10. BRIEF SUMMARY OF SIGHTING Four (4), dull and reddish objects in a "V" formation were noted by observer while he was studying jupiter through a telescope. Objects were not seen through the telescope but with the naked eye. Observer states that these objects were definitely not astronomical in nature. Objects flew in a northerly direction and were observed for a period of ten (10) seconds. Manner of disappearance unknown.			11. COMMENTS Due to the brevity of the sighting and the improbability of further investigation yielding further data of value, no investigation authorized by this organization. Heavy air traffic over this area and the possibility of the sighting being navigation lights or jet after-burners lead to a possible aircraft sighting.
