TMX MOD 255A, dated 30 OCTOBER 1952

SUMMARY: (Enter concise summary of report. Give significance in first one-sentence paragraph. List inclosures at lower left. Begin text of report on AF Form 112 - Part II.)

1. The following information pertaining to the sighting of an unidentified flying object near Erding Air Depot, Erding, Germany (4818N/1156E) is a follow up report on Restricted TMX MOD 255A this station, dated 30 October 1952. Information is based on visual observations of S/Sgt [REDACTED] and A/20 [REDACTED] Headquarters Squadron Section, 85th Air Base Group, Depot, Erding Air Depot, Germany.

a. At approximately 0750 hours local time (Central European) on Wednesday 29 October 1952, S/Sgt [REDACTED] and A/20 [REDACTED] were walking to their place of work at Wing Headquarters building. They were walking from building 121 toward the bowling alley which is in a westerly direction (see Inclosure #3). This specific area is located on a hill with no trees or buildings obstructing view of observers.

b. Upon looking into the sky S/Sgt [REDACTED] sighted an unidentifiable object in the western sky and immediately pointed it out to A/20 [REDACTED]. This object appeared to be silver in color, circular in shape, and traveling away from observers in a gliding fashion at a speed estimated to be 400 MPH. SOURCES estimated the height of the object at approximately 7,000 feet. Object was in view for approximately twenty (20) to thirty (30) seconds.

c. SOURCES stated that at no time did they hear any sound or observe any train or exhaust connected with object.

d. A check by this office with the Operations Officer on duty at the Radar Site at time of observation met with a negative result.

e. No air traffic was in the general area at the time of sighting according to Flight Service Records.

f. Weather conditions at time of sighting were as follows: Winds at 5,000 feet were 260 degrees at twenty (20) knots with temperature at plus eight (8) degrees centigrade, relative humidity 72%; winds at 10,000 feet were 250 degrees at forty-four (44) knots with temperature minus two (2) degrees centigrade, relative humidity 67%; winds at 15,000 feet were 240 degrees at fifty-seven (57) knots with temperature minus nine (9) degrees centigrade, relative humidity 35%. Overcast at 10,000 feet with visibility of seven (7) miles.

According to the Weather Office this station, observing conditions were good.

STATEMENT

At approximately 0750 hours on the morning of October 29, at which time I was leaving building #121 walking due west toward the Erding Bowling Alley accompanied by A/2C [REDACTED], I sighted what appeared to be an unidentified flying object in the sky. Immediately I asked airman Handy "what is that in the sky", while pointing at the object at the same time. At first glance, skeptically, he replied "it might be a plane", but then admitted it definitely was not a conventional aircraft, after taking a more serious look.

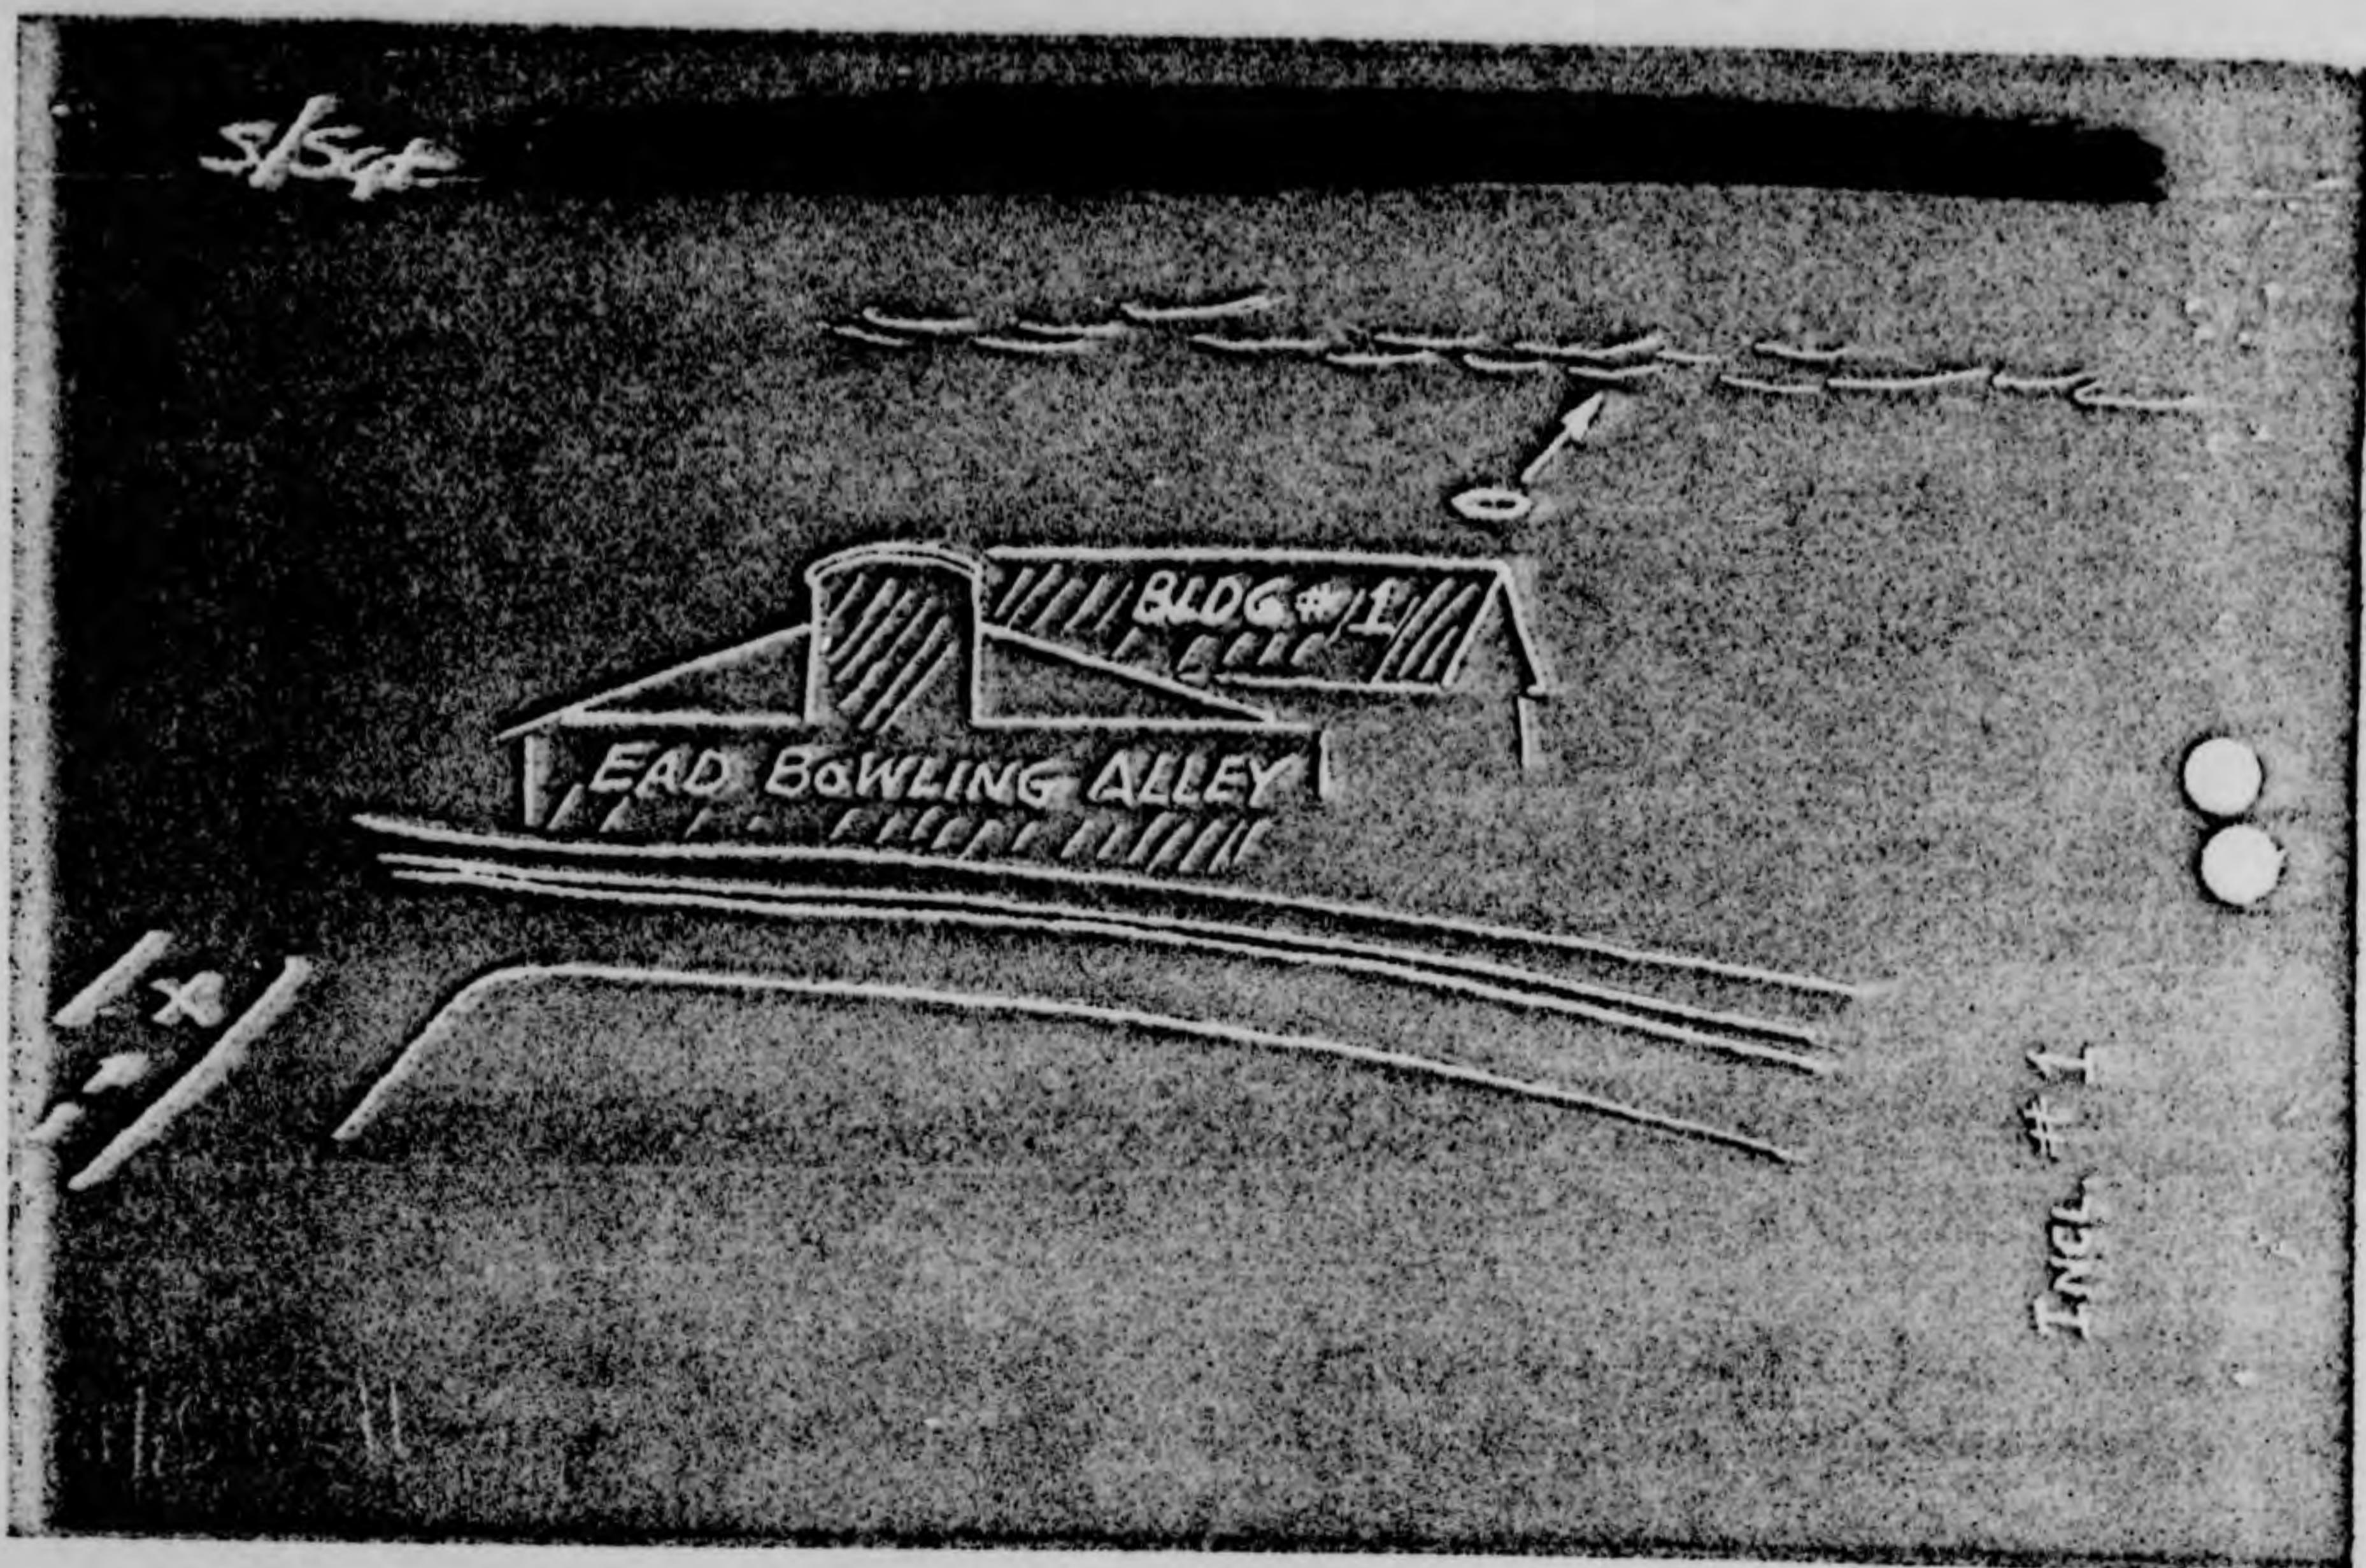

This object was in sight approximately 20 seconds until it disappeared from our immediate view, behind the bowling alley. It seemed to be traveling at a speed estimated at approximately 400 MPH, heading West North West on a level course, and estimated at approximately 25 degrees from the horizon. No sound was heard at any time. It was a partially cloudy morning with good visibility beneath the cloud formations where the object was sighted.

The object seemed to slide or glide smoothly through the air at constant speed. I could not distinguish any wings or tail on the object and it seemed to be round in shape. I could not distinguish any definite color as the object was silhouetted against the cloud background.

Erding, Germany  
29 October 1952

S T A T E M E N T

At approximately 0750 hours on the 29th of October, while walking West toward the Erding Bowling Alley accompanied by S/Sgt [REDACTED] I sighted what appeared to be an unidentified flying object in the sky. My attention was called to this object by S/Sgt [REDACTED] asking "what is that in the sky"? I replied "it looks like a plane". Then I changed my mind on a further glance and said "it isn't any conventional type aircraft".

This object was in sight for approximately 20 to 30 seconds and then disappeared from our view behind the bowling alley. Its speed exceeded that of a conventional type aircraft. It was flying on a West North West course and maintained a level altitude. It appeared to be at approximately 25 degrees from the horizon. It seemed to glide through the air at a constant speed. I could not distinguish any wings or propellers. It appeared round in shape. It seemed to have a silvery color.

At no time during the sighting was any sound heard.
