U. S. AIR FORCE TECHNICAL INFORMATION SHEET (SUMMARY DATA)

In order that your information may be filed and coded as accurately as possible, please use the following space to write out a short description of the event that you observed. You may repeat information that you have already given in the questionnaire, and add any further comments, statements, or sketches that you believe are important. Try to present the details of the observation in the order in which they occurred. Additional pages of the same size paper may be attached if they are needed.

(Do Not Write in This Space)
CODE:

When I first naw it it looked fairley for away. It was hovering in one position. The color was a dull red. It howeved for five minutes. Then it speed up quickley in a southeast to North course (158° to 20°). As it built up speed the color turned to a bright red. The speed was at least 1000 m.p.n. (I figured out its speed by this method, about a week before I saw this thing, I saw a jet plane, F-86, break the sound barries. There was a great thunder chap. and

symparanimataly.

speed of sound its about 720 m. p.h. and I know the objects was yoing much faster than that. The object was putty for away and it, still moving very fast. The altitude that I stated was just a guess. If it was an air plane it would have to be fairly high for you not to hear its engines). It flew along for a time gettling redder and redder. At the end of its flight it turned into a slape of a cigar (P.3). Three small round objects came from an entra dark part of the sky (probably a cloud) and merged into the bigger cigar shaped object. The one big object flew on for a few seconds and then just dissapered. There were no nings tall or exhauste showing that I could see. Seen by November 16, 1456.

U. S. AIR FORCE TECHNICAL INFORMATION SHEET

This questionnaire has been prepared so that you can give the U. S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes, and will be regarded as confidential material. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that, if it is deemed necessary, we may contact you for
