<p>5. LENGTH OF OBSERVATION 45 SECONDS</p>	<p>11. BRIEF SUMMARY AND ANALYSIS Round to oval. Brilliant white. No sound or trail, initial observation at 12-15 deg elevation in SSW with disappearance at 20-25 deg elevation in SW. Obj climbing at same ax passing in front of cloudlayer at 21,000 ft. Grew larger and brighter. After 45 second flight obj made right angle turn to North. Movement lateral, disappearing behind cloud at 4,000 ft. Observed through 7X50 BX. Lateral movement was</p> <p>COMMENTS: Clouds visible behind obj eliminates star/planet observation. Motion of moving clouds in front of obj could account for motion of obj if this were not the case as presented. Therefore, UNIDENTIFIED.</p>
