Analysis of UFO Photograph

AFCIN-1B1

1. The attached photograph, taken by Pvt (E2) ██████████, was forwarded to ATIC by your office for analysis. ✓
2. Analysis of the photograph indicates that the photo was probably exposed inside of a building and through a glass window. The object in question is probably a reflection on the window from a light hanging from the ceiling. The inside of the shade creates an elliptical shape and the strong white area in the top central portion is the light bulb which also gives off a halation creating the "bump" on the top of this reflection.
3. Attached is the transparency for forwarding to the original owner. The full address of the owner is:

REMARKS

Herewith, 3 enlargements of a photo taken on 21 Apr 1960 in the Guantanamo Bay area (Cuba) by a US soldier.

The basic photo was taken with a Zeiss Ikonette 35 mm camera, using a speed of 1/50th of a second and an "F" stop of 11 or 16. The picture was taken between 1000 and 1200 hours, aiming toward the southwest.

The soldier who took the photo did not notice the disc-shaped object which appears in the upper left of the picture.

COMMENT NO. 1

1. Attached photos and DD Form 95 were received from ACSI/Army. In further conversations with that office, AFCIN-1B1 learned that the name and address of the soldier, who made the photos, are the following: Pvt (E-2) [REDACTED] ASN: U.S. 51452111, 549th Military Police Company, Fort Gulick, Panama Canal Zone. ACSI/Army has been asked to have the negative of these photos forwarded direct to AFCIN-4E.

2. Request the results of your evaluation of these photos be forwarded to AFCIN-1B1 as soon as such action is completed.

Ltr, AFCIN-4E2, 28 June 1960, Request for Photoanalysis

1st Ind (AFCIN-4D4a)

30 June 1960

TO: AFCIN-4E2 (Col. R. R. Shoop)

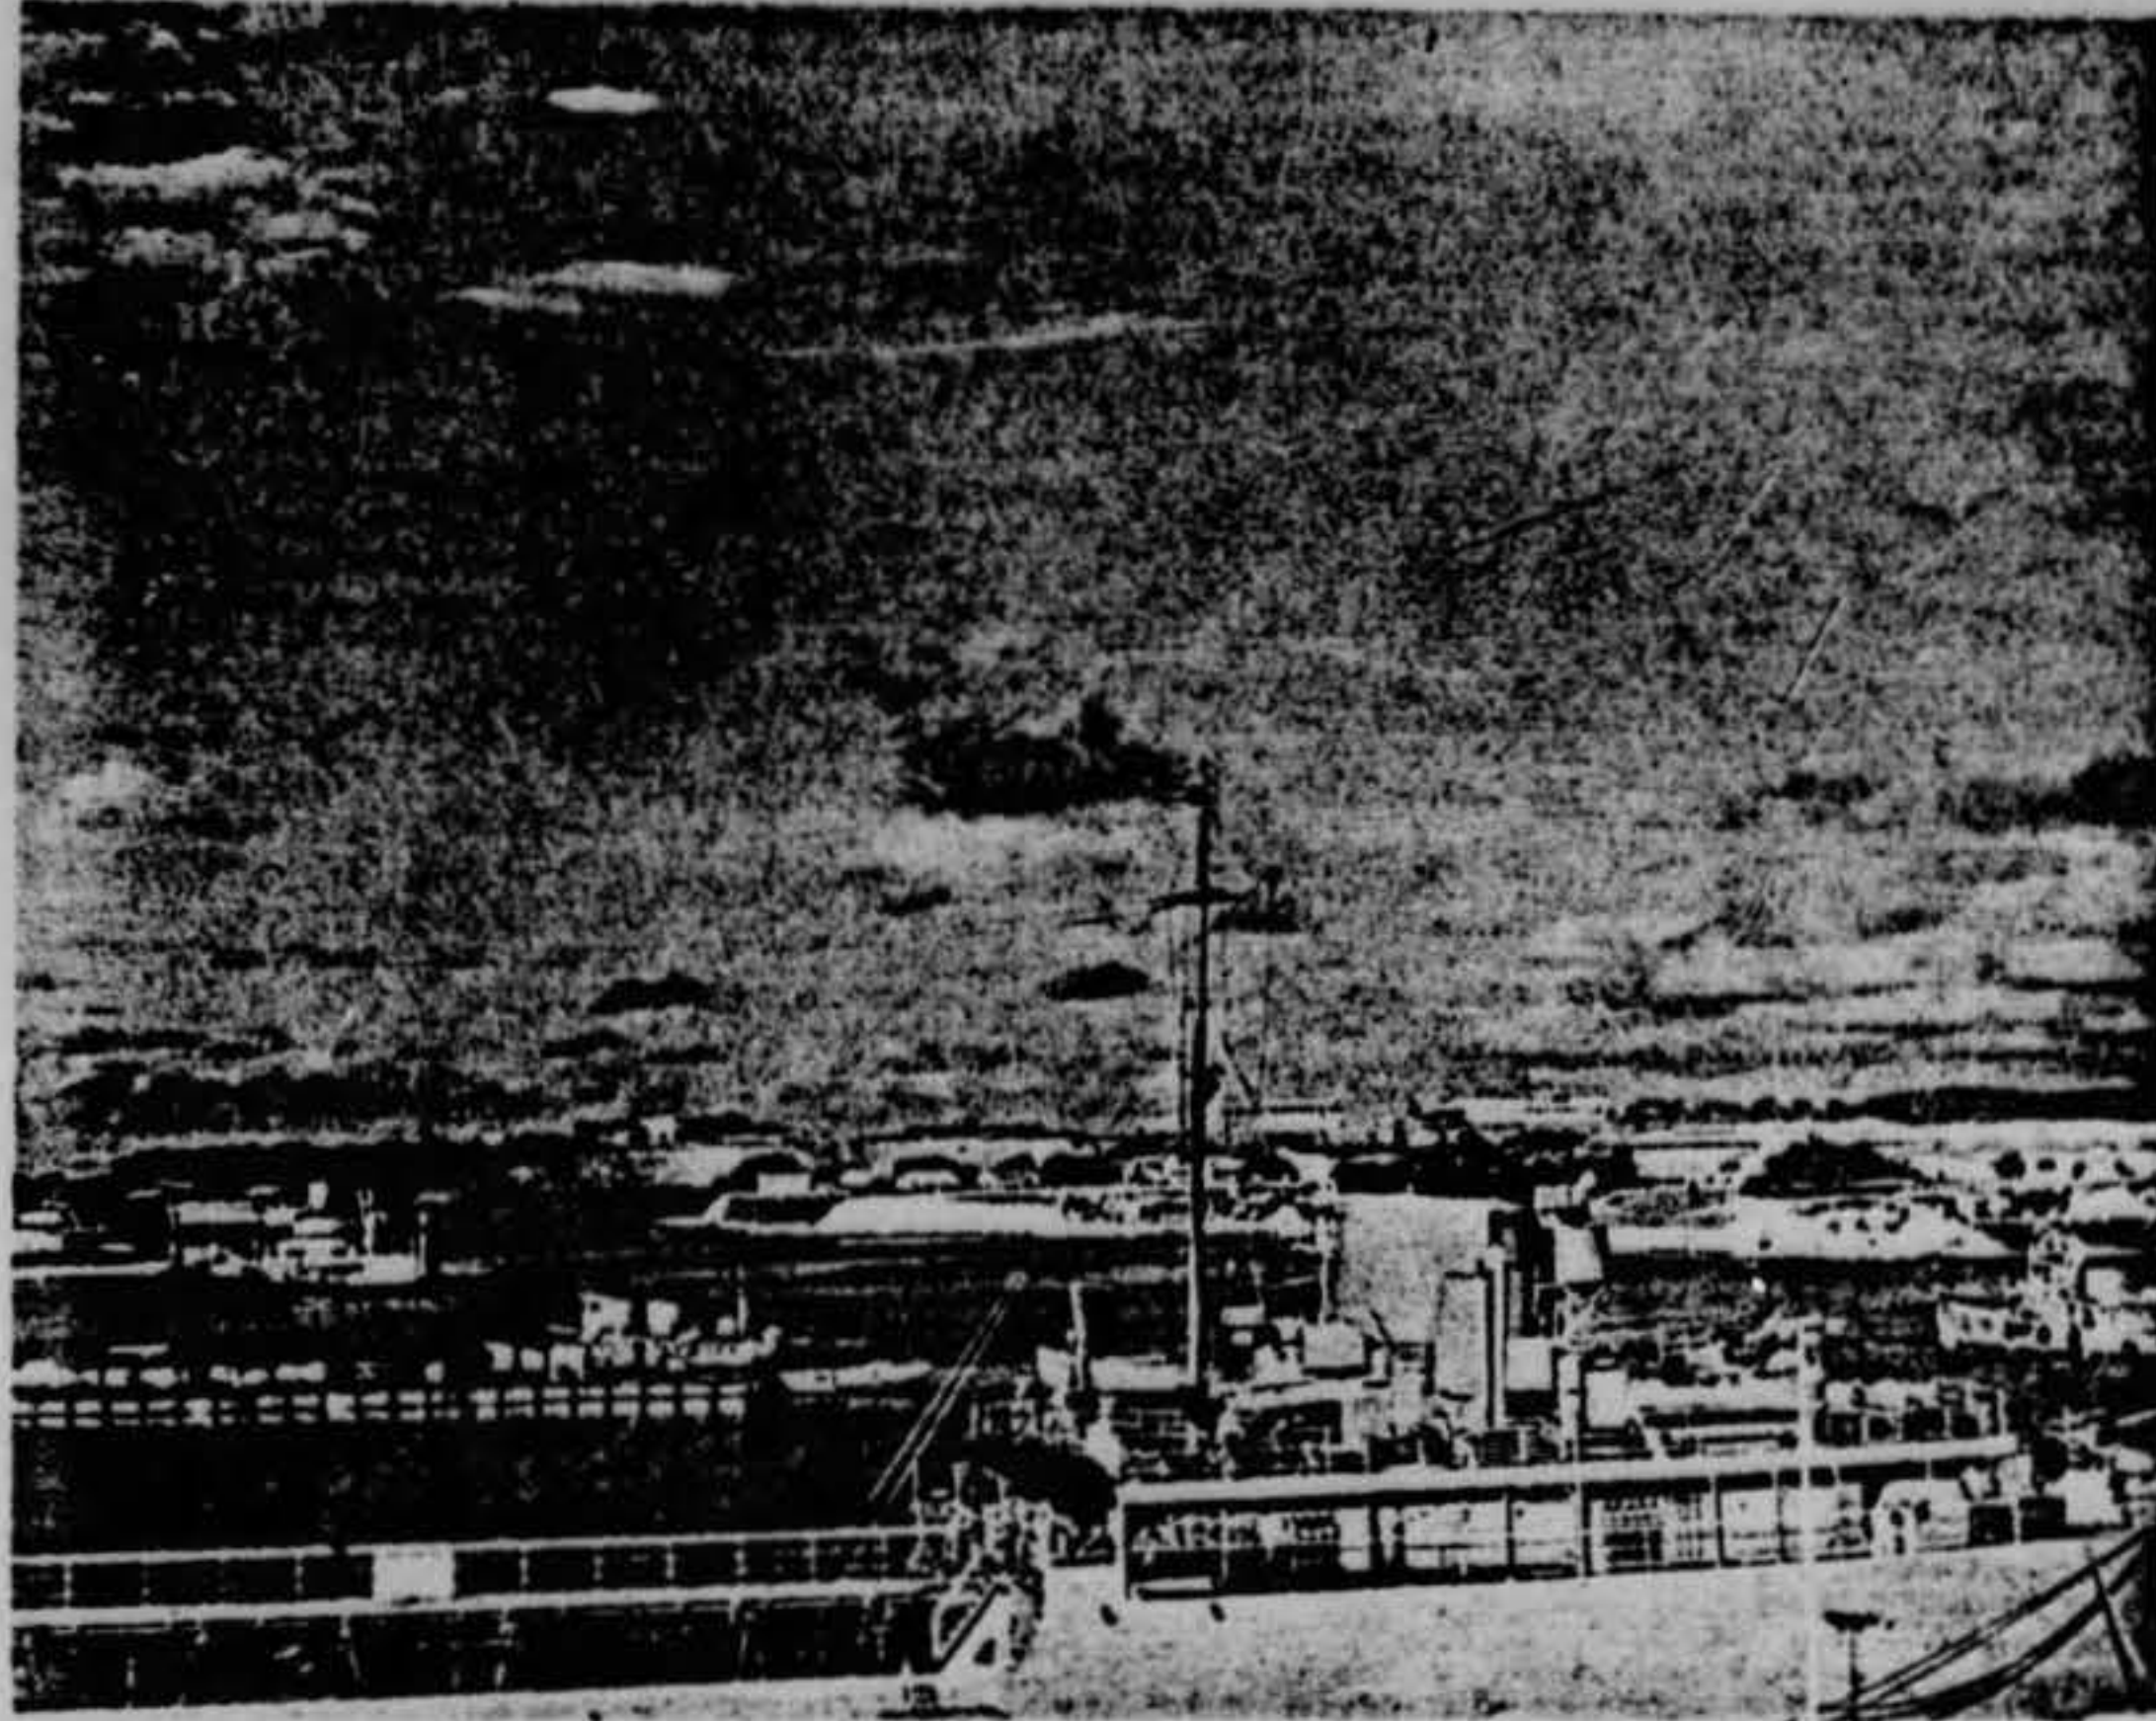

1. Analysis of the movie film reveals nothing of an unusual nature. The film was poorly exposed and the panning was such that it is plausible to assume that a child was taking the pictures. There was also an indication of a light leak on certain portions of the film. The Air Intelligence Information Report was of no value as there was nothing in the film which even remotely resembled the objects mentioned in the report.

2. The 35MM transparency was probably exposed inside of a building and through a glass window. The object in question is probably a reflection on the window from a light hanging from the ceiling. The inside of the shade creates an elliptical shape and the strong white area in the top central portion is the light bulb which also gives off a halation creating the "bump" on the top of this reflection.
