<p>10. BRIEF SUMMARY OF SIGHTING One (1) object flying towards Albuquerque from the SW corner of New Mexico. The object had a light (or light was emitted from the tail) on the rear. The object was estimated to be at 25,000 feet and seemed to be going "very fast"</p> <p>(No case in file)</p>		<p>11. COMMENTS This report was received by letter and was a CIRVIS report. The altitude, heading, and the light emitted from the rear of the object are suggestive of jet aircraft. In the opinion of this headquarters the observer probably saw a jet aircraft and the exhaust from the aircraft.</p>
