10. BRIEF SUMMARY OF SIGHTING One round bright red object, the size of a penny held at arm's length, observed at an angle of elevation of 15 dgrs. in the northwest. Seen thru binoculars of unknown power. The object had been seen for 1½ hours at the time of the report & was still in sight.			11. COMMENTS The planet Venus was at the same position as the UFOB i.e. / 15 dgrs elevation in the NW. This sighting was undoubtedly caused by the planet Venus. The duration of the sighting & the fact that this object has been reported before substantiate the above theory.
