7. LENGTH OF OBSERVATION 2-3 min	8. NUMBER OF OBJECTS one	9. COURSE NW-SE	<input type="checkbox"/> Other _____ <input checked="" type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
10. BRIEF SUMMARY OF SIGHTING Object aprox size of dime held at arm's length. Large fire diminishing in size and dropping burning debris. Loud explosion followed by smaller. Appeared 70°. Disappeared into horizon.		11. COMMENTS There is insufficient evidence available for a valid conclusion. Object has all characteristics of a "bolide," however duration of 2-3 min rules this out. Case listed as insufficient data. There were three fragments of 1960 Epsilon that reentered during the latter part of Sept or first part of October. It is possible that this observation was a reentry of one of these satellites. No color or description given.
