10. BRIEF SUMMARY OF SIGHTING Object appeared to move from E to S to W to nearly overhead. After giving off a bright glow, the light disappeared. Witness thought light looked like an a/c landing light but felt the distance to any air facility too great for this to be true.			11. COMMENTS The description and course of this object tend to indicate that the object was probably an a/c. The fact that many a/c with test configurations fly from WPAFB tends to support this possibility.

MEMORANDUM FOR AFGIN-484

12 DEC 60

SUBJECT: UFOB

1. By telephone at 2030 hours, 12 Dec 60, Mr [REDACTED] [REDACTED] Waynesville, Ohio, 13 miles SW of Dayton, Ohio, reported having seen a moving light at approximately 1845 hours, 12 Dec 60, the direction of movement for one to two minutes being from East to South to West, to near overhead. After giving off bright glow, the light disappeared. Though much like a single aircraft landing light, Mr Farffing felt the distance as between place of observation and an air facility to be too great for use of landing light. Additionally, similar lights, describing similar directional patterns have been noted by Mr Farffing and his wife (who also witnessed this evening's event) over the past two summers.

2. Though I ventured no opinion, I suspect it was an aircraft landing light. I thanked the observer and indicated that he might be contacted for additional information at a later time.
