5. PHOTOS <input type="checkbox"/> Yes <input type="checkbox"/> No		6. SOURCE Civilian		<input checked="" type="checkbox"/> Was Astronomical Meteor <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical	
7. LENGTH OF OBSERVATION Not given		8. NUMBER OF OBJECTS one	9. COURSE N	<input type="checkbox"/> Other _____ <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown	
10. BRIEF SUMMARY OF SIGHTING Object described as extremely brilliant with a large tail. Tail, or trail, was red with traces of blue and green. Object viewed as it crossed sky to N of witness. No sound heard in conjunction with sighting. Witness stated that it could have been a meteor.			11. COMMENTS Description matches that of a meteor of the "fireball" class. No evidence that this was not a meteor. Request to fill out questionnaire was sent, however no answer. Duration of sighting not included. 1960 Theta I was reentering this date. It is possible that the object was a Satellite decay, however since the additional information requested was not received the case is listed as a meteor in view of the observers statement,		

17 January 1961

Dear Mr. [REDACTED]

Your letter reporting the sighting of an unidentified flying object contained insufficient information for a valid conclusion.

Inclosed are two Air Force Questionnaires which we ask you and your science teacher to complete in as much detail as possible and forward the completed document to the Aerospace Technical Intelligence Center, Wright-Patterson Air Force Base, Ohio, Attention: AFCIN-4E2x for their analysis and/or evaluation.

Sincerely,

Inclosure

PHILIP G. EVANS
Colonel, USAF
Deputy for Science and Components

Dear Sir:

I am inquiring about an unidentified object which I saw on Nov. 14 at about 7 minutes to ten. I don't believe in flying saucers but I would like to know more about what I saw.

This object looked like it could be a meteor but it seemed to be extremely large & its light from the tail, which had the color of a brilliant red, & to us of blue & green covered most of the sky to the North. It didn't have a sound as far as I didn't hear one. I had or read somewhere that the object was seen in Ohio, Indiana, & Illinois about the same time. It was reported that no plane or balloon was in the area at that time.

My Science teacher & another student also saw this object. For verification of this you may write to Mr. [redacted] Lawford, R.R. 3, Ellettsville, Mo.

BRIEF SUMMARY OF SIGHTING: OBJECT DESCRIBED AS EXTREMELY LARGE WITH A BRILLIANT TAIL. THE TAIL OR TRAIL WAS RED WITH TRACES OF BLUE AND GREEN. OBJECT WAS VIEWED AS IT CROSSED THE SKY NORTH OF THE WITNESS. THE WITNESS REPORTED THAT NO SOUND WAS HEARD IN CONJUNCTION WITH THIS SIGHTING. WITNESS STATED THAT THE OBJECT COULD HAVE BEEN A METEOR.

EVALUATION: CASE CATEGORY: PROBABLY METEOR (FIREBALL)

CONCLUSION: THE DESCRIPTION OF THIS OBJECT MATCHES THAT OF A CLASSIC METEOR OF THE FIREBALL CLASS. THERE IS NO EVIDENCE AVAILABLE WHICH WOULD INDICATE THAT THE OBJECT RESPONSIBLE FOR THIS SIGHTING WAS NOT A METEOR.
