SPOT INTELLIGENCE REPORT

SUBJECT: Sighting of Unidentified Flying Object at Philadelphia, Pa., between 2110 hours and 2200 hours, Eastern Daylight Time,  
27 April 1955

SPOT COUNTER INTELLIGENCE REPORT AND  
REPORTS INCLUDING ESSENTIAL ELEMENTS OF  
INFORMATION

TO: Director, Special Investigations  
Headquarters United States Air Force  
Washington 25, D. C.

1. SYNOPSIS: [REDACTED] interviewed on 26 April 1955, stated that on 27 April 1955 he had sighted an unidentified flying object while on duty as a member of Ground Observer Corps. [REDACTED] described object as a bright light, varying in color and shape. Report from U. S. Weather Bureau concerning weather on 27 April 1955 set forth.

2. DETAILS:

a. On 28 April 1955, [REDACTED] was interviewed by Special Agent JOHN G. NEFFMAN at his place of employment, the Philco Corporation, 4700 Kissahickon Avenue, Philadelphia, Pa. [REDACTED] stated that while on duty as a member of the Ground Observer Corps on the preceding evening, he had sighted an unidentified flying object. [REDACTED] stated that the object appeared round when first sighted and for brief intervals appeared elongated (cigar-shaped) and once appeared in the shape of a boomerang. According to [REDACTED] the object was between the size of a dime and quarter when first sighted and when last seen about the size of a pinhead and appeared like a distant star. With reference to color, PATTERSON advised that the object first appeared as a brilliant white spot and alternated to red and green in that order. [REDACTED] stated that he could distinguish no features or details and could notice no tail, trail,

3d District OSI SPOT INTELLIGENCE REPORT, Subj: Sighting of Unidentified Flying Object at Philadelphia, Pa., between 2110 hours and 2200 hours, Eastern Daylight Time, 27 April 1955 - SPOT COUNTER INTELLIGENCE REPORT AND REPORTS INCLUDING ESSENTIAL ELEMENTS OF INFORMATION

or exhaust. According to [REDACTED] he could not hear any sound from the object and at one instant he believes he saw a ray of light shoot out from the object. [REDACTED] stated that his attention was first drawn to the object by its brightness and unusual color changes and in previous scanning in the course of his duties it had not been there. The position of the object, according to [REDACTED] when he first noticed it, was approximately due Southwest and at a 30° to 45° angle of elevation. According to [REDACTED] the object was still visible when he went off duty at 2200 hours, EDT, but its position had changed to a west southwest heading and the angle of elevation had lessened slightly as though the object had moved out into space. According to [REDACTED] the object appeared to be hovering or pivoting slightly and the only move it made was to the position where he last observed it where it again hovered. [REDACTED] stated that he was able to observe the object for a period of fifty (50) minutes by ground-visual observation without optical aids other than normal eyeglasses. According to [REDACTED] he first observed the object at 2110 hours, EDT, 27 April 1955 (280110Z Apr 55) Wednesday night, from the Ground Observer Corps Post #QL-42 on the roof of the Bryn Mawr Hospital, Bryn Mawr, Pa. [REDACTED] advised that the observation booth is located on the northeast corner of the roof with the door facing southwest and he was standing in the door at the time of sighting. [REDACTED] advised that he resides at 152 Grandview Road, Ardmore, Pa., he was born 23 January 1915, and that he is employed as an Administrative Clerk for the Philco Corp at 4700 Wissahickon Avenue, Philadelphia, Pa. [REDACTED] advised that he has been a member of the Ground Observer Corps since June 1954 and that he has received no formal training in Aircraft Identification. According to [REDACTED], the weather at the time of sighting was cloudy but clearing, with the cloud cover moving rapidly south. The wind was from the north and the moon was shining brightly in the same general area where the object appeared. [REDACTED] described the visibility as infinite and the ceiling as unlimited in the area where the object was sighted. [REDACTED] stated that at 2115 hours, EDT, he reported his observations of the object to Lt. LEVIN at the Trenton Filter Center, Ground Observer Corps, and was later advised by LEVIN that other posts in the area were unable to sight the object.

b. The following information concerning the weather on Wednesday night, 27 April 1955, was supplied by Mr. NATHAN ELLIS, Meteorologist, at the U.S. Weather Bureau, Philadelphia, Pa., on 29 April 1955. At 2107 hours, EDT, surface winds were from the north, 360° at 4 knots, scattered clouds in northern quadrant at 0000; visibility 8 miles, 30% cloud cover in Northern Quadrant. Winds aloft at 1615 hours, EDT, were: 6,000, 20°, 16 knots  
10,000, 70°, 10 knots
