UFO SIGHTING
BERMUDA INCIDENT
3 July 1954

On the night of July 3, 1954, a B-36 radar observer, monitoring thunderstorm activity at 14,000 feet over the Atlantic, near Bermuda, observed some very peculiar radar returns on his scope.

There on his screen was a clear and well-defined formation of one circular object surrounded by 6 smaller circular objects. They appeared near the surface of the ocean. A number of adjustments were made to check if an equipment malfunction existed or if the objects were spurious. The radar observer then called the navigator, then the aircraft commander, to observe the objects.

At this point the radar scope camera was turned on the set and a number of frames taken before the objects went out of range. Meanwhile, a check indicated no air or naval activity in the area.

The radar operator who had 10 years in service, 3500 flying hours and 1500 hours as a radar observer, stated that he was familiar with ship and aircraft returns, and that this was the most peculiar return he had encountered in his ten years of service, concluding with "I've seen ships before on the scope -- in fact, I was tracking one before these "things" showed up -- it wasn't radar interference, and not a cloud return --".

The prints were examined, and other internal checks and investigations made. The blips on the photos were valid objects, as compared to the numerous radar photos of spurious returns, which suddenly appear and disappear.

A detailed check with the Navy revealed that the objects seen were definitely a Navy vessel in company with six destroyers and one submarine, enroute from the Mediterranean area to a U.S. Base.

BURMUDA

AB-36

[^]
An aircraft flying over the Atlantic Ocean near Burmuda reported receiving
a peculiar radar return on the night of [REDACTED] The return consisted of a
clear and well defined circular formation containing 7 and at times 8 objects.

Photographs were taken of the scope and were included with the report. The operator reported that no naval activity was observed and that this was the most peculiar return he had encountered in his 10 years of experience.

An inquiry to the Navy produced the definite identification of these reported objects as having been an aircraft carrier accompanied by six destroyers and one submarine enroute from Naples to Norfolk.

This case contains 22
5"x7" photos and 6 10"x8"
photos and 2 8"x10" negatives.
