Dear Sirs,

The date was May 24, 1954, the time was 5:00^{PM} clock. I was sitting on my front porch with my friends. Something made me look up (which I always do when I am outside). I saw a silvery, projectile, tube like something. I kept my eye on it for about 3 minutes as my friends did to, the object stayed motionless and that when I decided to get a picture of it, I hoped on my friends bike and rode as fast as I could to a drug store where I live. I bought 1 roll of film for my baby brownie camera, I stood out in front of the store and took 3 pictures, people came near me and asked what I was taking a picture of in the sky. So they looked up to and saw it. The object ~~stayed~~ stayed there moving South East very slowly against the wind. ~~It was~~

So I bought another roll of film and
took 8 more pictures of an enclosing some pictures
which you can expose and see for yourself that
I am not lying. I will also enclose drawings
that I made while observing the disks thru
my telescope, they are ~~off~~ of actual size and
have seen them, the first two are five minutes
apart and the rest are about 45 seconds to 1
minute apart. The ~~full~~ full time of the sighting
was from 5:00 o'clock P.M. to about 7:00 P.M. The
disks change color as I ~~was~~ ^{was} observing them,
from a pure white in the center of the disks and
an orange corona outer edge, then they change
color right before my eyes to a yellow and the
orange edge did not change color. And this is
not the reflection from the setting sun which
the sun turns the sky to yellow while setting
the sun was still very high up. As I was
observing the 7 disks thru my telescope another
one came into view ~~which~~ which might have
been flying parallel with the two tips some
an ~~out~~ ~~more~~ move slightly behind the ~~disk~~
then they changed their course from S.E. to
South, then they vanished.

I hope you will enlarge or enlarge the pictures
I am sending you, so you can see for yourself
what I had observed thru my telescope.
I hope that you will ask for more complete
details or send me observation sheets of which I
can write the more complete details in observing
form.

P.S. I hope very much that you will be satisfied
with my pictures for I've been ~~waiting~~
waiting 2 years for the sighting because I seen
a similar sighting before with 4 cigar shop disks
a big quarter I thank "God" that I made
this sighting and for the pictures.

~~P.S.~~ I am 16 years old
and have 20-20 vision,
my doctor ~~also~~ told me,
this is the 44 sun brown
flying objects I have seen
in my area over the last 4 years.

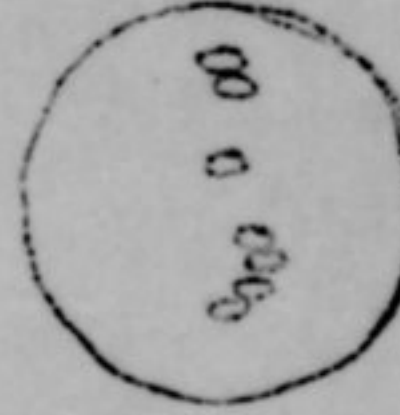

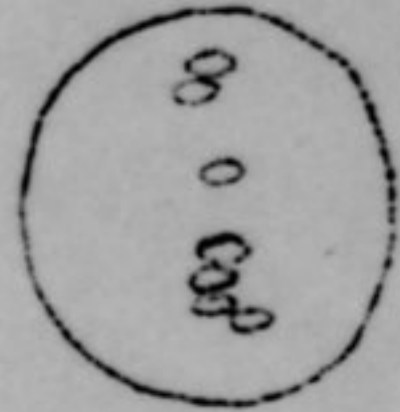

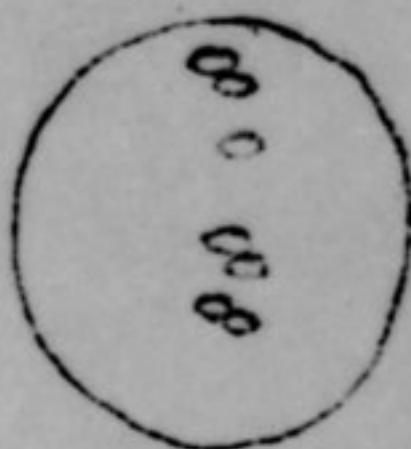

Thank You
~~_____~~
Chicago 73 ill.

Another saucer came into view with
the top cell

Same disk
left

With illuminated by the same source
look like the
the whole
tube

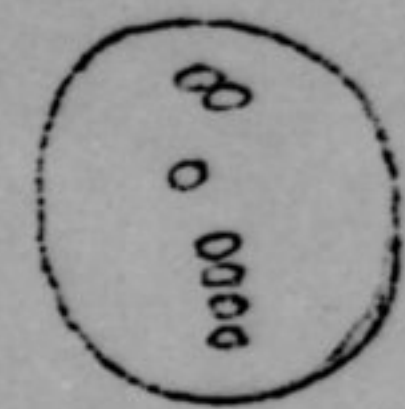

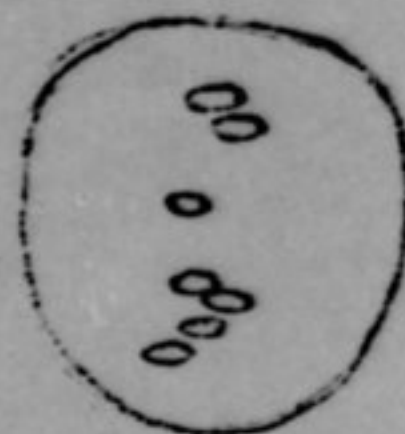

They moved
left but
very slowly
then they
went back
