1st Lieutenant Robt. Olsson  
Wright-Patterson Air Force Base

Dear First Lieutenant:

Thank you for your letter and comments. I too think that we are getting someplace. This system of weekly reporting and comments--AND FOLLOW UP---gives continuity. With your aid I should like to make a collection of the truly unknown cases with their follow ups so that a true scientific evaluation can someday be made. Heretofore there has been so much frustration. Without a follow up on critical points the best cases had little scientific value. I want to get to the bottom of the natural phenomena behind all this. if this is possible

We should in time be able to set up some experiments to demonstrate these phenomena, and this will be the real proof of the pudding. This can come only by selecting proper cases and letting the majority of them go by the boards.

I hope that you will continue with this work and that we can have occasional meetings.

Well, here goes on this batch of 16 March. Of the 12 cases in this batch, 4 were without question Venus, and a 5th might have been. Two have insufficient data and 2 ~~xxx~~ referring to the same incident seem to be worth definite follow up.

Just for the record, the Venus cases were March 6 (Leeds Center), 8, 10 and 11. Those of 6 Erie Penn. and 7 March seem most probable to have been some unknown light aircraft.

Now to those that are of some interest, the most important is 5 March, at Shaw AFB. Has the detailed report come yet? I should like very much to see this. I particularly wonder how the object could have speed 200 mph and still have been observed 1 hour. Very important here to establish identicalness of visual and radar sightings. Is the sightings of the same date reported thru Shaw AFB, but seen at Congaree AFB a few hours later refer to the same thing?

With reference to the Great Falls, Mont 27 Feb sighting, I ask: "What previous reports?" And finally,

on 3 March, Luke AFB, was the 30 feet of gun camera film ever developed?

Question: Is it permissible to keep the typed copies of the TXK reports?

SUBJECT: (Uncl) Radar Sighting of Unknown Aerial Object

TO: Commanding General  
29th Air Division  
ATTN: Intelligence Division  
Great Falls Air Force Base  
Great Falls, Montana

1. Reference the sighting of an unidentified flying object by radar at your station on or about 27 February 1953 witnessed by radar personnel while monitoring local air traffic. In an attempt to uncover a logical explanation for such observations, the Air Technical Intelligence Center has developed a questionnaire for sightings made by ground radar which, when accurately completed by the radar technicians involved, affords ATIC radar specialists with an adequate picture of the circumstances surrounding the contact.

2. ATIC would appreciate, therefore, the completion and forwarding of the inclosed Electronics Data Sheet at your earliest possible convenience so that analysis of the subject sighting can begin.

ELECTRONICS DATA SHEET  
(GROUND RADAR)

The purpose of this questionnaire is to provide technical data for evaluating the report of an unusual radar target or track. It is requested that it be completed as accurately as possible.

When not filled in, the form is Unclassified. The reporting officer will use his own judgement as to what degree of classification is required.

It is preferred that the answers to the questions be typewritten, however, if it will expedite the completion of the form, the answers may be printed in ink. If additional space is needed, use reverse side of form.
