5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE		
7. LENGTH OF OBSERVATION approx 15 mins still in sight	8. NUMBER OF OBJECTS one	9. COURSE stationary	
10. BRIEF SUMMARY OF SIGHTING One bright light, approx the size of a dime held at arm's length, with no sound, & blinking "like a star" was observed to remain motionless in the sky by a housewife. Sighting was made through a wire screen.		11. COMMENTS At time of sighting, planet Jupiter was high in southwestern sky. Moon was full & rather low in sky at time of sighting. Suggests that sighting was caused by planet Jupiter since it is the direction of the reported sighting and is brightest in that area.
