25 October 1960

The following is a statement of the reconnaissance performed, and the findings pertaining to the incident reported to have happened at Clear Lake, Maine.

A call was received from Air Police Investigations at 1130 hours, 7 October 1960, giving the following information:

At 1006 hours 7 October 1960, [REDACTED] Maine Forestry Service reported to Sgt Rufus Bernard, Company F, Maine State Police, Moulton, Maine, that an unidentified object was seen to fall from the sky near the Great Northern Paper Company Lumber Camp, at Clear Lake, Maine. This object supposedly entered the earth near a gasoline storage tank at 1045 hours, 5 October 1960. It supposedly made a hole approximately 1 1/2 inches in diameter. This report was relayed to the Air Police Investigation Section, Loring AFB, Maine on 7 October 1960.

Arrangements were made for SSGT [REDACTED] and AIC [REDACTED] Explosive Ordnance Disposal Section, 23d Munitions Maintenance Squadron, Loring Air Force Base, to depart on EOR by the Deputy Base Commander.

At Ashland, Maine, Mr [REDACTED] Game warden, was contacted and asked to act as a guide. Upon arrival at the site of the incident, [REDACTED] of the Great Northern Paper Company Lumber Camp, was contacted and he stated that the incident sounded like dynamite going off and that he heard objects striking the roof of the office building in the camp. Other personnel contacted stated that it had sounded like gunshot reports. The area around the gas storage tanks and building was inspected. The earth seemed to be disturbed near the office building and boards which were reported leaning against the building were laying flat on the ground. The area was probed and excavated. No evidence was uncovered as to any object falling in the area and no 1 1/2 inch hole as previously reported was found. Divots of earth approximately 8 inches in diameter were found. Earth scattered on the buildings could have been caused by recent rains and the boards could have been knocked over by the wind accompanying the rains or been accidentally knocked over. No one saw anything falling as reported but only heard what sounded like an explosion or gun fire.

SUMMARY: No items fell into the area. No one observed anything falling, they only heard the report of an explosion and items hitting the roofs of buildings. No damage was caused to any facility. The earth was not penetrated below the surface and probing of the area did not turn up a hole of entry. Area failed to reflect anything but rocks and earth in natural state, with the exception of earth piled around the base of buildings, which was done by the camp personnel.
