Date 11 August 1960 Hour (Z) 1130Z

WX Visibility unlimited

Description Orange ball of light with slight fluorescent trail following curvature of earth, object estimated to be 50 miles in front of acft traveling on course of 150 deg. One obs estimated speed of obj at several thousand MPH, object viewed for 3 to 4 seconds.

Direction of Motion SSE

Satellite: (AFCIN-4F3, Phone 69219) None reported to be reentering at this time.

Astronomical Phenomena (Meteor, Comet, Planet, etc) Prob meteor

Radar Analysis (AFCIN-4E1) None

Natural Phenomena (Ball Lightning, etc) -----

Aircraft, Balloons, Airships, etc. Ruled out

Other _____

Evaluation of Source Reliability Prob reliable

Analysis and Conclusions: There were no satellites reported to be reentering at this time, ~~XXXXXXXXXXXX~~ and the trajectory was wrong for an acft in trouble and burning. The extremely high speed is meteoric speed, such as that of an object entering the earths atmosphere from outer space. The description and duration is characteristic of a meteor passing through the earths atmosphere.
