Upon stepping outside of enclosed porch at about 6:45 PM attention was directed upward by a passing personnel plane. The object was of such brilliance that it was immediately noted above and ahead of the plane which was flying NW. The three others named above were called and also observed the object. At that time it was stationary. After the plane passed the object moved rapidly upward at high speed, turned to the south at a sharp angle and continuing to move very rapidly finally disappeared either because of distance or in the clouds. Clouds were lower in the south than over Tipp City.

"Flying Disk" Story Studied

ATI Officers Ponder Tipp Man's Report

Still unsolved—and still a subject of study—by Air Technical Intelligence center officers at Wright-Patterson Air Force base is the report of a "flying saucer" seen by a Tipp City man July 3.

The man, Wilbur H. Focht, a Wright-Patterson employe, has returned a questionnaire sent him and has been interviewed personally on the incident, according to the ATIC.

"All we know thus far," said a spokesman, "is that the object might have been a weather balloon."

Though a check revealed that no balloon was up from this area

at the time, he said, the object could have been an upper air research balloon from another section of the country.

Focht told the officials he saw the object when he stepped outside his Tipp City home about

6:45 p.m. It was stationary at an altitude higher than a plane which was flying overhead at the time.

After the plane was gone, Focht said, the object moved upward, turned south and, moving rapidly, vanished behind a cloud bank.

2. Inclosed also are exposed film and "U.S. Air Force Technical Information Sheet." Although the object has been identified as weather balloon the data is being forwarded for the possibility of suggestions or recommendations concerning use of camera. It should be noted that film used are twenty (20) exposures in lieu of thirty-six (36) forwarded by your office. The photographer was unable to obtain the film you had sent, therefore he purchased these and did not notice the number of exposures until camera had jammed. The exposed film was removed by a qualified technician in base Photo Lab dark room. The technician reports that sprocket holes are ripped out and possibility of double exposures exists.
