10. BRIEF SUMMARY OF SIGHTING Round star-like object observed as a point of light only. Believed to be satellite by witnesses and reporting officials. Initial observation at 270 dgr azimuth 60 dgr elevation with disappearance after two minutes at 285 dgr azimuth 40 dgr elevation.			11. COMMENTS Rather rapid decrease in elevation. No ECHO data, however, since witnesses and reporting officials consider the object to have been a satellite, concur with this evaluation.
