Dear Sir:

I am still trying to find out why
it was not on the moon when I first
look up at the moon, but the next time
I look up at the moon it was there. We
carry two 3 cans to B. Street that morning
when it just set there on the moon as long
as I look at the or it on the moon it did not
move and when I look at the Boy and half
to the Boy and look back at the moon it
had moved a foot across the moon and as
I look north it look like a round Ball
it was getting dark then. It was in back
of the house, if we could see it with my
eyes (we would it look like a do if there
was a telescope and I had it go to there
why all the planes fall I am not playing
a game, just put in best on the outside
for last morning plane at 10:00 pm on a
the house on 9th Street and between 7th and 8th
Street some one was flying a plane in
field in back of the house it was a very big
plane and before I know what it was I
was going back to my car and it was about
tall as I can tell from the ground and it was about
about 5 feet and some about 2:00 pm and
some more
