<b>10. BRIEF SUMMARY OF SIGHTING</b> 4 round objects, one 6-7 inches in diameter, the 3 others 13-14 inches. Objects were white in color appearing separately, but all within 60 sec traveling in a straight line and disappearing instantly. Witness considered as unreliable by reporting official.		<b>11. COMMENTS</b> Due to lack of corroborating witnesses and the reporting officials comment that the witness was unreliable, ATIC considers this an unreliable report. Witness was able to estimate size of objects to within 1 inch but couldn't determine much of anything else.
