A Mysterious Object in Sky Thrills a Jet

BY ROBERT WIEDRICH

Capt. J. R. Petrie of Trans World Airlines is an experienced airman, not given to believing in flying saucers or even witches with Halloween just two weeks away.

But yesterday, when Petrie spotted a gleaming object high in the sky above Toledo, O., he blinked, then asked for a camera.

Petrie had been enjoying the clear air and bright sunshine at 28,000 feet as he cruised his giant Boeing 707 jet from New York City to Chicago. The view was excellent there, high above the Ohio farmland. Back in the cabin, 56 passengers were enjoying their lunch.

Photographs Object

The object, about 100 feet in diameter and almost translucent, appeared to be at an altitude of 105,000 to 110,000 feet, far above his jet.

A radar control center in the Toledo area radioed Capt. Petrie and requested that he pursue this object.

Petrie radioed back that he couldn't do that because it would mean deviating from his flight plan. But he offered to do the next best thing. He borrowed the cameras of three passengers and clicked

AF PREPARES QF-104 PROGRAM FOR TESTS

Air Force crews are winding up training to begin flight testing of the Lockheed F-104 as a pilotless aircraft. The program is slated to get underway in November at Eglin AFB, Fla. Two dozen F-104s are to fly missions at more than mach 2 under remote control by ground or airborne operators. Flight tests of prototype QF-104 are being conducted at Lockheed's Palmdale, Calif., flight test center. Sperry Phoenix Co. has developed the drone stabilization and control system which enables the jet to takeoff under remote control, fly exacting missions and land.

Aerospace Research Called Key to Future

Lockheed's Gross Tells Bankers Meeting of Tremendous Strides Made in 15 Years

BY HAROLD WALSH, Times Financial Editor

Under the prime force of aerospace research there has never been a period in world history when a nation has brought forth as many new and different products as have emerged from America's laboratories in the past 15 years, Lockheed Aircraft Corp.'s board chairman Robert E. Gross, declared yesterday.

The vast "non-military fallout" of industrial and commercial products to improve daily living has resulted from defense spending, he told some 1,800 delegates at the opening-day session of the national convention of the Asian Bank Audit, Control and Operations at the Statler Hilton.

Two Main Factors

Microminiaturization and increased reliability were singled out by Gross as the most important benefits to industrial and commercial products coming out of current defense spending and space exploration.

He said we're building things so small that "a speck of dust can jam up the whole works and a sneeze can ruin a whole day's output."

Now on the market or under development, he enumerated such products as invisible hearing aids, electric watches with match-head sized batteries, tiny bearings for surgical instruments and radio pills that, when swal-

lowed, can broadcast information about bodily processes.

Gross identified two broad categories of space programs—military and nonmilitary—and declared that definite patterns for the development of both are now emerging.

Real Progress

"There seems to be emerging a rational and logical space planning and accomplishment phase," he said. "It began to look as though we really know where we're going. We have defined objectives and are making real progress."

He reviewed the progress in our second generation of military and non-military satellites and declared that space exploration is building "a second renaissance of learning and enthusiasm as well as a new, invigorating climate of the mind." "This," he added, "may open the door to ultimate world peace. Already we are seeing signs of the kind of international co-operation it involves."

WALL ST. JOURNAL, 18 October '60

An Air Force scientist called a 2,000-mile flight last week by three men aboard an Altair missile "highly successful." The pilot, Dr. Hans Clemann, said he probably would have survived the flight, which carried 100 miles into space and penetrated the Van Allen radiation belt ringing the earth.

UNCLASS DEGIN 3174. FOR AFCIN-4E2X. REF YOUR MESSAGE AFCIN-4EX18-
3123-E, 24 OCT 60. THIS CONFIRMS TELEPHONE REPLY OF 27 OCT 60 TO
YOUR MESSAGE BY MAJOR A. G. LOVE, INTELLIGENCE DIV, DETROIT ADS.
THE BALLOON IN QUESTION WAS IDENTIFIED AS FRIENDLY (U.S.) DURING
ITS DESCENT BY NOTAM ON 17 OCT 60. ALTITUDES, TIMES, AND AREAS
ESTIMATED IN NOTAM CORRELATED ALMOST EXACTLY WITH ACTUAL DATA RECEIVED
FROM THREE OF OUR RADARS WHICH WERE LOCKED ON BALLOON AND ITS PAYLOAD.
F-101B FROM LOCKBOURNE ALSO MADE TWO IDENTIFICATION RUNS, FURTHER
CONFIRMING INFORMATION IN NOTAM. 29TH AIR DIV ADVISED THAT BALLOON
WAS OF U.S. ORIGIN AND WAS RELEASED SOMEWHERE IN THE DAKOTAS. LAST
