11. Position title and comments of the preparing officer:

a. Asst Director of Plans & Intelligence

b. The youth of the observers, coupled with an apparent interest in celestial-scientific knowledge could have led to an over-imaginative observation. Due to the relative positions of the observers and the planet Mars, they would have been looking almost directly over the City of Washington and it's airport complex. Heavy air traffic and lights in this area could have created a false impression. The observers were sincere in their attitude and they apparently saw something. There was no evidence that they were seeking personal notoriety. The reliability of this report is unknown.
