

PROJECT 10073 RECORD CARD

1. DATE 19, 20 & 21 Jan 61	2. LOCATION NE Coast, U.S.		12. CONCLUSIONS <input type="checkbox"/> Was Balloon <input type="checkbox"/> Probably Balloon <input type="checkbox"/> Possibly Balloon
3. DATE-TIME GROUP L231 2300-0328 GMT	4. TYPE OF OBSERVATION <input checked="" type="checkbox"/> Ground-Visual <input type="checkbox"/> Ground-Radar <input checked="" type="checkbox"/> Air-Visual <input type="checkbox"/> Air-Intercept Radar		<input type="checkbox"/> Was Aircraft <input type="checkbox"/> Probably Aircraft <input type="checkbox"/> Possibly Aircraft
5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE Military		<input type="checkbox"/> Was Astronomical <input checked="" type="checkbox"/> Probably Astronomical (MARS) <input type="checkbox"/> Possibly Astronomical
7. LENGTH OF OBSERVATION approx 4 1/2 hrs	8. NUMBER OF OBJECTS	9. COURSE	<input type="checkbox"/> Other <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
10. BRIEF SUMMARY OF SIGHTING One object sighted moving from N-NE. When first seen showed red and white flashing light then changed to steady white light. Gave off rays like sun. 2-3 times bigger than star. Another sighted objt seemed to have tail. Another observer reptd two objts, one fm SW and one fm NE both appearing to be blue. Another report stated that 4 objts were sighted all stationary. Another reported stated red, green, and yellow objts were sighted.		11. COMMENTS Sightings were reported observed from several CG stations over a period of about 4 1/2 hrs. One objt is characteristic of rotating beacons on a/c. Some are characteristic of astronomical bodies. LORAN stations at two locations experiencing difficulties, cause unknown. However, these difficulties could have been caused by bad weather, which was probably present at the time. The info reported is general in nature, and the weather was not reported, precluding a valid conclusion. EVALUATED MARS OR REGULUS BY NAVY
