10. BRIEF SUMMARY OF SIGHTING Main object appeared as large as dime at arms length; three smaller objects appeared pea sized. All four appeared round and bright silver or aluminum in color. Estimated altitude 20,000 to 25,000 ft. Appeared 45° elevation, 290° azimuth. Disappeared 45°, 360°. Larger object would appear to hover, with 3 smaller objects hanging back in Vee formation. One would approach, appear to close in, then drop back; then nest would approach.			11. COMMENTS Objects were sighted in area used by SAC on high altitude refueling. Maneuvers made by objects are very similar to those made by a/c just before, during, and after a refueling operation. Duration appears rather long; possible 1 tanker refueled more than 3 a/c. When original witness went inside after watching first operation to get other witnesses, first 3 a/c probably broke off and others began to refuel. Second operation was probably one seen by other witnesses.

Ltr, 3245th Ops Gp (CWOB), 24 Jan 61, Report of Unidentified Flying Objects

2nd Ind (CWOB)

8 March 1961

3245th Ops Gp, LG Hanscom Fld, Bedford, Mass.

TO: ATIC (AFCIN-4E2x), Wright-Patterson AFB, Ohio

[REDACTED] was personally interviewed 7 March 1961 by me.

2. He appears to be a sound and reliable citizen; a father of an airman stationed in Texas.

3. The amateur astronomer, Mr. [REDACTED], has moved and at present his whereabouts are unknown. Last information available was that he worked in Worcester, Mass., telephone number Plaz [REDACTED]. This number was called without success. No one knew of him at this number.

4. Reference paragraph 2, 1st Ind:

a. Objects were under constant observation the first one and one-half hours, then Mr. [REDACTED] re-entered his store to call Mr. [REDACTED] (the amateur astrologer) and his son. Together they observed the four objects the remainder of the stated period.

b. The main object appeared as large as a dime held at arm's length; while the three smaller objects appeared to be pea-sized. All four objects were round and bright silver or aluminum in color.

c. The objects maneuvered in approximately a four foot square area from where the observation took place.

d. From conversation and directions pointed out by Mr. [REDACTED] I find that his direction in both elevation and azimuth to be fairly accurate to within 5 degrees.

5. Further description of flight path and maneuvers were obtained.

6. The larger object would appear to hover with the three smaller objects hanging back in Vee formation. First one would approach, appear to close in, then drop back, then the next would approach in turn. Periodically the large object would dance wildly in the sky and circle back into position then all three smaller objects would back off then attack again, one at a time. Suddenly the larger object shot off at a high rate of speed. In a matter of seconds covering 30 degrees of arc from the northwest toward north and disappeared. The other objects had disappeared when Mr. [REDACTED] looked for them after the disappearance of the larger object.

1. Reference attached copy of report of unidentified flying objects. The report indicates that Mr. [REDACTED] was the only witness interviewed. If this is true, it is requested the other witnesses be contacted and their impressions of the sighting be forwarded to this Center.

2. It is also requested the following information be forwarded to ATIC, Attn: AFCIN-4E2x:

- a. Were the objects viewed continuously during the 2½ hours, or did they disappear for some time, then reappear?
- b. Were all four objects of the same color, shape, and size?
- c. In how large an area of the sky did the objects maneuver?
- d. How were the elevations and azimuths determined?

FOR THE COMMANDER:

*Philip G. Evans*

7. Mr. [redacted] was queried as to whether the objects were similar to aerial refueling. He stated that he had seen pictures of refueling and this maneuver did not coincide with maneuvers of known aircraft.
