10. BRIEF SUMMARY OF SIGHTING Brilliant light shape of half circle on horizon. Appeared to cover many miles, center of circle was red, outer part ranged pale blue to red. Sharp line of distinction between yellow portion and blue-to-red portion, brilliant blue shaft of light radiated from semi-circle but stopped abruptly in sky. Blue light flickered 3 times. Observer was purportedly blinded by flash of light. Semi-circle faded to a dark red and disappeared.		11. COMMENTS Due to fact that recently area of sighting was used as a photoflash bomb drop area, and that light "flickered" three times, a pyrotechnic of some type is suggested. Possibly a parachute dropped, high candle power flare. Parachute would account ofr shaft of light ending abruptly.
