10. BRIEF SUMMARY OF SIGHTING Shiny silver colored object, cigar shaped, observer moving from NW to NE. When object reached half of flight appeared to be chased by a/c. Object then made a sharp left turn and disappeared quickly. 10 min later another UFO appeared from the same NW location and the pattern was repeated, in that a plane chased the object and it disappeared. Pattern was repeated six times all objects coming from the NW and being chased and disappearing. No wings on objects. No vapor trails.		11. COMMENTS Letter requesting additional information sent but no answer returned. Without additional information no valid conclusion can be reached. From the pattern it is possible that some type of training mission with drones or other configuration was in progress. Case listed as insufficient data.

RETURN THIS MEMORANDUM WITH CORRESPONDENCE

Oct. 13, 1960

Dear Mr. [unclear]

I have seen in the newspaper
some time ago, that the Defense Dept.
consider
U.F.O.s as serious business. Why?

Here is the reason that I am ask-
ing you this question. On Sept. 2, (1960),
my son (14), my daughter (9) and myself
saw a very strange sight, in fact I
have never seen anything like
this before. We were at Munroe
Falls Lake. It was a bright, clear
cloudless day. It was a little past
3 when we saw this thing silver colored,
cigar shaped object. The top had a
slight rise to it (like a blister). It
came from the west with a
in the N.E. direction. About 4 or 5 min-
utes later we saw another one of these
objects coming from the same Wth
direction. When it got half way
across the sky, we heard a loud
bang or plane of a tone it. The object
made a very sharp turn (west), and
quickly disappeared about 10 minutes

later, another one of these objects
appeared from the same direction.
This one also made a sharp U-turn,
whose plane went after it. We saw
4 more of these objects, 7 in all. The
last one appearing about 4:15.
Once we saw 2 in the sky at the
same time. One was like a pinpoint
in the NE, when the other one app-
eared in the W. W. The second from
the last object turned W. even be-
fore it reached halfway in the sky.
All 7 of these objects came from the
North West direction. These things did
not have wings. They did not change
color, nor did we see any vapor
or anything like that coming from
them.

I would appreciate hearing from
you on this matter.

Sincerely,

Mrs ~~XXXXXXXXXX~~

object, to the south. The first one app-
eared about 4:35. Only one was seen
and no other objects were seen. It was
seen in the north-east quadrant of the
W.C. when not he saw it in the N.W.
The second group the first one turned
north-west before it got halfway across
the sky. All 7 objects came from
the N.W. direction. These objects did
not have wings on them. They re-
mained the same bright silver
color, and we did not see any vapor
or anything else that came from them.
I would appreciate hearing from
you on this matter.

Sincerely,

Mr. [REDACTED]

I have seen in the newspaper
some time ago, that the Science
Dept. considers O F as a
business. Why??

Here is the reason that I brought
up this question. On Sept. 2, my son
(14), my daughter (12) and myself saw a
very strange sight, in fact I have
never seen anything like this before.
We were at Munn's Falls Lake. It
was a clear cloudless day. I saw
a little part of a woman and saw
the thing above, above, cigar
shaped object. She top had a
slight red tint like a woman's just
come down the hill. I saw the
the figure about 4 or 5 minutes
later, we saw another one of the
type coming across the same
direction. The top of her was
more like a top, she had a
small black spot on her
upper part of her body. (end)

and quickly disappeared about 10
minutes later another one of these objects
was seen flying in the same direction.
The same occurred on the previous
trip when a plane was spotted.
We saw 4 more of these objects I think
the last one appearing about 4:15.
They all had the same appearance and
all came from the NW. Only once
in our 2 of these objects were they at
one time. One was like a open point
in the NW when another one came from
the NW. The second one from the east
turned north before it got a way
away. The objects did not have wings.
We didn't see any vapor or anything
like that coming from them. They
also remained the same distance
above us.

It would approximate bearing
from you on the matter.
