10. BRIEF SUMMARY OF SIGHTING Nine separate round distinct white lights in "V" formation. Angle of "V" approx 120°. Luminosity brighter than 1st magnitude star. Size larger than planet Venus. No sound. No trail. Object seen also with naked eye. Traversed 30° in 5 sec then lost in trees.			11. COMMENTS One witness - insufficient data. The witness was observing Andromeda. The constellation was on the horizon at this time to the NE. The witness was looking over the Rhine river through Binoculars. It is probable that a mirage of some sort was being observed. The objects were distinct and the duration of the sighting extremely short.
