Unidentified flying objects seen near Oroszlany:

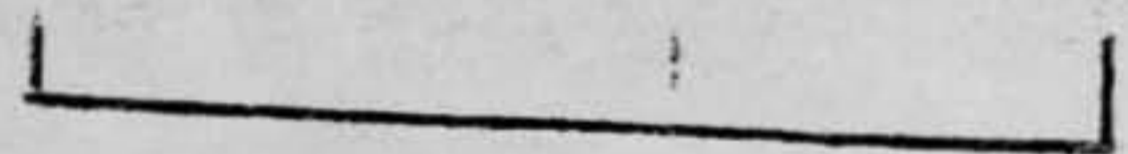

Witness saw four dimly lit unidentified flying objects, each triangular with bright spot in center. The objects formed a square in an apparently horizontal plane, distance between objects unknown, altitude about 3.000 m. They rotated slowly around center of square as if rigidly connected. Rpm and direction of rotation unknown.

While rotating the group of objects moved slowly from W to E.

Exhaust flames, streaks of light or vapor not observed; noise not heard.

Weather during the observation clear, cloudless, visibility 100%,

windless, moon not recalled.
