1. Date of sighting: 26 February 1953
2. Time of sighting: 2159P
3. Place of sighting: Ground observation, Klamath Falls, Oregon and Medford, Oregon.
4. Weather at the time of sighting: 2000 feet scattered clouds, 10 miles visibility.
Winds at 10,000 feet from 360 degrees at 15 knots.
5. Witnesses: Unidentified CAA Radio Operator, Klamath Falls, Oregon
Unidentified observer, Medford, Oregon
6. Type of sighting: Ground observation, no optical instruments used.
7. Object sighted:
 - a. Number - one
 - b. Shape - round
 - c. Size - no estimate reported
 - d. Color - red glow
 - e. Speed - maintained stationary position
 - f. Altitude - estimated 10,000 feet
 - g. Sound - unreported
 - h. Exhaust trail - unreported
 - i. Observer location - 42 degrees 52 minutes 55 seconds North, 121 degrees 57 minutes 46 seconds West.
 - j. Object position - 270 degrees from the geographic fix cited in 1, above
 - k. Length of observation - 10 minutes
8. General Remarks: The object remained completely stationary but faded and re-appeared throughout the observation. Object disappeared eventually by fading completely out. No fragments of any kind were reported; no interception was attempted; and there was no report of air traffic in the sighting area at the time indicated. No photographs or sketches have been submitted.

I. Description of Incident

At 2159 PST a round red stationary object was sighted by a CAA operator for 10 minutes time. The object seemed to fade in and fade out intermittently and eventually faded out completely. The observer estimated the unknown to be at a 270° azimuth from his position and at an altitude of 10,000'. Weather at the time of sighting consisted of scattered clouds at 2,000' with 10 miles visibility.

II. Discussion of Incident

Project Blue Book and its contract astronomer evaluate this report as definitely caused by the astronomical body Venus. Many similar reports have been received by ATIC during February of an object in the western sky appearing to change color and fading intermittently, and almost all such reports have been found to be Venus.

It is interesting to note in this and other similar observations that experienced CAA and Air Force personnel have been understandably confused by this bright planet, comparatively isolated, low on the horizon and sometimes seen through a high haze layer causing a rapid change in color. Red is the color given most often.

III. Conclusion

Was Venus.
