## PROJECT 10073 RECORD CARD

1. DATE 13 Dec 60	2. LOCATION Not given exactly (Atlantic)		12. CONCLUSIONS <input type="checkbox"/> Was Balloon <input type="checkbox"/> Probably Balloon <input type="checkbox"/> Possibly Balloon
3. DATE-TIME GROUP Local _____ GMT 132352Z, 140055Z, 140130Z	4. TYPE OF OBSERVATION <input type="checkbox"/> Ground-Visual <input type="checkbox"/> Ground-Radar <input checked="" type="checkbox"/> Air-Visual <input type="checkbox"/> Air-Intercept Radar		<input type="checkbox"/> Was Aircraft <input type="checkbox"/> Probably Aircraft <input type="checkbox"/> Possibly Aircraft
5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE Military		<input checked="" type="checkbox"/> Was Astronomical meteor <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical
7. LENGTH OF OBSERVATION not given	8. NUMBER OF OBJECTS four	9. COURSE NE-SW	<input type="checkbox"/> Other _____ <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
10. BRIEF SUMMARY OF SIGHTING 3 pilots observed first UFO and one each observed remaining contacts. Observed object while flying at from 1500-40,000 ft. Trail of objects varied from whitish to reddish and persisted in sky longer than normal meteor. One pilot at forty thousand feet described object object had con or smoke trail as observed against bright star background. No supersonic radar contacts made by local GCI station during period.		11. COMMENTS During this period there are several meteor showers taking place. The richest of these showers, "The Geminids," were probably responsible for the observation. Descriptions of objects tend to substantiate fact that objects were probably meteors. Actually one witness inferred that they were meteors by describing them as "brighter than normal meteors."
