Any marked variation in brightness? no

Did it explode, disintegrate, or suddenly vanish? no

* Any tail or trail? no

Did any sound accompany the object? I was on a screened porch and heard no sound

If sound followed later, give time interval:

Was it examined with binoculars or telescopes or photographed? no

Any other remarks: This object was in the half-way distance path of a beam which was not like an air beacon. I felt it was from Nike at Nobscoot but might have been Lincoln. This beam was shorter in length than an air beacon. I should say it crossed the path, being never too high while visible to me, ~~body~~ ^{body} worded but I mean the beam itself as being a path of light

Not a satellite.

Possibly a balloon.

If not, then in "UFO" class.
