SUMMARY OF INFORMATION

16 April 1954

Preparing Office:

Fifth Army Regional Office, 1660 E. Hyde Park Blvd., Chicago 15, Illinois

Subject: [REDACTED] Code for Use in Individual Paragraph Evaluation:

[REDACTED] Source: [REDACTED] Of Information:

[REDACTED] Usually Reliable...B Probably True...2

[REDACTED] Reliability Unk....F Possibly True...3

[REDACTED] Truth Cannot Be Judged.....6

[REDACTED] was estimated the distance of the floating and bouncing object from shore. At the time he regarded it as an inflated experimental balloon and described it as being a large ovallike white parakeet. [REDACTED] too large to be a kite and no markings to signify it was a weather balloon. Because of his previously mentioned presumption he paid little heed to it and does not recall whether it had any suspensions. Source asserted had he not been in a hurry and given more thought, in the event he would have returned to his apartment to acquire his binoculars, [REDACTED] as known of Mrs. [REDACTED] by the [REDACTED] other than she is believed to be a travel agent, appears to be quite intelligent and considered by Mrs. [REDACTED] to be slightly erratic and "squirlyish". Squirlyish is used by Mrs. [REDACTED] to describe one who is talkative.

(F-3)

AGENT'S NOTE: Mrs. [REDACTED] impressed this Agent as being a woman of apparent leisure, culture, and greater than average financial means devoted to intellectual research and writing. As a youngster she asserted she had a governess for fourteen years, and graduated from high school at the age of twelve. Continuing on she subsequently attended the National Academy, Washington, D. C., for two years preparatory medical mission work in China. She claims fluency in several languages, Chinese, Hindi, Greek, Italian, Latin, German, French, Russian and some basic knowledge of others. She has crossed the oceans fourteen times and made extensive travels throughout the Northern Hemisphere. During World War I, according to source, she worked for the Morale Clinic, Jefferson Barracks, Missouri, and later organized and headed the department of Psychiatry, Jefferson Barracks, during World War II with [REDACTED] staff. Allegedly she has received wide acclaim for her writings and lectures on such topics as Child Psychology, Russia and Communism, her private religion, collection of "The Black Madonna", and her authoritativeness on Cricket and Cricket lore. She has appeared in articles of American newspapers; namely two, Chicago Tribune and the Detroit Times, has appeared on television, and spoke for the Conservative Party in England under Lord Chamberlin. Numerous lectures have also been made on the above subjects in the United States and Canada.

Only information derived from Army sources is included in the above summary.

SUMMARY OF INFORMATION

(Continued)

According to source the event lasted approximately thirty minutes. When the seacraft passed, the foreign structure again became enlarged. The structure hovered over the water until the suspended airman fell. In a matter of seconds the aircraft departed with a tremendous burst of speed eastward and without noise. During a tilt of the mass source observed two narrow parallel bar-like formations on the underside of the spherical umbrella which were protected by the peripheral caves of the form. Due to the structural nature and setting of the building with its two parallel adjacent buildings extended outward source commented that any slight noise is grossly amplified and therefore was surprised that the strange object was so soundless. Unless the matter was given some importance, source was of the opinion that the above witnesses would not reveal their knowledge and observations of the above occurrence.

(F-3)

On 13 April 1954, two attempts were made by this Agent to interview Mr. and Mrs. [redacted] Chicago, Illinois, concerning their witnessing of the above event. During the first attempt, made by telephone, [redacted] manifested a hostile attitude and insistantly denied she knew anything of the Thursday evening occurrence without ever being told by this Agent exactly what [redacted] referred to. Although Mr. [redacted] was not available for immediate comment during the second interview, at her home, Mrs. [redacted] admitted then that she and her husband were waiting the apartment elevator when Mrs. [redacted] asked them to look out her window. However, because of their haste, source denied entering [redacted] apartment and paid little attention to the matter. She further stated that she remembers nothing of what she might have seen and did not recall if her husband entered the apartment. Source commented that Mrs. [redacted] must or might have been using binoculars; however, had no reason for her comment. Source remarked she knew nothing of Mrs. [redacted] other than that she resides in apartment [redacted]. She inquired whether Mrs. [redacted] was trying to make an issue of the affair or to gain publicity.

(F-6)

On 15 April 1954, Mr. [redacted] Western United Dairy, [redacted] Chicago, Illinois, who resides in apartment [redacted] Chicago, was interviewed concerning the unidentified object, reported by Mrs. Delah H. Stoker on 8 April 1954. In substance source stated that at approximately 1630 hours he and his wife were awaiting the apartment elevator when Mrs. [redacted] entered the hallway and asked them to look out her window at something which appeared peculiar to her. Source stated he did not enter the apartment but made his observations from the doorway. Though source was wearing glasses for his near sightedness and did

SUMMARY OF INFORMATION

On 12 April 1954, pursuant to information received by this office, this Agent contacted Mr. [redacted] Chicago Coast Guard Station, Navy Pier, Chicago, Illinois, concerning an alleged parachute-like object drifting over the waterfront seen and reported by a Mrs. Lelah H. Stoker, 3121 North Dearborn, Chicago, Illinois, on 4 April 1954. At 1645 hours Neal stated Mrs. Stoker reported seeing the aforementioned mass with a suspended human-like form hovering in the area of the Belmont Yacht Club (3200 north) at an estimated altitude of 1000 feet and at an approximated distance of 2000 to 3000 feet offshore. Within five minutes, Neal, accompanied by other coast guardsmen, proceeded by boat to the area arriving there about 20 minutes later. On the northward trip they searched the area about a half mile off shore until they reached the 4500 block north and then returned following a course about 1500 feet off shore. Search was completed on the following day, Neal stated Mrs. Stoker again telephoned to inquire whether anything was learned.

(B-2)

Agent subsequently interviewed Mrs. [redacted] Chicago, Illinois, concerning her reported observation on 4 April 1954. In substance source imparted that she returned home from the library about 1630 hours on the aforementioned date and in a sober frame of mind saw from her apartment a very brilliant white parachute-like object with a suspended human-like form drifting over the water in all directions at an altitude level with her apartment at a distance of about 3000 feet traversing within the purview of a 45 degree angle. Source commented that because of her doubt she asked two apartment tenants, Mr. [redacted] and Mrs. [redacted], who were awaiting the apartment elevator, to confirm her observations which they reportedly did for five minutes. Source then notified the US Coast Guard at 1645 hours. However, as the searching boat neared the area the object descended and became condensed in size until it landed on the shoreland (3050-3100 north) among the sporadic foliage, thus becoming less conspicuous and detectable. Source's first belief was that the unidentified matter had become entangled with the trees; however, its form was now small and resembled a piece of newspaper 2 to 3 feet in length. The human-like form, now alight on the ground and described as being of short but natural stature and dressed in a green one-piece suit with a simple tight fitting head and chin headdress, walked up and down the frontage behind the low stone wall and blended with the grasses. Source commented that her observations are very similar to those illustrated on pages 112, 177, and 209 of the book entitled "Flying Saucers Have Landed" by Demund Leslie and George Adamski, which was subsequently given to her by her son, a prominent Chicago engineer and reportedly a former Army Navy Intelligence Liaison officer. Previous to this occurrence, source stated she disbelieved in "saucers" and therefore had never
