SOUTH. The 1980's will see the first major breakthroughs in the field of molecular biology. The Human Genome Project will be completed by 2005, and the first synthetic life forms will be created. The field of nanotechnology will also begin to flourish, leading to significant advances in medicine and materials science.

AIR INTELLIGENCE INFORMATION REPORT

1. **Name of Reporting Office:** Air Intelligence
Date of Report: 10 June 1948

2. **Description of object:** Object is being observed and identified as a **UFO**.
Observer: A. Benson, USAF, on flight training and has over 14 years of the **UFO** field.
Time of Observation: 0800 hours. There was some meteorological activity in the region and also at time of sighting there was a wind blowing at approximately 200 yards Southward of observer. It is suggested that this 1400's and this wind affected on the position angle of object giving it a Spanish color. At 0800 hours over the area the observer is believe object to be about 1500 feet above sea level.

3. **Additional Data:**

- (a) Estimated speed: 200 mph
- (b) Distance from Observer to object approximately 1,000 to 1,500 feet
- (c) Object heading was on azimuth 080°. Course of 210 degrees.
