} 03.5' W$. The true course was approximately 45°, altitude approximately 2,000 feet. The speed could not be judged, but appeared to be slower than a small airplane (75 mph). Several other persons in the area were questioned, but no other sightings were reported.

The reliability of the observer is evaluated as excellent. Mrs. [REDACTED] has enough experience to distinguish between light aircraft, jets, and heavy transports.

Since the report was not received until twelve (12) hours after observation, interception was not attempted.

SUBJECT: FLIGERPP (Unclassified)

TO: Commander, Continental Division
Military Air Transport Service
ATTN: Intelligence Officer
Kelly Air Force Base, Texas

1. The following report is submitted in compliance with the provisions of paragraph 7, Air Force Letter 200-5, dated 29 April 1952.

2. At approximately 1000 hours the Base Operations Officer at Brookley Air Force Base, Alabama, received a telephone call from a Mrs. ██████████ Chickasaw, Alabama. Mrs. ██████████ reported seeing a group of five (5) lights, bluish-grey in color at about 2200 hours, 23 September 1952. Base Operations notified the Air Provost Marshal who in turn notified the Intelligence and Briefing Officer, 1703rd Air Transport Group.

3. In company with the Assistant Intelligence Officer, MOANA, Lieutenant Elliott and the Intelligence Officer, 1703rd Air Transport Group, conducted an investigation.

4. A statement was obtained from Mrs. ██████████ (Inclosure #1). All airports in the vicinity were checked for the possibility that the lights were aircraft. The only aircraft in the vicinity were a C-54 which departed from Brookley Air Force Base at 2122 hours, a C-46 which departed from Brookley Air Force Base at 2324, and a C-74 which departed from Brookley Air Force Base at 2203 hours. The small light airplane which Mrs. ██████████ has not been identified. The reliability and experience of the observer made it highly improbable that the lights were aircraft. The C-74 would have been at 3,000 to 4,000 feet, and therefore, could not have been the objects which the observer saw. The observer had a definite impression that there was a greyish background to the lights, although no details could be seen. The sound was similar to a small airplane gliding, but definitely not the sound of jet aircraft. The weather and winds aloft (Inclosure #2) which were approximately opposite to the direction of flight of the objects, eliminates the possibility that the objects were weather balloons.

LIGHT SIGNAL PROCEDURES FOR AIRPORT TRAFFIC CONTROL

The following procedures are used by airport traffic control towers to the extent of their equipment and radio. These same procedures will be used by mobile aircraft equipment when radio or other methods cannot be used.

Note: It is recommended that mobile radio equipment be used in preference to light signals for direction.

Airport traffic control personnel use a directive traffic control signal (either red, white, or green) when controlling traffic by light signals. The normal range of the signal day and night is fifteen miles in day time and fifteen miles at night and is readily discernible to the pilot of any aircraft in visibility conditions.

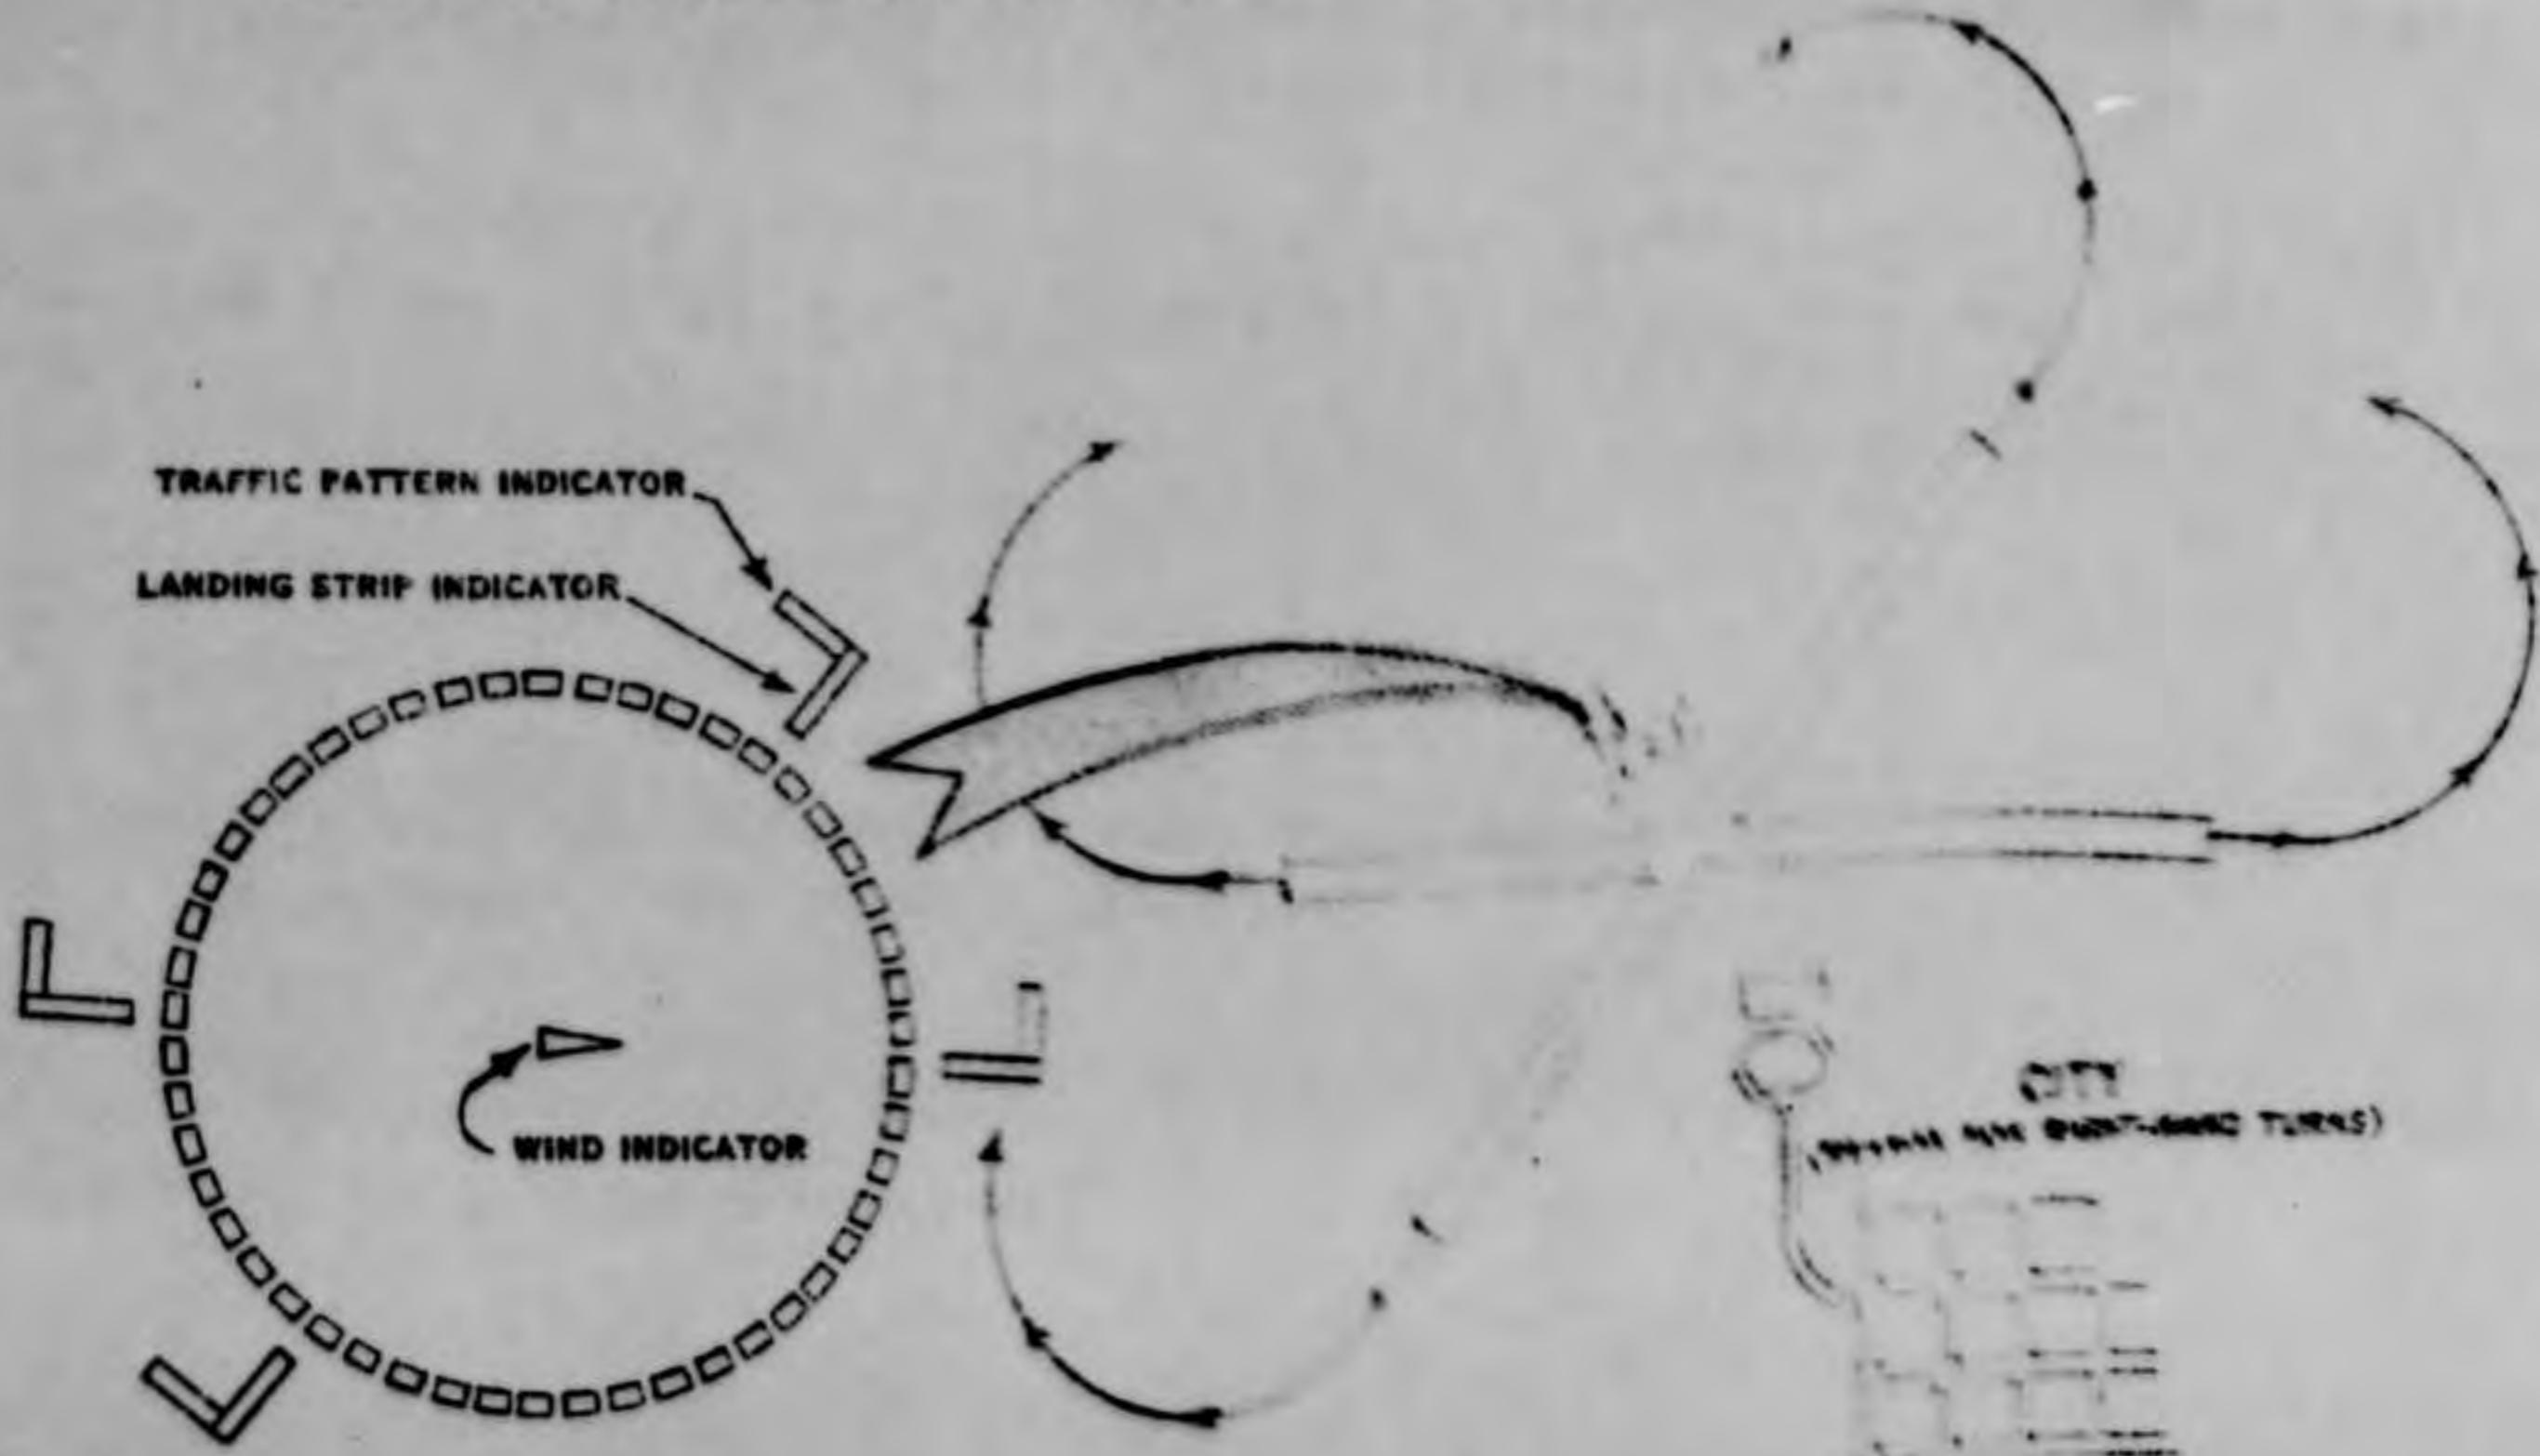

Although the traffic signal light offers the advantage that some control may be exercised over unradio equipped aircraft, all pilots should be cognizant of the disadvantages which are:

1. The pilot may not be looking at the control tower at the time a signal is directed toward him.
2. The directions transmitted by a light signal are very limited since only approval or disapproval of a pilot's anticipated actions may be transmitted. No supplementary or explanatory information may be transmitted except by the use of the "General Warning Signal" which advises the pilot to be on the alert.

Signals from a portable traffic control light shall mean the following:

Color and Type of Signal	On the Ground	In Flight
STEADY GREEN	Cleared for take-off	cleared to land
FLASHING GREEN	Cleared to taxi	return for landing (to be followed by steady green at proper time)
STEADY RED	Stop	line up to other aircraft and continue circling
FLASHING RED	Taxi clear of landing area (runway in use)	airport unsafe-do not land
FLASHING WHITE	Return to starting point	Extreme Caution
ALTERNATING RED & GREEN	General Warning Signal	

TRAFFIC PATTERN INDICATED BY SEGMENTED CIRCLE

Safe flying requires that a pilot know the traffic pattern for the airport. When landing or taking off, the segmented circle marker, illustrated above, furnishes the pilot this information. When both markers indicators are used with the circle marker, they tell the pilot to make his turn in the direction in which the indicators point. If the traffic pattern indicators are not used, the pilot will know that the turns are to be made must be followed. For additional information see TSO-N-5, copies of which are available from the Aircraft Division, Department A-258, C.A.A., Department of Commerce, Washington 25, D.C.

J. M. PENNY, Major, USAF

TMK Fr: 1703rd ATG, DTG 250326Z

Submitted in accordance with AF Ltr No. 200-5, dated 20 April 1952, Sub: Unidentified Flying Objects Reporting.

At approximately 2200 CDT, 23 September 1952, an unidentified flying object was observed visually for three minutes by a civilian from surface position at Chickasaw, Alabama, $30^{\circ} 46' N - 88^{\circ} 03' 30'' W$ at an estimated altitude of approximately 2000; traveling from southerly direction on a true course of approximately 45° ; speed estimated about 75 MPH.

Object appeared as five (5) steady bluish-gray lights arranged in an unidentified pattern covering an area slightly larger than a small airplane. As object passed overhead, it emitted a soft "whoosh" sound - unlike sound of jet aircraft. Observer had impression there was a gray background surrounding lights.

Airborne aircraft in vicinity:

C-46 departed Brookley AFB 2122 hours.

C-74 departed Brookley AFB 2203 hours.

Unidentified small a/c passed over observer a few minutes after unidentified objects disappeared.

Weather: 2130 - clear, 7 miles visibility, 74° temperature, dew point 55° , winds NNE at 16 MPH. 2230 - scattered at 10,000 ft, 7 miles visibility, 72° temperature, dew point - 55° , wind - NNE at 11 MPH. Winds aloft: (1) 2000 ft - $80^{\circ} \pm 25$ knots; (2) 4000 ft - $90^{\circ} \pm 25$ knots; (3) 6000 ft - $80^{\circ} \pm 12$ knots; (4) 2000 ft - $90^{\circ} \pm 12$ knots.

FLYOBRPT AT APPROXIMATELY 2200 CDT AN OBSERVER LOCATED AT 38
DEGREE 03.5 MINS. WEST 30 DEGREE 46 MINS NORTH VISUALLY OBSERVED
FIVE STEADY BLUISH LIGHTS SHAPED LIKE FLATTENED ELLIPSES AND GROUPED
ROUGHLY ELLIPTICAL. THE OBJECTS WERE TRAVELING A STRAIGHT TRUE COURSE
OF 45 DEGREE AT A SLOW SPEED. A SOFT WHOOSH SOUND WAS HEARD WHEN
THE OBJECTS PASSED DIRECTLY OVER THE OBSERVER. THE OBJECTS DISAPPEARED
BEHIND A TREE AFTER BEING SEEN FOR APPROXIMATELY 3 MINUTES APPROXIMATELY
5 MINUTES LATER A SMALL LIGHT AIRPLANE AT 2500 FEET ALTITUDE PASSED
OVER THE OBSERVER. IN RELATION TO THE LIGHT AIRPLANE THE OBJECT
MOVED SLOWER AT A LOWER ALTITUDE AND BORE NO RESEMBLANCE TO THE LIGHTS
OF THE LIGHT AIRPLANE. THE GROUP OF LIGHTS OF THE OBJECT APPEARED
ROGGER THAN THE LIGHT PLANE. OBSERVER EVALUATED AS RELIABLE AND
HAS ENOUGH EXPERIENCE TO DIFFERENTIATE BETWEEN JET AIRCRAFT HEAVY
TRANSPORT AND LIGHT AIRPLANES SUCH AS TAYLORCRAFT. WEATHER AT 2130
CLEAR 7 MILE VISIBILITY 74 DEGREE TEMP 55 DEGREE DEWPOINT SURFACE

25. Draw a picture that will show the shape of the object. Label and include in your sketch any details of the object that you saw, and place an arrow beside the drawing to show the direction the object was moving.

SECTION E

26. Was this the first time that you have seen an object like this?
(Circle One): Yes No

26.1 If you answered NO, then when, where, and under what conditions did you see other ones? _____

27. In your opinion what do you think the object was and what might have caused it?

Observer does not know, but one inspiring

28. Give the following information about yourself:

NAME _____

Middle Name _____

Suffix Name _____

Initial N. _____

ADDRESS _____

Street _____

City _____

Zone _____

State _____

TELEPHONE NUMBER _____

What is your present job?

International Correspondence Schools
(Registration)

Age 33

Sex Male

Last School Attended Alfred M. Cornell Jr. - '35

Year of last attendance at this school

Taught December physics now not taught

29. Was anyone else with you at the time you saw the object?

(Circle One): Yes or No

29.1 IF you answered YES, did they see the object too?

(Circle One): Yes or No

29.2 Please list their names and addresses:

* 30. Please add here any further comments which you believe are important.
Use additional sheets of the same size paper if necessary.

It is to be noted that the undersigned is acting as liaison between the two individuals who saw the object and your office. At the present moment the two gentlemen who saw the object prefer not to give their names. However, they have told me that they will do so if you report back that it is essential for the authentication of this report.

I would like to add this comment, however, that I am very well acquainted with the older of the two men reporting and I also know of the younger man. The older man is my next door neighbor and I have known him for approximately thirty years. I can vouch for the fact that of all the individuals in our community who might observe such an object he is the best qualified to give a report on such an object.

Walter R. Redmond

Walter R. Redmond, Chairman
Corning Astronomy Club

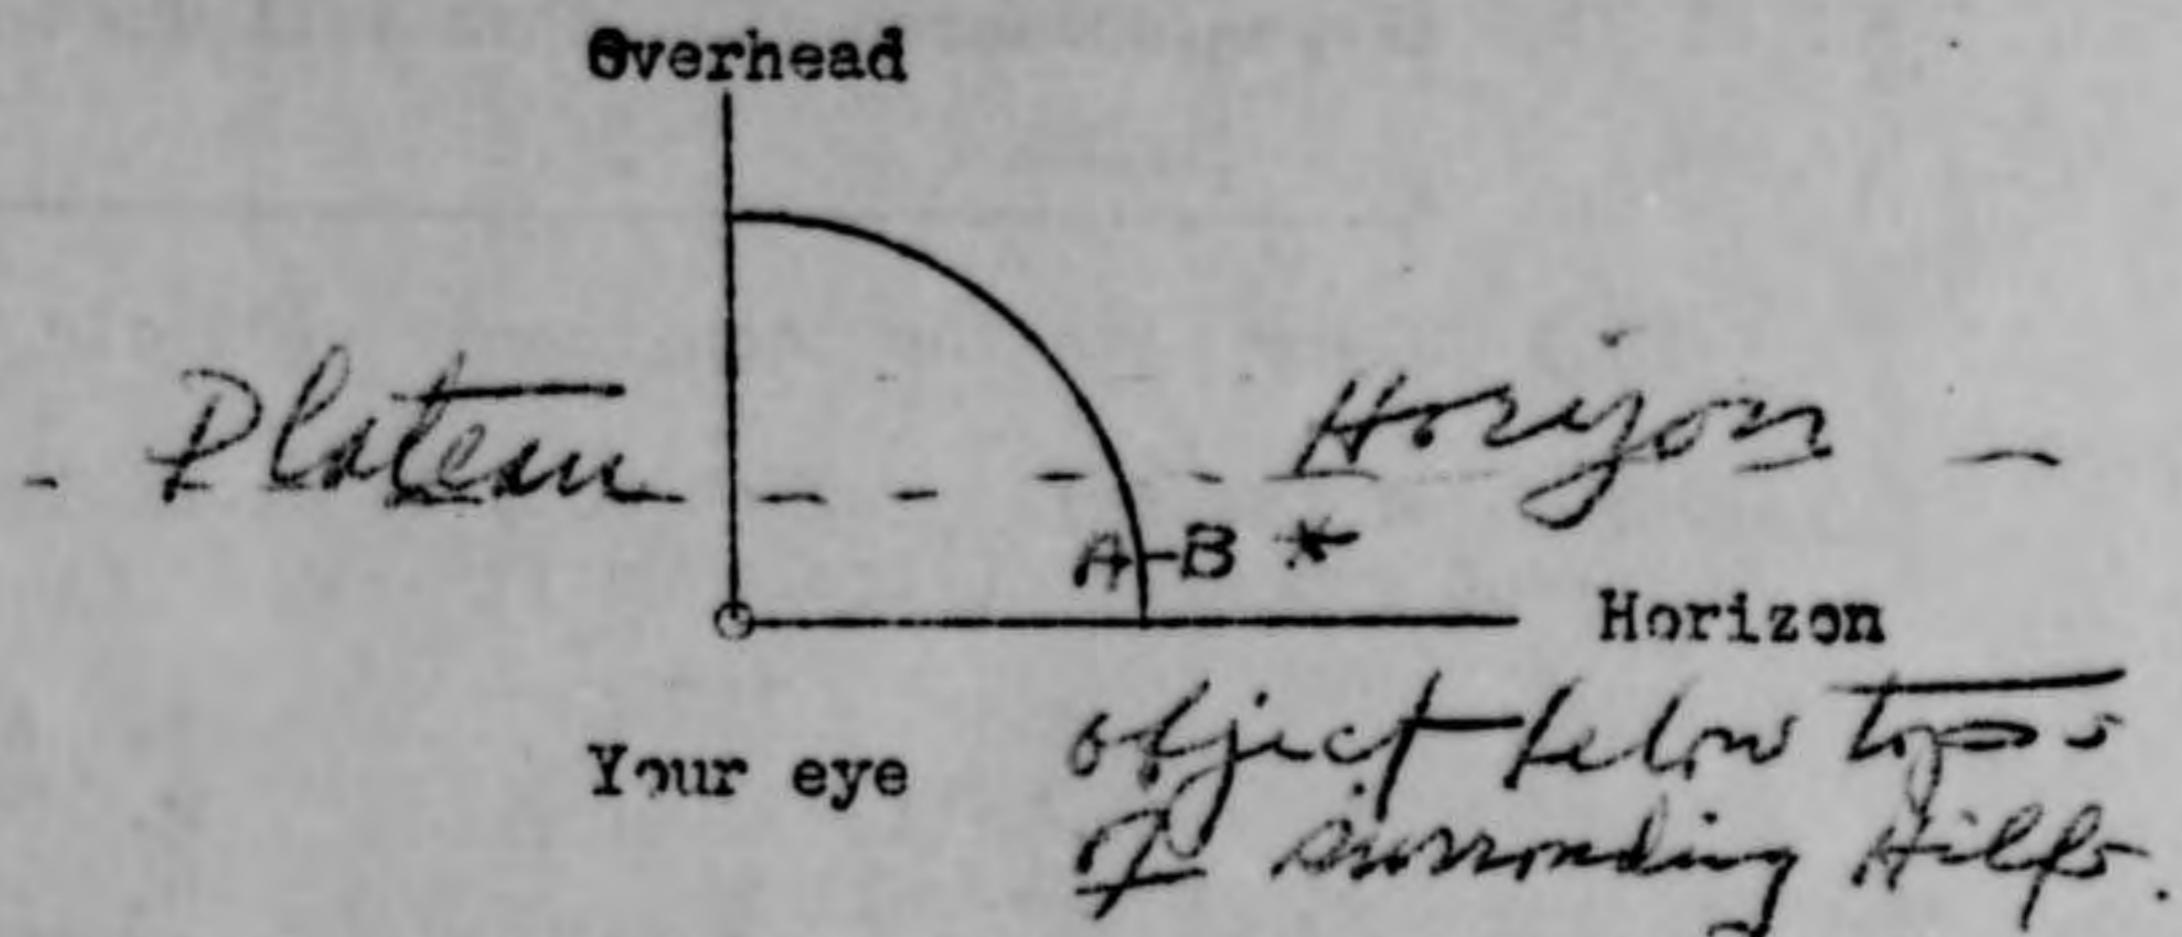

typed by Pauline Johnston

P.S. We would be glad to receive another questionnaire inasmuch as one of the members of our Corning Astronomy Club can give a personal report of an unidentified celestial object seen in this area October 22nd.

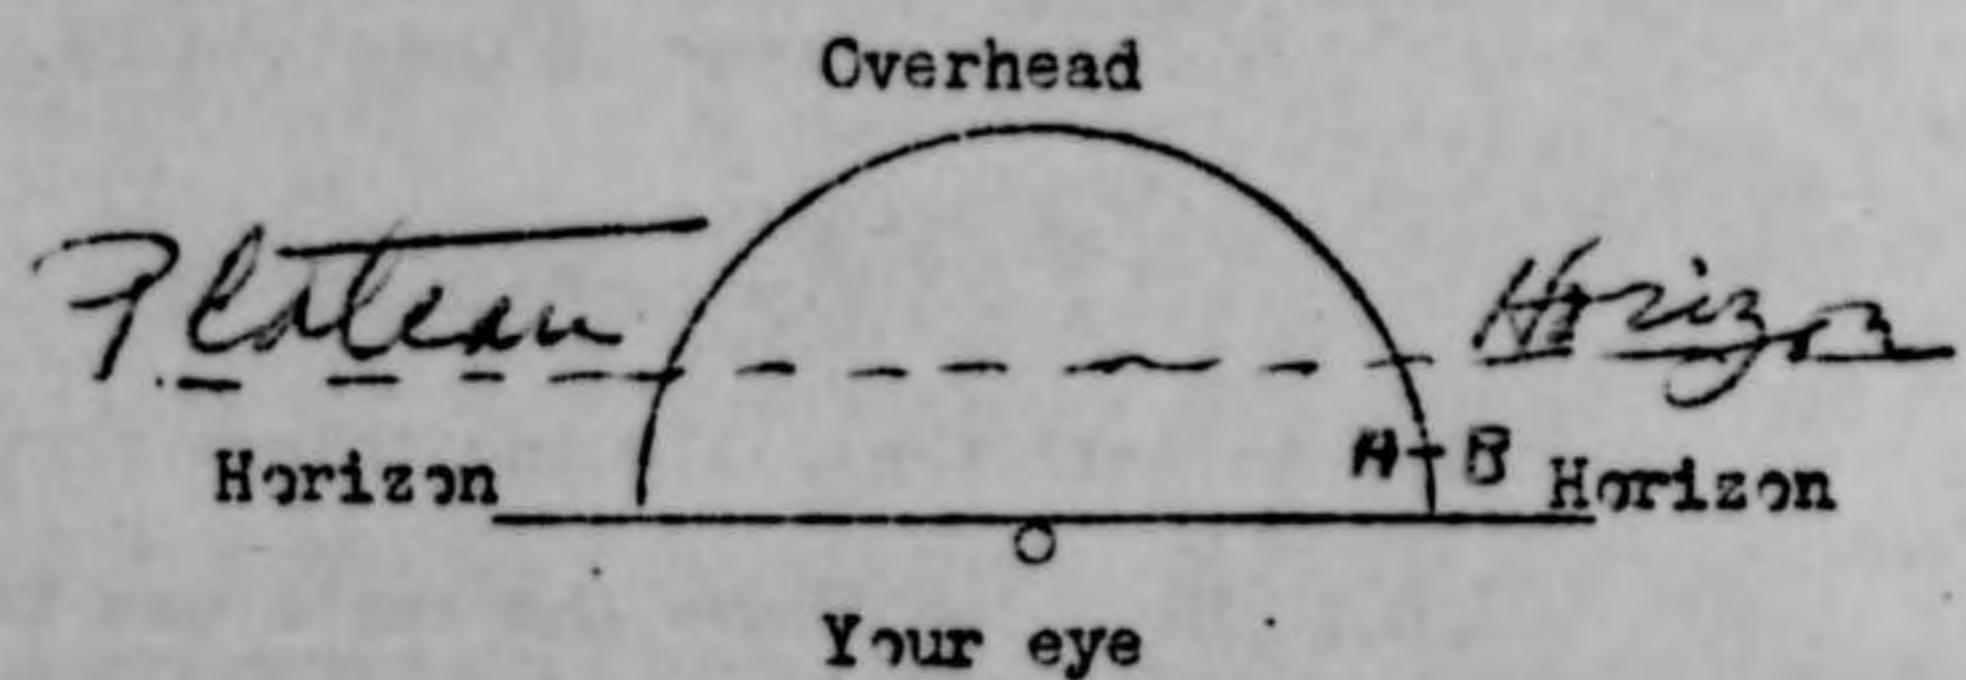

W. R. R.

SECTION D

22. In the following sketch, imagine your eye at the point shown. Place an "A" on the curved line to show how high the object was above the horizon when you first saw it. Place a "B" to show where it was when you last saw it.

23. In the following sketch place an "A" at the position the object was when you first saw it, and a "B" at its position when you last saw it.

24. Draw a picture that will show the motion that the object made. Place an "A" at the beginning of its path and a "B" at the end of its path.

no motion

18. Did the object at any time:

18.1 Move behind something? (Circle One) Yes No Don't know

IF you answered YES, then tell what it moved behind.

18.2 Move in front of something? (Circle One) Yes No Don't know

IF you answered YES, then tell what it moved in front of.

18.3 Blend with the background? (Circle One) Yes No Don't know

19. Which of the following objects is about the same actual size as the object you saw? (Circle One):

- | | |
|------------------|----------------------------------|
| a. Pen | f. Automobile |
| b. Baseball | g. Small airplane |
| c. Basketball | h. Large airplane |
| d. Bicycle wheel | i. <u>Dirigible</u> <u>small</u> |
| e. Office desk | j. Other _____ |

19.1 Circle one of the following to indicate how certain you are of your answer to Question 19.

- | | |
|-------------------|------------------|
| a. Certain | c. Not very sure |
| b. Fairly certain | d. Uncertain |

20. Try to tell the following things about the object:

20.1 How high above the earth was it? 300-300 feet. *

20.2 How far was it from you? _____ feet or 5 miles

20.3 How fast was it going? 720 miles per hour.

20.4 Circle one of the following to indicate how certain you are of your answer to the above questions:

- | | |
|-------------------|------------------|
| a. Certain | c. Not very sure |
| b. Fairly certain | d. Just a guess |

21. How did the object disappear from view?

(Circle One): a. Suddenly c. Other _____
b. Gradually d. Don't remember

(approx 15")

* original report indicated 3 miles distant - survey
indicates the above figure

SECTION C

12. Estimate how long you saw the object? _____
21 sec) _____
 Hours Minutes Seconds

12.1 Circle one of the following to indicate how certain you are of your answer to Question 12:

- | | |
|---|------------------|
| a. Certain | c. Not very sure |
| <input checked="" type="radio"/> b. Fairly sure | d. Just a guess |

13. Did the object look: (Circle One) Solid or Transparent?

14. Did the object at any time:

(Circle One for each question)

14.1 Change direction?	<u>Yes</u>	<input type="radio"/> No	<u>Don't know</u>
14.2 Change speed?	<u>Yes</u>	<input type="radio"/> No	<u>Don't know</u>
14.3 Change size?	<u>Yes</u>	<input type="radio"/> No	<u>Don't know</u>
14.4 Change color?	<u>Yes</u>	<input type="radio"/> No	<u>Don't know</u>
14.5 Break up into parts or explode?	<u>Yes</u>	<input type="radio"/> No	<u>Don't know</u>
14.6 Give off smoke?	<u>Yes</u>	<input type="radio"/> No	<u>Don't know</u>
14.7 Change brightness?	<u>Yes</u>	<input type="radio"/> No	<u>Don't know</u>
14.8 Flicker, throb, or pulsate?	<u>Yes</u>	<input type="radio"/> No	<u>Don't know</u>
14.9 Remain motionless?	<u>Yes</u>	<input type="radio"/> No	<u>Don't know</u>

15. Did the object give off a light? (Circle One): Yes No Don't know (slight glow)

15.1 If you answered YES, what was the color of the light? Finely Range

16. Tell in a few words the following things about the object?

16.1 Sound Sss

16.2 Color Finely Range

17. If there was MORE THAN ONE object, then how many were there? _____
 Draw a picture of how they were arranged, and put an arrow to show the direction they were traveling.

8. What direction were you facing when you first saw the object?

(Circle One):

- a. North
- b. Northeast
- c. East
- d. Southeast
- e. South
- f. Southwest
- g. West
- h. Northwest

8.1 What direction were you facing when the object disappeared?

3.2 Circle one of the following to indicate how certain you are of your answer to the above two questions. (3 and 8.1).

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

9. Were you wearing eye glasses when you saw the object? (Circle One):

Yes or No

10. How was the object seen?

(Circle One):

- a. Through window glass
- b. Through windshield
- c. Through binoculars
- d. Through telescope
- e. Through theodolite
- f. Through sun glasses
- g. Through open space
- h. Other _____

11. What do you remember about the weather conditions at the time you saw the object?

11.1 CLOUDS (Circle One)

11.3 WEATHER (Circle One)

*
a. Clear sky
b. Hazy
c. Scattered clouds
d. Thick or heavy clouds
e. Don't remember

- a. Dry
- b. Fog, Mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

11.2 WIND (Circle One)

11.4 TEMPERATURE (Circle One)

- a. No wind
- b. Slight breeze
- c. Strong wind
- d. Don't remember

- a. Cold
- b. Cool
- c. Warm
- d. Hot
- e. Don't remember

* Except large circular cloudburst above and
near object.

4. How did you happen to notice the object? Two men working,
one of men called other's attention to
object.

5. When did you report to some official that you had seen the object? *

Day _____ Month _____ Year _____

* See Note at end.

SECTION B

6. What were you doing at the time you saw the object?

Just leaving work - putting house

6.1 What had you been doing for the 30 minutes before you saw the object? Try to list the activity or activities, and the approximate amount of time spent on each.

Carpenter work on house

7. Were you moving at any time while you saw the object? (Circle One):

Yes or No.

IF you answered YES, then complete the following questions.

7.1 What direction were you moving?

- (Circle One): a. North e. South
 b. Northeast f. Southwest
 c. East g. West
 d. Southeast h. Northwest

7.2 How fast were you moving? 0 miles per hour.

7.3 Did you stop at any time while you were looking at the object?

(Circle One): Yes or No

**TENTATIVE
CENSUS OBSERVERS QUESTIONNAIRE**

-4789.00

SECTION A

1. When did you see the object:

1.1 Date: 8/3/52 Sept 1952
Day Month Year

1.2 Time of day: 7:45
Hrs. _____ Min. _____ A.M. or P.M. (Circle One)

1.3 Time Zone: (Circle One):

(Circle One): a. Daylight Saving
 b. Standard

1.4 Circle one of the following to indicate how certain you are of your answer to the above question 1.2:

2. Where did you see the object?

A black and white photograph of a dark, rectangular object, possibly a book or a folder, resting on a light-colored surface. The object has a textured cover and is positioned centrally within a circular frame.

City or Town State U.S.A.

City or Town State Country

3. Where were you located when you saw the object?

3.1 Were you:

(Circle One):

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Flying near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

IV. BALLOON DATA

21. WERE BALLOONS RELEASED IN AREA?			<input type="checkbox"/> Yes	<input type="checkbox"/> No		
22. TIME SINCE SCHEDULED BALLOON RELEASE:			<u>05</u> Minutes			
23. POSSIBLE BALLOON LAUNCH SITES DOWNWIND OF SIGHTING:						
a.	Location	Type	Launching Agency		Lighted? Yes No	Describe Lighting
			US D.A.			
b.						
c.						
d.

AIR INTELLIGENCE INFORMATION REPORT		
SUBJECT Unidentified Flying Objects Report (FLYOBRPT)		
AREA REPORTED ON Newfoundland	FROM (Agency) Dir/Int, NEAC	<i>unlt</i>
DATE OF REPORT 1 October 1952	DATE OF INFORMATION 23 September 1952	EVALUATION F-O
PREPARED BY (Officer) TRUETT V. CANTRELL, Major, USAF	SOURCE Group Intelligence, Pepperrell AFB	
REFERENCES (Case number, directive, previous report, etc., as applicable)		

SUMMARY: (Enter concise summary of report. Give significance in final one sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112-Part II.)

1. The following information was reported to the Director of Intelligence, Hq., NEAC, and is of interest to the Air Technical Intelligence Center, Wright-Patterson Air Force Base, Dayton, Ohio.

2. The Operations Officer, Pepperrell Air Force Base, Newfoundland, Major [redacted] made the following report on an unidentified flying object:

"On the 23 of September, while camping on the north shore of Gander Lake, Newfoundland, Major [redacted] observed a very bright white light moving over the hills on the south shore of Gander Lake. The object moved from west to east, in the general direction of Gander Airport, a distance of 25 miles. It was moving rather slowly, at a speed estimated at not over 100 mph. A reflection of the light was visible on the calm surface of the lake. The object was not higher than an altitude of 2000 feet above the low range of hills. The night air was calm, and any noise could be heard for great distances. At the time the object was sighted no sound was heard. Aircraft arriving and departing Gander Airport were plainly audible. The light disappeared after descending to approximately 500 feet above the hills in the general direction of Gander Airport. The total observed time was between 8 and 10 minutes. The weather was CAVU. There were seven other people in the camp who observed this object".
