COMMENTS<br>This analyst spoke to Lt Davenport one of the pilots who took intercept action on the objects. The objects were definitely established to be two balloons, at 19,500 and 17,000 feet respectively. The balloons appeared to be connected by a long cable with lights hanging from wires all along the cable. Although this was a rather unusual balloon sighting, evaluated as balloon.   |  |

Case 185, Denver, Colo., Aug. 12, 1956—Mrs. Mary McCaffrey and son were gazing west from the window of their room on the eighth floor of the Cosmopolitan Hotel when they saw the saucer move east from the mountains. "It was bigger than the largest airplane and the edges were clearly defined," she told the *Rock Mountain News*. "It had blazing white lights and we could see it plainly. It stopped fairly low in the sky and remained stationary for several minutes. Then it moved west in the same path as it approached." On the same night mysterious lights floating in the sky over and near Aurora had residents in a quandary. Callers jammed the switchboards of the *News*, the Police Dept., and Lowry AFB. Police Sgt. Jim Mullins said there appeared to be three white lights which floated and bobbed in the northeast. He said they looked like they were suspended from balloons. Other observers said the lights changed colors.<sup>11</sup>
